PROGRAM BOOK

**4th International Conference on
Chemistry, Chemical Process & Engineering**

“Developing Concepts & Leveraging Chemistry Innovations for Sustainable Future”

27th September 2022
The Alana Yogyakarta Hotel & Convention Center
Yogyakarta, Indonesia

Preface

International Conference on Chemistry, Chemical Process and Engineering will be held in Yogyakarta, Indonesia on September 27th, 2022. The conference is jointly organized by Chemistry Department, Universitas Islam Indonesia, Himpunan Kimiawan Indonesia (HKI), Himpunan Kimiawan Indonesia Cabang Yogyakarta, International Islamic University Malaysia and University College TATI Malaysia. The conference is aimed to disseminate the results of research from universities, research center and government boards and bring synergy between research and industry. In the spirit of green chemistry, chemical and industrial process for sustainable and brighter future, the conference will provide the opportunity for more environmental and efficient technology in the field of chemistry, chemical process and engineering. Topic of interest to be covered in the conference includes, but not limited to:

1. Materials and advance materials
2. Electrochemistry and applications
3. Homogeneous and heterogeneous catalysis
4. Renewable and sustainable energy
5. Environmental chemistry and its aspects
6. Organic synthesis for food and drug
7. Reaction engineering and quality control
8. Computational modeling and chemometric
9. Chemical engineering and process
10. Chemical Education and society

This program book provides some information concerning the schedule, list of presenter and poster presenter, and the venue map. Hopefully, this book helps the participants for intensively listen and get valuable information in the conference. The scientific program of IC3PE 2022 comprises the following:

1. Keynote speakers 5 papers
2. Invited speakers 8 papers
3. Total papers for poster presentation 35 papers
4. Total papers for oral presentation 75 papers
5. Total papers 111 Papers

The topics of the papers are as follows:

Topic	Oral	Poster
Materials and advance materials	25	19
Electrochemistry and applications	2	
Homogeneous and heterogeneous catalysis	3	
Renewable and sustainable energy	1	
Environmental chemistry and its aspects	2	2
Organic synthesis for food and drug	33	12
Reaction engineering and quality control		
Computational modeling and chemometric	6	
Chemical engineering and process	2	
Chemical Education and society	1	3

Chairperson's Foreword

Assalamu'alaikum Wr.Wb

Distiguish keynote speakers, invited speakers, ladies, and gentlemen

Thanks to Allah who gives us health and opportunity to meet in this screen today, in the 3rd International Conference on Chemistry, Chemical Process and Engineering. After successful completion of 1st – 3rd International Conference on Chemistry, Chemical Process and Engineering (IC3PE), we are proud to present this meeting, the 4th IC3PE. The 3rd IC3PE was in 2020, which is in COVID-19 pandemic, the IC3PE was conducted by online mode. With our hope to bring a communicative and memorable sharing event, now, during the recovery situation, the conference is performed in the hybrid mode. The committee tried to organize the meeting very well in order to give the opportunity and facilitate all participants to include in fruitful discussion during the meeting. The conference offered experts and the chance to discuss their ideas and take suggestions for future research. Particularly, some of the keynote speakers and invited speakers are coming physically. There are will also challenges for students to take on new perspectives and building strong networks with experts. SO, thank you very much for our keynote speakers:

- Prof. Dato' Dr. Musa Ahmad** (Faculty of Science and Technology Universiti Sains Islam Malaysia, Malaysia)
- Dr. Yunus Turkmen** (Department of Chemistry Bilkent University, Turkey)
- Prof. Dr. Fitria Rahmawati** (Department of Chemistry, Universitas Sebelas Maret, Indonesia)
- Prof. Dr. K. L. Ameta** (Department of Chemistry, Sardar Patel University, India)
- Prof. Shaobin Wang** (School of Chemical Engineering & Advanced Materials, The University of Adelaide, Australia)

The 4rd IC3PE will be focusing but not limited on different aspects of chemistry, green chemistry, sustainable process, materials and inorganic chemistry, advance in organic chemistry, electrochemistry and sensor, food chemistry, catalysis, modelling, chemistry education, pharmaceutical. Not only the varied recent advances in those branches of researches, this year, this conference is also hosted by Chemistry Department, Universitas Islam Indonesia, but also co-hosted by Chemistry Department, International Islamic University of Malaysia (IIUM), and Universiti College TATI, Terengganu Malaysia.

Again, Thanks to all our wonderful Speakers, Conference Attendees and Collaborators for making this conference completed successfully.

Prof. Dr. Is Fatimah, M.Si.
Chairperson
International Seminar on Chemistry Education

Remarks by the Chairman of the Indonesian Chemical Society

Assalamu'alaikum Wr.Wb.

Let me welcome and thank all our speakers-online and offline in this conference, 4th International Conference on Chemistry, Chemical Process and Engineering (4th IC3PE) held by the Chemistry Department, Universitas Islam Indonesia.

The Indonesian Chemical Society (*Himpunan Kimia Indonesia*) congratulates the organizer for conducting a successful scientific event this year, which is the continuing routine agenda. HKI is very delighted and support this meeting to witness that in this conference, experienced and young scientists, as well as students come and sit together. The conference is an important meeting for chemists to disseminate, share, celebrate, and also motivate each other in improving research. Since its foundation in 1962, the Indonesian Chemical society has now grown to foster and encourage communication and network for more than 1300 Indonesian chemists to advance their competencies in chemistry for the welfare of Indonesia.

The progress of our world is inseparable from chemistry, chemical processes and engineering, and chemical education. These are important fields that have direct contributions for the sustainable development of our society. In addition, the meeting is hopefully promoting the advancement of the scientific competences that will impact to the continual development of our society, nations and environment for brighter future. As chemists, this is also the time to create bonds and networks that will lead to a fruitful cooperation.

On behalf of the Indonesian Chemical Society, I thank and welcome our keynotes, invited speakers and all participants who attend this conference. I wish you enjoy the good scientific atmosphere in the conference, be actively involved, make new friends and have fruitful meeting.

Sincerely yours,

Prof. Hamzah Fansuri, Ph. D

President

Indonesian Chemical Society 2022

General Information for Participants

ORAL PRESENTATIONS

1. Presenter will be invited into zoom meeting by the committee.
2. Presenter is allowed to choose the mode of oral presentation either online or offline.
3. For online presentation, you might choose asynchronous (by video recording) or synchronous with 7 minutes available and continue with Q&A session for 3 minutes.
4. Each of video or material presentation (ppt) are uploaded to the following link: <https://bit.ly/ic3pe2022-upload> latest on 22th September 2022.
5. The presentation is scheduled in conjunction with other sessions in the conference program
6. The video is presented in MP4 format with at least 480 HD maximum 50 MB with showing the face of the presenter if possible. For an example can be seen on the YouTube channel of Prof. Is Fatimah
7. The video file should be named as follows: ID paper_fullname_affiliation
8. The presentation template can be downloaded on the website of IC3PE <https://chemistry.uui.ac.id/ic3pe/>

POSTER PRESENTATIONS

1. The poster dimension is 160 x 60 cm using stand banner (provided by participants)
2. The presentation file template can be downloaded on the website of IC3PE <https://chemistry.uui.ac.id/ic3pe/>
3. The poster is uploaded to the following link: <https://bit.ly/ic3pe2022-upload> latest on 22th September 2022.
4. The committees are not responsible for the undesirable things related to the poster presentation after the conference is over.

PLENARY SESSION

1. Access to the zoom meeting is open 30 minutes before the event starts.
2. All participants must dress modestly
3. The camera and microphone should be turn off during the session and allow to be turned on as requested by the master of ceremony or the moderator as well.
4. Participants are encouraged to use a virtual background during the event or change the profile picture with the virtual background
5. Virtual background can be downloaded on the website of IC3PE
6. The participants are allowed to deliver the question through the chat application and the moderator will arrange the Q&A session at the end of each session.
7. The name of participants during the conference using the following format
 Presenter : Room_lastname_afiliation (abbreviation)
 Example : Room 1_Wicaksono_UII

PARALEL SESSIONS

1. Oral presenters will be divided into several breakout room in the Zoom Meeting. Please see your room in the conference program and accept the breakout room invitation few minutes before the parallel session starts.
2. This session starts from 13.30 PM until 16.30 PM and will be opened by the invited speaker session.
3. The moderator will open the session with greeting and introduce the invited speaker
4. The invited speaker has maximum 20 minutes of presentation and 10 minutes of discussion.
5. For oral presentation, direct mode or indirect mode each has 7 minutes of presentation and 3 minutes of discussion.
6. The moderator records the video and takes a picture in the end of session.
7. In the end of session, the moderator announces to the presenter to join the main room for award appreciation and closing remarks.

Time Schedule

The 4th International Conference on Chemistry, Chemical Process and Engineering (4th IC3PE) 2022 Tuesday, September 27th, 2022 Indonesia

Co-organizing committees:

- Department of Chemistry, Faculty of Mathematics and Natural Sciences Universitas Islam Indonesia, Indonesia
- International Islamic University Malaysia
- Universiti College TATI Malaysia
- Himpunan Kimia Indonesia (HKI)

Time	Activity	PIC	Media
08.00 - 08.30	Registration	Committee	
08.30 - 08.45	Opening Ceremony	Master of Ceremony Yono Malakiano	Zoom
	Recitation of Holy Qur'an National Anthem of Indonesia Hymn of Universitas Islam Indonesia	Cecep Sa'bana Rahmatillah, S.Si. The Miracle Voice The Miracle Voice	
08.45 - 08.50	Welcoming Address by The Chair Person of IC3PE	Prof. Dr. Is Fatimah, M.Si.	Zoom
08.50 - 08.55	Welcoming Address by The President of Indonesian Chemical Society	Prof. Dr. Hamzah Fansuri	Zoom
08.55 - 09.00	Welcoming Address by The Rector of University College TATI, Malaysia	Prof. Dr. Anuar bin Ahmad	Zoom
09.00 - 09.10	Opening and Welcoming Address by The Rector of Universitas Islam Indonesia	Prof. Fathul Wahid, S.T., M.T., Ph.D.	Zoom
09.10 - 09.15	Photo Session	Master of Ceremony	Zoom
09.15 - 09.20	Entertainment	The Miracle Voice	Zoom
09.20 - 09.30	Coffee break	Committees	
09.30 - 10.30	Plenary Session 1		Zoom
	Prof. Shaobin Wang <i>School of Chemical Engineering and Advanced Materials</i> <i>The University of Adelaide</i> <i>Australia</i>	Moderator	
	Prof. Dr. Fitria Rahmawati <i>Department of Chemistry</i> <i>Universitas Sebelas Maret</i> <i>Indonesia</i>	Dr. Maisari Utami	

10.30 - 12.00	Plenary Session 2 Prof. Dato' Dr. Musa Ahmad <i>Faculty of Science and Technology Universiti Sains Islam Malaysia Malaysia</i> Prof. Dr. K.L. Ameta <i>Department of Chemistry, School of Liberal Arts and Sciences Mody University of Science and Technology India</i> Dr. Yunus Turkmen <i>Department of Chemistry Bilkent University Turkey</i>	Moderator Assoc. Prof. Dr. Fiona How Ni Foong	Zoom
12.00 - 12.10	Presentation of Sponsorship	Master of Ceremony	Zoom
12.10 - 12.15	Closing of Plenary Session	Master of Ceremony	
12.15 - 13.30	Break Poster Presentation	Committees	
13.30 - 14.30	Invited Speaker Session (20 minutes presentation, 10 minutes discussion)	Moderator and Associate in Parallel Session	Zoom Room Breakout
	Room 1: Asst. Prof. Dr Wan Hazman Danial	Asst. Prof. Dr. Mohamad Wafiuddin	
	Room 2: Assoc. Prof. Suresh Sagadevan	Gani Purwiandono, Ph.D.	
	Room 3: Prof. Dr. Is Fatimah, M.Si.	Asst. Prof. Dr. Maryam Zahaba	
	Room 4: Ts. Dr. Azharin Shah Bin Abd. Aziz	Asst. Prof. Dr. Wan Zurina Samad	
	Room 5: Asst. Prof. Dr. Erna Normaya Abdullah	Salmahaminati, Ph.D.	
	Room 6: Assoc. Prof. Dr. Mohammad Norazmi Ahmad	Asst. Prof. Dr. Nurasyikin Hamzah	
	Room 7: Muhamad Rafi, Ph.D.	Dr. Tatang Shabur Julianto	
	Room 8: Assoc Prof. Ts.Dr. Ahmed H. A. Dabwan	Amri Setyawati, M.Sc.	
14.30 - 16.30	Oral Presentation (7 minutes presentation, 3 minutes discussion)	Moderator	Zoom Room Breakout
16.30 - 16.35	All participants return into Zoom main room	Committees	Zoom
16.35 - 17.00	Entertainment Awarding Best Poster and Best Presenter Closing Remarks Dean of Faculty of Mathematics and Natural Sciences Universitas Islam Indonesia Closing Ceremony	Chemistry Student Association Committees Prof. Riyanto, M.Si., Ph.D. Master of Ceremony	Zoom

Abstract. Seaweed or macroalgae contain an abundance of valuable bioactive compounds such as proteins, carotenoids, and phenolics and, consequently, present great commercial interest. The aim of this work is the study and screening of recovering the protein components from the green macroalgae species *Ulva lactuca* through conventional assisted extraction method by using a food grade extraction procedure. The effect of three operational conditions-namely, temperature (30–70 °C), duration (1–3 h) and solute-to-solvent ratio (1-10 % w/v), was examined regarding the extracts' yield (gravimetrically) using Kjeldahl analysis. Data analysis resulted in the optimal extraction conditions of 70 °C, for 3 h with 10:100 (g/mL) solute-to-solvent ratio. The significant factors during the extraction procedure were identified using the Two-Level Factorial design. Solute-to-solvent ratio exhibit the significant effects with the optimum condition was noted at 10:100 (g/mL). The extraction duration and the extraction temperature somehow indicated a non-significant effect towards the protein yields. The experimental data and predicted results were considered comparable, and consequently, the corresponding regression models were sufficiently reliable for prediction. The protein fraction may be further concentrated and purified for use in food formulations.
