Islamic Terms in English Usage

Haja Mohideen Bin Mohamed Ali, Ph.D.

Introduction

The purpose of writing this booklet is to exemplify how common Islamic terms and concepts which are mostly in Arabic are used in English. For instance, when referring to taking ablutions for saying our prayers, do we say make wudu or perform the wudu? Should performing one’s ablutions for solah be spelled as wudu, wuduk or wudhu? Is it make dua or say dua when we make an invocation to Allah? Should it be spelled as dua or doa? There are items which are singular and those which are plural. In Arabic, sahabi is singular and refers to a companion of the Prophet Muhammad (Peace be upon him-PBUH). The plural is sahabah. Alternately, can we say sahabis?

As more and more Muslims use English in their religious, social and professional interaction, it is inevitable that they will have to use many of the terms which appear in this book. So, it also serves as a guide for the uninitiated Muslim users of English, besides, of course, for the many non-Muslims who live and work in Muslim-majority countries.

Many of the sample sentences provided here have been adapted from real sentences from newspapers, magazines, books and internet sources. They have been edited for clarity and brevity. Where sentences were difficult to come by for some of the terms, the author himself constructed the sentences in such a way these words would actually be used. The sentences provided here adhere to the rules of English syntax, that is, sentence structure.

Although many of the sentence examples are in the domain of religion, there are also others which can be used in business and ethics. The majority of the words here are likely to be encountered in the written and spoken discourse of Muslims fairly often in various contexts.

It is modestly presumed that the booklet is another humble contribution to Islam-related English by the author.
