Transformation of Education in Landscape Architecture through Digitalisation of Heritage

Due to the epidemic, the methods of teaching and learning in the educational system have been altered by technology and digitalization. The current level of digitalisation in T&L is consistent with national policies, guidelines, and regulations that highlight the need for education enhancement, such as Landscape Architecture Agenda 2050, Sustainable Development Goals, National Fourth Industrial Revolution (4IR) Policy, National e-Learning 2.0 Policy, and the most recent addition Malaysia Madani. The project intends to transform Landscape Architecture education through digitalisation of teaching and learning (T&L) methodologies that contribute to the preservation of data and information pertaining to landscape heritage. The new shift contributes to the Quadruple Helix framework, which emphasizes the significance of collaboration and coordination between government, industry, the public, and academics to achieve sustainable solutions for the protection of cultural heritage.

Title Transformation of Education in Landscape Architecture through Digitalisation of Heritage
 Researcher/s Asst. Prof. LAr. Dr. Norhanis Diyana Nizarudin / Assoc. Prof. LAr. Dr. Khalilah Zakariya / Assoc. Prof. LAr. Dr. Putri Haryati Ibrahim / Asst. Prof. Dr. Haza Hanurhaza Md Jani
