Preface

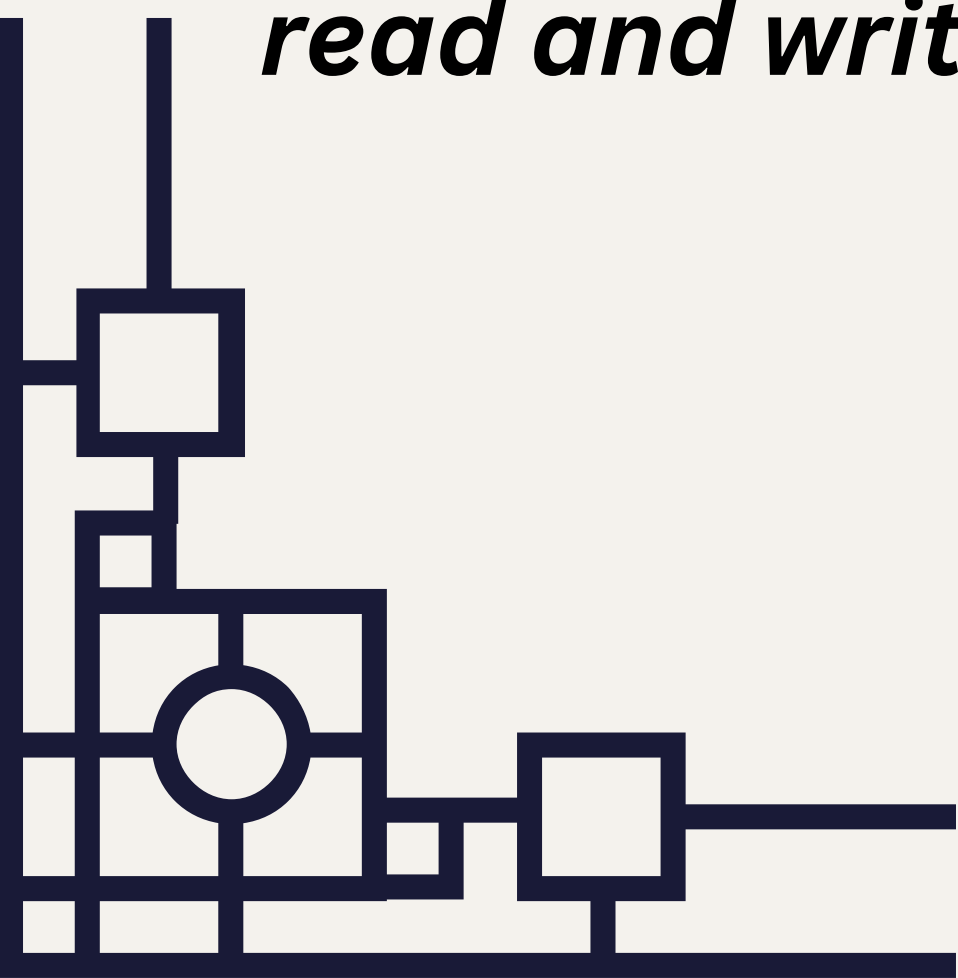

머리말

This book introduces Hangeul (한글), the unique Korean alphabet created by King Sejong the Great in 1443. The alphabet consists of 21 vowels and 19 consonants, forming a total of 40 characters.

Designed for learners of all levels, this book provides clear explanations of Hangeul's structure and usage, along with step-by-step lessons on vowel, consonant, final consonant (받침), double final consonant, and liaison/connection rules.

Each chapter is supported with reading, writing and listening exercises to make the learning process engaging and practical.

By the end of this book, you'll be able to read and write in Hangeul. Let's get started!

1과 (CHAPTER 1)

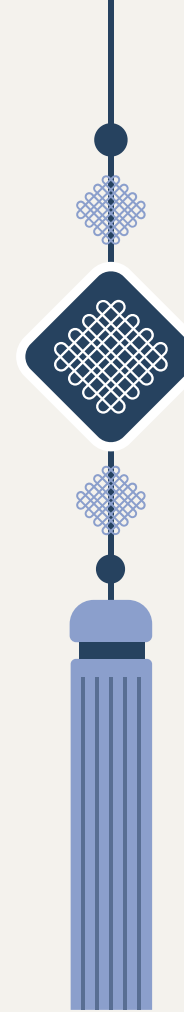

한글 소개 (Introduction to Hangeul)

When writing Hangeul, unlike in English, where letters are written side by side in a continuous line, Hangeul consists of vowels and consonants grouped together to form syllables

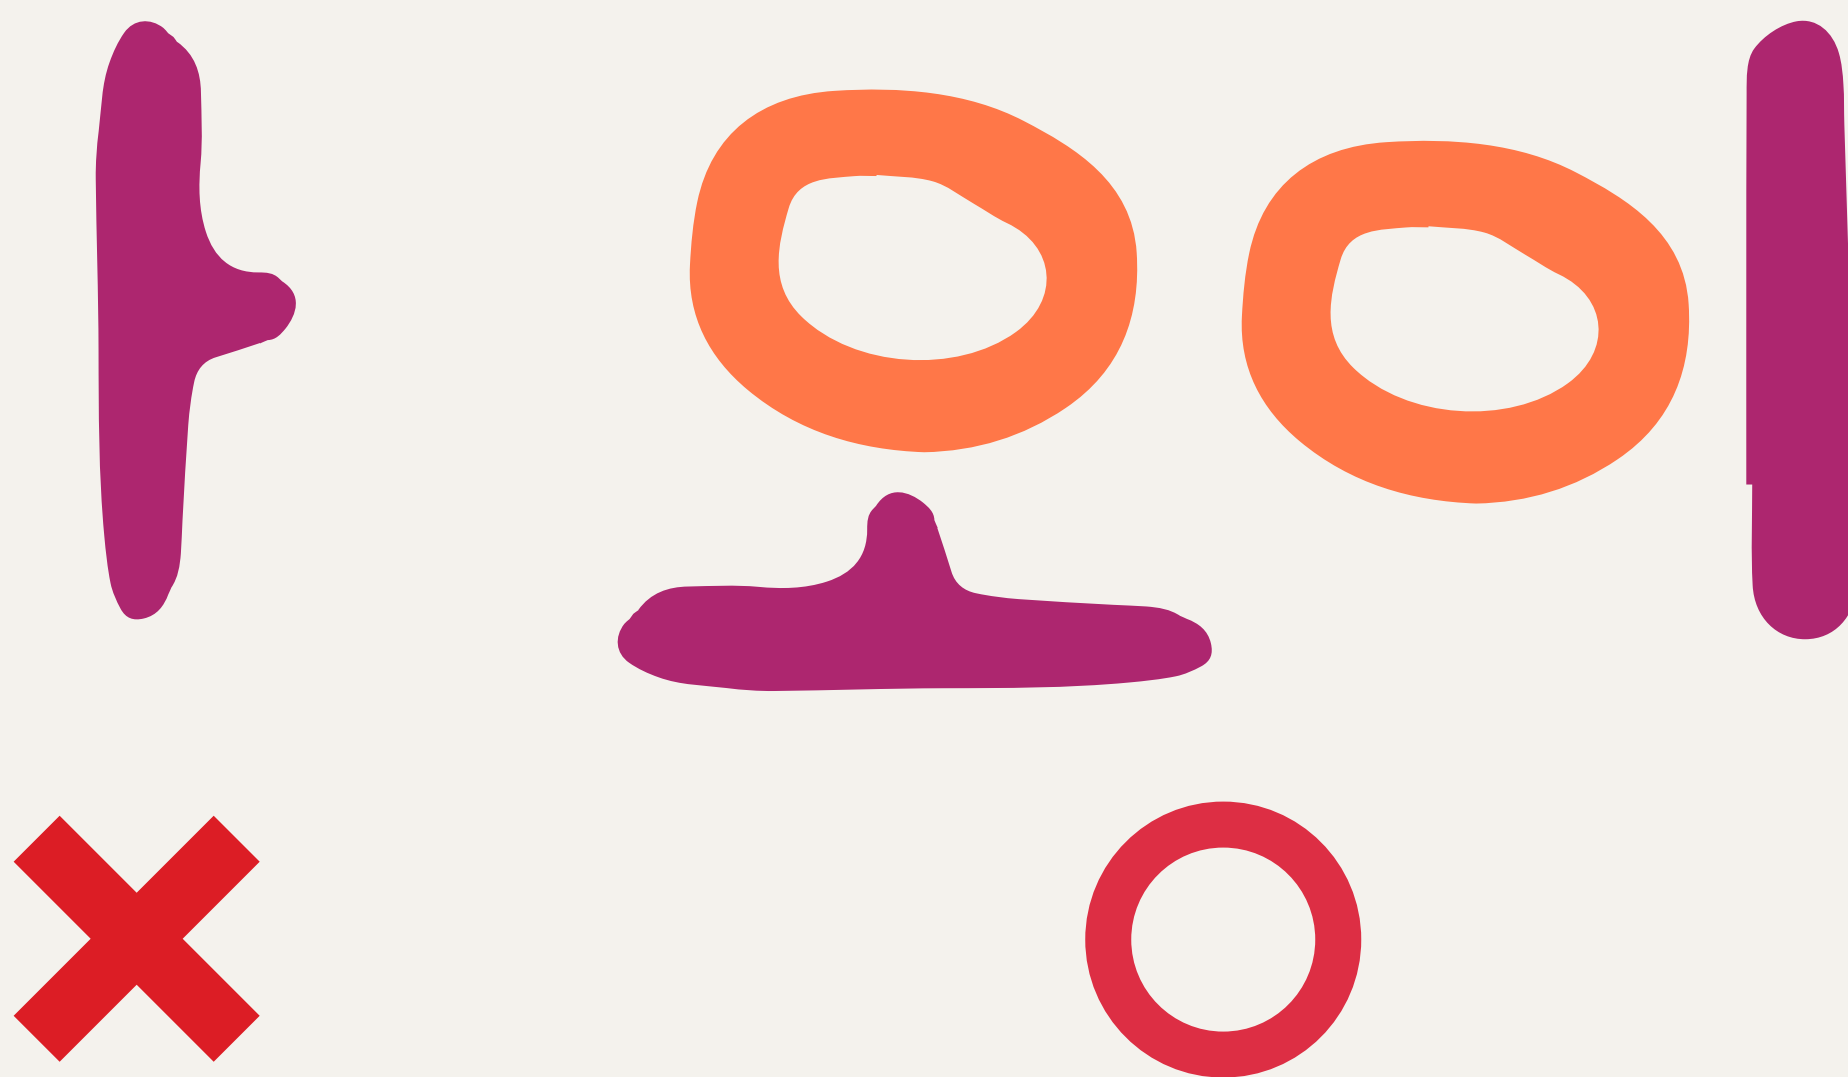

1과 (CHAPTER 1)

한글 소개 (Introduction to Hangeul)

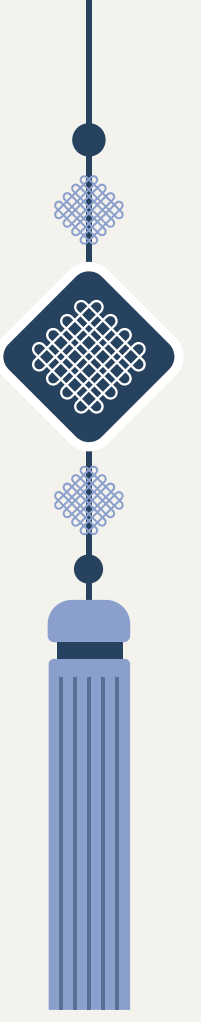

As Hangeul syllables must consist of both a consonant and a vowel, the consonant 'ㅇ' is added in front of or on top of the vowel. The 'ㅇ' is silent in the initial position

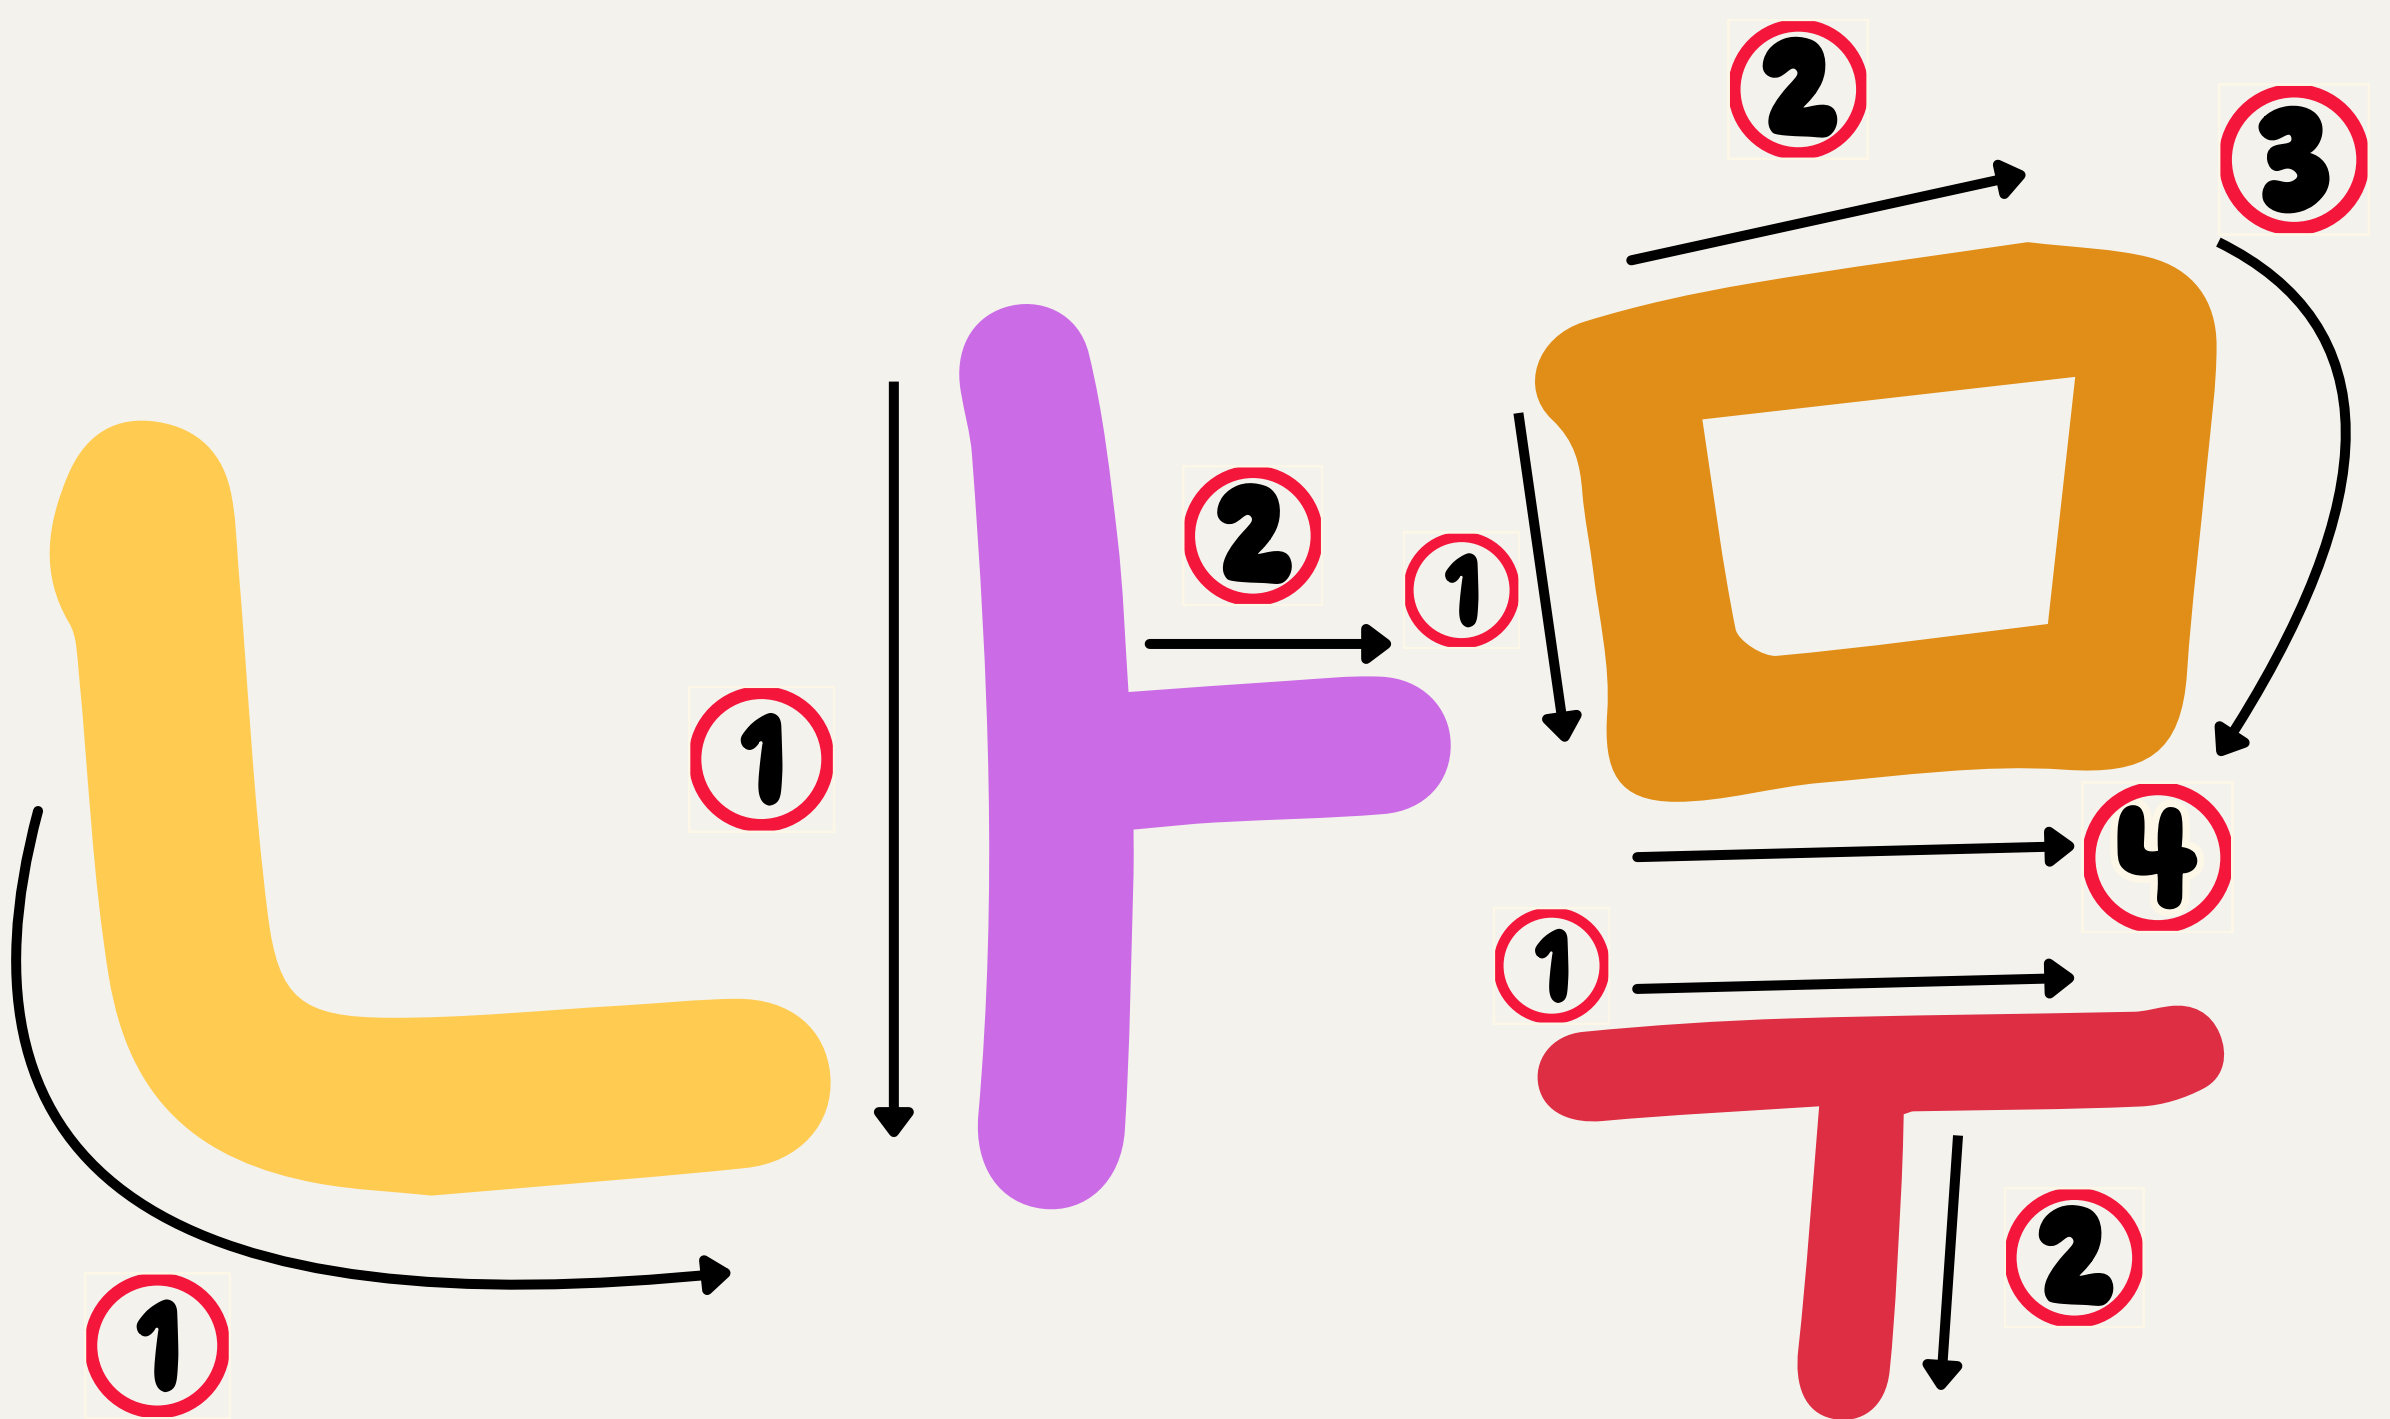

Vowels cannot be written by themselves!!

1과 (CHAPTER 1)

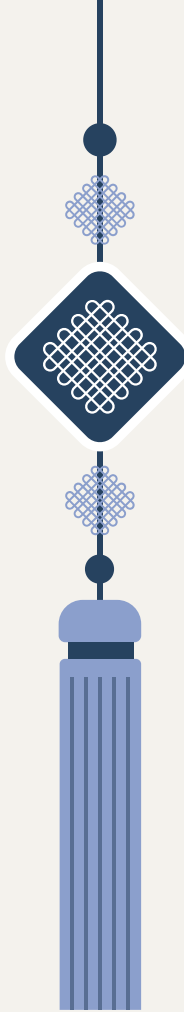

한글 소개 (Introduction to Hangeul)

HANGEUL is written
Left to right
top to bottom
