Abstract

Transit-oriented development (TOD) offers as a method to provide sustainable living and introducing place making as the essential needs of producing good public spaces. TOD may also help to achieve a greater positive outcome that satisfies the community's demand. This study synthesized literature reviews from 1993 to 2021 on the 'sense of place' in creating a quality place making in public spaces. Views taken includes from the concern of methodological and components used to comprehend the association of sense of place within place making in public spaces accompanied by the individual's perception of the place meaning. In conclusion, place making is essential in forming quality public spaces especially in TOD. It enables us to understand the place attachment as in the connection between a person and a place physically and spiritually thus, help to contribute to an effective place making. © 2023 by MIP.
