Acknowledgement

I owe a great many thanks to a great many people who helped and supported me during the writing of this thesis. First and foremost, my utmost gratitude to my supervisors, Prof. Paul Torremans and Prof. Dr. Ida Madieha Abd Ghani Azmi, whose sincerity and encouragement I will never forget. Prof. Paul Torremans, my principal supervisor, has been guiding me during all phases of this research. I am also indebted to my co-supervisor, Prof. Dr. Ida Madieha Abdul Ghani Azmi for the valuable guidance and constant advice. She has been my inspiration as I hurdle all the obstacles in the completion this research work particularly during semi-structured interviews and data collection for chapters on Malaysian biotechnology.

Thanks and appreciation to the helpful people at various research institutions in Malaysia (MARDI, FRIM, MPOB, MRB, MCB) for their support and co-operation during the interview sessions. Particular thanks are due to officials at Biotech Corp, MyIPO, MOSTI and DOA for the assistance in data collection relating to patents and plant breeders' rights in Malaysia. I would also thank my faculty members, both in the University of Nottingham and International Islamic University Malaysia, for their support and encouragement throughout the study.

An honourable mention goes to my beloved parents and family for their care, support and strength along the way. I would like to express a sense of gratitude to my husband, Mr. Rohisham Mamat for his unending love, support, understanding and patience throughout my study. Last but not least, my deepest thanks and regards to my beloved late father, Mr Ismail Awang Besar, who supported me in any respect and built a strong foundation on me. Indeed, he has a place of honour, deep within my heart.

Chapter 1: Introduction	1
1.1 Agricultural Biotechnology: An overview of current development	t 1
1.1.1 Biotechnology in general	1
1.1.2 Plant biotechnology	2
1.1.3 Legal mechanism: Protection via patent and plant variety ri	ghts
ч,	3
1.1.4 Global IPR regime	5
1.2 Scope of study	7
1.2.1 Research questions	7
1.3 Methodology	8
1.4 Division of chapters	9
(i) Chapter 1	9
(ii) Chapter 2	10
(iii) Chapter 3	13
(iv) Chapter 4	14
(v) Chapter 5	15
(vi) Chapter 6	15
(vii) Chapter 7	16
1.5 Defining the Terminology	17
(i) Agriculture	
(ii) Biological process, microbiological process	
(iii) Genetic engineering	23
(iv) Invention (as opposed to discovery)	
(v) Patent	
(vi) Utility models for innovation	
(vii) Plant, plant variety, crops, seed	
(viii) Plant variety rights, plant breeders' rights, farmers' rights	
(viii) Sui generis protection	40
1.6 Conclusion & Contribution	42

Chapter 2: The International and European Legal Background 43
2.1 Background43
2.2 The Paris Convention on the Protection of Industrial Property44
2.2.1 The origin and background44
2.2.2 The relevant provisions45
2.2.3 The implementation47
2.2.4 The significance47
2.3 The Role of the World Intellectual Property Organization (WIPO)47
2.3.1 Background47
2.3.2 Administration of national treaties48
(i) Patent Co-operation Treaty (PCT)49
(ii) Patent Law Treaty (PLT)51
2.3.3 Recent development53
2.4 The International Convention for the Protection of New Plant
Varieties (UPOV)54
2.4.1 Background54
2-4.2 Purpose of adoption57
2.4.3 Criteria for a plant breeder's rights58
2.4.4 Definition of 'plant variety'59
2.4.5 Definition of 'breeder'60
2.4.6 The issue of 'dual protection'61
2.4.7 Limitation of rights63
(i) Research exemption63
(ii) Insertion of the term 'essentially derived variety'64
(iii) Farmer's privilege67
2.4.8 UPOV revision69
2.4.8.1 Comparison of UPOV 1978 Act and UPOV 1991 Act69
(i) Number of protected varieties69
(ii) Expansion of the exclusive rights70
2.4.9 Expansion of UPOV71
2.4.9.1 UPOV Impact Study71
2.4.9.2 Resistance to the 1991 Act73
2.5 Trade-Related Aspects of Intellectual Property Rights (TRIPS)74
2.5.1 Background
2.5.2 Patentable subject matter under TRIPS77
2.5.3 Sui generis concept80
2.5.4 Review of Article 27(3)(b) TRIPS Agreement 83

2.5.5 Important role of TRIPS	86
2.6 The co-existence of UPOV and TRIPS in protecting plant-related	
inventions	86
2.7 The European Patent Laws	92
2.7.1 European Patent Convention (EPC)	92
2.7.1.1 Background	92
2.7.1.2 Important provisions of EPC	94
2.7.2 The Biotechnology Directive (the Directive 98/44)	100
2.7.2.1 Background	100
2.7.2.2 Relevant provisions	102
2.7.3 Some recent developments	106
2.8 Patentable Subject Matter: The EPO's Case Law	107
(i) Ciba-Geigy/Propagating Material (Case T-49/83)	108
(ii) Lubrizol/Hybrid Plants (Case T-320/87)	111
(iii) Plant Genetic Systems (Case T-356/93)	114
(iv) Novartis/Transgenic Plant (Case G01/98)	120
(v) Plant Bioscience Limited (Case T83/05)	135
(vi) Monsanto Canada Inc. v Schmeiser	138
2.9 Patentability of transgenic plant in Europe: the current position	147
2.10 The interface between patent and plant variety protection	150
2.10.1 Patent system provides a better protection for agricultural	
biotechnology inventions	159
2.11 Conclusion & Contribution	162
Chapter 3: Agricultural Biotechnology: Patent and Plant Breeder'	's
Rights Protection in the United States	163
3.1 Introduction	
3.2 Brief History and Background of U.S. Statutory Laws for Agricultu	ral
Biotechnological Inventions	165
3.3 Current IPR legislation in the U.S	170
3.3.1 The PPA	170
3.3.2 The PVP Certificates	174
3.3.3 Utility Patents (UPA)	177
3.3.4 The issue of joint protection	182
3.3.5 How Utility Patents and PVP differ, and Why One Would Be	
Preferable	190
3.4 Development of the Legal Protection For Agricultural Biotechnolog	gical
Inventions	196
3.4.1 Case-law	197

(i) Diamond v.Chakrabarthy197
(ii) Ex parte Hibberd199
(iii) J.E.M. AG Supply, Inc. v Pioneer Hi-Bred Int'l, Inc200
(iv) Imazio Nursery, Inc. V. Dania Greenhouses204
(v) Yoder Bros., Inc. v. California-Florida. Plant Corp207
(vi) Asgrow Seed Co. v. Winterboer211
3.4.1.1 The significance of the case-law in shaping the current
position of laws on plant patents in the U.S214
3.4.2 Some Controversies over Plant Patents in the U.S216
3.4.3 Recent development in plant bioscience and possible effects on
the U.S. current laws on plant-related inventions219
3.5 Comparison of the U.S. and European approaches221
3.6 How relevant is the U.S. system to Malaysian IP laws on agricultural
biotechnological inventions225
3,7 Conclusion & Contribution229
