## WELCOME ADDRESS

*Assalamu'alaikum W.B.T.*

*Praise be to Allah SWT and salam to His Beloved Prophet SAW.*

*First and foremost, let me thank the organizing committee for inviting me to write in this year's PPIM National Conference 2010 brochure. PPIM national conference is the key event for PPIM and its members in the year. This year is no different from the others except the fact that it is organized in conjunction with IUM in the seaside town of Kuantan.*

*The theme for the conference is "Addressing Current Issues in Healthcare." This is a general invitation for the participants to address current issues that affect the healthcare professionals in their daily practice. These issues range from academia, health infrastructures and minority groups. We cannot of course talk on all current issues related to healthcare but the topics covered reflect the wishes of members during an email survey conducted at the beginning of the year. In the past we have amply shown how Islam could be translated into medicine and its practice but this year we have slightly changed tact. The aim here is to talk on these issues and bring the perspective of Islam into it. It is not too extreme to say that opinions on topical issues from the Islamic perspective are quite scarce but this does not mean that Islam views the solutions differently in all of them. In this context I am inviting all of you to be involved in the discussion and debate.*

*We are very fortunate to have our Director General of Health to deliver the keynote speech on the roles of the state in addressing these issues. This will set the scenes for various symposia to unfold. The second keynote speech will focus on the roles of doctors.*

*I would like to sincerely thank the sponsors for their abundant generosity and also our co-organizers namely IUM for supporting us in the organization and preparation of the conference.*

*May Allah SWT help us to contribute positively to all aspects of development of this country, Ameen.*
