TABLE OF CONTENTS

	Page
Preface to the First Edition	vii
Acknowledgements	xi
Abstract	x
CHAPTER 1:	
INTRODUCTION	01
1.1 Background	
1.1.1 Recent trends and challenges in manufacturing Industries	
1.1.2 Leveraging the latest technology	
1.2 Factors affecting machinability	
1.3 Recent advancements in hard machining	
1.3.1 Heat Assisted hard machining	
1.3.2 Selection criteria of cutting tools for hard machining	
1.4 Problem of hard machining	
1.5 Issues addressed	
1.6 Significance of the book	
1.7 Experimental Techniques in Heat Assisted Machining	
1.9 Organization of the book chapters	
CHAPTER 2:	
OVERVIEW OF DIFFERENT TECHNIQUES	
USED IN HARD MACHINING	17
2.1 Introduction	
2.2 Different Aspects of Machining of hardened steels	
2.2.1 Influence of mechanical and metallurgical properties	
2.2.2 Tool wear mechanism	
2.2.2.1 Tool performance aspects in machining hardened steels	
2.2.2.2 Tool wears mechanism in hard milling	
2.2.3 Surface integrity of machined components	
2.2.3.1 Surface integrity of AISI D2 cold work tool steel	
2.2.4 Mechanism of chip formation	
2.2.4.1 Chip formation during hard machining	
2.2.5 Formation of white layer in hard machining	
2.3 Overview of Different Heat Assisted machining Techniques	
2.3.1 Laser assisted machining (LAM)	

- 2.3.2 Plasma assisted machining (PAM)
- 2.3.3 Gas assisted machining (GAM)
- 2.3.4 Electrical heat assisted machining (EAM)
- 2.3.5 Induction heat assisted machining (IAM)
- 2.4 Modeling and optimization in metal cutting
 - 2.4.1 Process modeling in metal cutting
 - 2.4.1.1 Statistical regression technique
 - 2.4.2 Optimization process in metal cutting
 - 2.4.3 Response surface methodology (RSM)
 - 2.5 Summary

CHAPTER 3:

SETUP AND PROCEDURE

USED IN HEAT ASSISTED MACHINING

59

- 3.1 Introduction
- 3.2 Predictive Model Development Procedures
 - 3.2.1 Postulation of predictive model for room temperature machining and design of experiments
 - 3.2.2 Postulation of predictive model postulation for preheated machining and design of experiment
- 3.3 Experimental and measurement procedures
 - 3.3.1 Method of temperature control
 - 3.3.2 Surface roughness and vibration
 - 3.3.3 Tool wear and tool life measurement
 - 3.3.4 Study of chips morphology
 - 3.3.5 Measurement of sub-surface workpiece microhardness

CHAPTER 4:

MATHEMATICAL MODELING

FOR DIFFERENT CUTTING CONDITIONS

77

- 4.1 Introduction
- 4.2 Organization of data on input parameters and responses
- 4.3 Model development and checking of adequacy
- 4.4 Mathematical modeling of tool life
 - 4.4.1 Mathematical modeling for coated carbide tool life
 - 4.4.1.1 Modeling for coated carbide tool life under room temperature machining
 - 4.4.1.2 Modeling for coated carbide tool life under preheated machining
 - 4.4.2 Mathematical modeling for PCBN tool life
 - 4.4.2.1 Modeling for PCBN tool life under room temperature machining

- 4.4.2.2 Modeling for PCBN tool life under preheated machining
- 4.5 Mathematical modeling of surface roughness
 - 4.5.1 Modeling for surface roughness machined with coated carbide insert
 - 4.5.1.1 Modeling for surface roughness using coated carbide insert under room temperature
 - 4.5.1.2 Modeling for surface roughness using coated carbide insert under preheated condition
 - 4.5.2 Modeling for surface roughness machined with PCBN insert
 - 4.5.2.1 Modeling for surface roughness using PCBN insert under room temperature
 - 4.5.2.2 Modeling for surface roughness using PCBN insert under preheated condition
- 4.6 Multi-criteria (Tool life and Surface roughness) optimization
 - 4.6.1 Determination of optimum responses with coated carbide inserts
 - 4.6.2 Determination of optimum responses with PCBN inserts
- 4.7 Confirmation runs and verification of model
- 4.8 Summary

CHAPTER 5:

MACHINABILITY ANALYSIS

141

- 5.1 Introduction
- 5.2 Tool life and tool wear morphology
 - 5.2.1 Tool life and tool wear of coated carbide inserts
 - 5.2.2 Tool life and tool wear of PCBN inserts
- 5.3 Machined surface roughness
 - 5.3.1 Machined surface roughness of coated carbide inserts
 - 5.3.2 Machined surface roughness of PCBN inserts
- 5.4 Summary

CHAPTER 6:

CHATTER & VIBRATION, SURFACE INTEGRITY AND CHIP FORMATION

179

- 6.1 Introduction
- 6.2 Chatter & vibration
 - 6.2.1 Chatter and vibration of coated carbide inserts
 - 6.2.2 Chatter and vibration of PCBN inserts
- 6.3 Machined surface integrity
 - 6.3.1 Alteration of microhardness in the sub-surface layers
 - 6.3.1.1 Alteration of microhardness in the case of coated
