# CONTENTS

## Preface

## **PART I: KEY ENABLERS FOR HIGH SPEED CUTTING**

### **Chapter One – New Tool Life Models in Turning Hardened Steel AISI 4340 under High Cutting Speed**

Erry Yulian Triblas Adesta<sup>1</sup> and Muataz Al Hazza<sup>2</sup>  
 1, 2. Faculty of Engineering – International Islamic University Malaysia  
 ☐✉ : eadesta@iium.edu.my / ☐✉ : mutaz\_hazaa@yahoo.com

1.1. Introduction.....	3
1.2. Experimental Work.....	4
1.3. Box-Behnken Design .....	5
1.4. Artificial Intelligent Model .....	10
1.5. Tool life models validation .....	12
1.6. Conclusion .....	14

## References

### **Chapter Two – High Speed End Milling in Mould and Die Making**

Mohammad Yuhan Suprianto<sup>1</sup> and Erry Yulian Triblas Adesta<sup>2</sup>  
 1, 2. Faculty of Engineering – International Islamic University Malaysia  
 ☐✉ : yuhan.suprianto@gmail.com / ☐✉ : cadesta@iium.edu.my

2.1 Introduction.....	17
2.2 The Advantages and Disadvantages of High Speed Machining .....	18
2.3 High Speed Milling Characteristics .....	23
2.4 High Speed Hard Milling .....	25
2.5 Limitations .....	26
2.6 Conclusion .....	27

## References

## **Chapter Three – Development of Empirical Models for Surface Roughness during High Speed Turning for Hard Materials using Box-Behnken Design**

Mohammad Yuhan Suprianto<sup>1</sup> and Erry Yulian Triblas Adesta<sup>2</sup>  
 1, 2. Faculty of Engineering – International Islamic University Malaysia  
 ☐✉ : yuhan.suprianto@gmail.com / ☐✉ : eadesta@iium.edu.my

---

3.1	Introduction.....	31
3.2	Box-Behnken Design .....	32
3.3	Experimental Design .....	34
3.4	Result and Discussion .....	36
3.5	Conclusion .....	38

### References

## **PART II: MOVING TOWARDS HIGH SPEED CUTTING**

---

## **Chapter Four – Surface Roughness Prediction Model of Hardened AISI H13 in High Speed End Milling Operation**

Afifah Mohd Ali<sup>1</sup> and Muhammad Riza<sup>2</sup>  
 1,2. Kulliyyah of Engineering, International Islamic University Malaysia  
 ☐✉ : sakisakura@gmail.com / ☐✉ : muhammadriza@yahoo.com

---

4.1	Introduction .....	41
4.2	Concept of High Speed Machining (HSM).....	42
4.3	Advantages of HSM .....	43
4.4	Prediction of Surface Roughness Modelling In HSM .....	44
4.4.1	Approaches in Designing the Prediction of Surface Roughness .....	44
4.4.2	Response Surface Methodology (RSM) .....	45
4.5	Experimental Setup .....	46
4.5.1	Design of Experiments .....	46
4.5.2	Workpiece Materials .....	47
4.5.3	Cutting Tools .....	48
4.5.4	Workpiece Measurement .....	48

4.6 Results and Analysis .....	49
4.6.1 Surface Roughness Prediction Model .....	49
4.6.2 Sequential Model Sum of Squares.....	49
4.6.3 Lack of Fit .....	50
4.6.4 Analysis of Variance (ANOVA) .....	51
4.6.5 Diagnose of the Statistical Properties of the Model .....	52
4.6.6 Surface Roughness Prediction Model Equation .....	52
4.6.7 Surface Roughness Prediction Model Graph .....	54
4.7 Conclusion .....	57

## References

# **Chapter Five – Sample Preparation on Ceramics Composite for Cutting Tools in High Speed Machining**

A.G.E. Sutjipto<sup>1</sup>, A. Kaderi<sup>2</sup>  
 1,2, Kulliyah of Engineering, International Islamic University Malaysia  
 ✉ : agus@iium.edu.my

---

5.1 Introduction .....	61
5.2 Methodology .....	63
5.2.1 Materials .....	63
5.2.2 Experimental Procedures .....	64
5.2.2.1 Powder Preparation .....	64
5.2.2.2 Preparing the Green Body .....	65
5.2.2.3 From Green Body To Sintered Body .....	65
5.3 Results and Discussion .....	67
5.3.1 Sintered Body Image .....	67
5.3.1.1 Sintered for 2 hours at T = 1500 °C, P = 25 000 psi .....	67
5.3.1.2 Sintered for 4 hours at T = 1500 °C, P = 25 000 psi .....	69
5.3.2 Scanning Electron Microscopy Image .....	71
5.3.2.1 Powder Used .....	71
5.3.2.2 Sample HIPed both for 2 hours and 4 hours .....	73
5.3.3. Comparison with Theoretical Density .....	75
5.3.4. Microhardness Measurements .....	77

5.4 Conclusion .....	78
----------------------	----

# **Chapter Six – Influence of Backcutting Phenomena to Surface Roughness of Hardened AISI H13 during High Speed End Milling Process**

Afifah Mohd Ali<sup>1</sup> and Erry Yulian Triblas Adesta<sup>2</sup>  
 Kulliyyah of Engineering, International Islamic University Malaysia  
 : sakisakura@gmail.com /  : eadesta@iium.edu.my

---

6.1 Introduction .....	81
6.2 Concept of High Speed Machining .....	82
6.3 High Speed End Milling .....	82
6.4 Backcutting Phenomena .....	83
6.5 Experimental Setup .....	85
6.5.1 Design of Experiments.....	85
6.5.2 Workpiece Material .....	86
6.5.3 Cutting Tools .....	87
6.5.4 Surface Roughness Measurements .....	87
6.6 Influence of backcutting on surface roughness (Ra & Rt) .....	88
6.7 Conclusion .....	91

## References

## **Chapter Seven –Experimental Investigations in High-Speed Hard Turning of AISI 4340 Steel Using Mixed Ceramic**

Muataz Al Hazza<sup>1</sup> and Erry Yulian Triblas Adesta<sup>2</sup>  
 1, 2. Faculty of Engineering – International Islamic University Malaysia  
 ☐ : mutaz\_hazaa@yahoo.com / ☐ : eadesta@iium.edu.my

---

7.1	Introduction .....	93
7.2	Experimental Design .....	94
7.2.1	Average of Surface Roughness Measurements .....	94
7.2.2	Cutting and Feeding Forces Measurements .....	94
7.2.3	Flank Wear Length Measurement .....	95
7.3	Result and Discussion.....	95
7.3.1	Average Surface Roughness .....	95
7.3.2	Cutting and Feeding Forces .....	97
7.3.3	Flank Wear Length .....	98
7.4	Conclusion.....	99

## **PART III: IMPROVED PERFORMANCE OF HIGH SPEED CUTTING**

---

## **Chapter Eight – Coating For High Speed Cutting Tools**

Suryanto  
 Kulliyyah of Engineering, International Islamic University Malaysia  
 ☐ : surya@iium.edu.my

---

8.1	Introduction .....	103
8.2	Cutting Tool – Workpiece Interaction .....	104
8.3	Important Properties of Coating .....	106
8.4	Type of coatings .....	108
8.4.1	Single layer single component coatings .....	108
8.4.1.1	Nitride Coating .....	108
8.4.1.2	Carbide Coatings.....	112
8.4.1.3	Boride coatings .....	114

8.4.1.4 Oxide coatings .....	115
8.4.1.5 Diamond coatings .....	116
8.4.1.6 Diamond-like Coatings .....	118
8.4.2 Single Layer Multicomponent coatings .....	120
8.4.2.1. Single Layer - Gradient Coatings .....	121
8.4.3. Multilayer coatings .....	121
8.5 Conclusion .....	122

### 9.1 Introduction

Cost becomes the major driver in most manufacturing fields and the most influential factor in the outcome of product, process or service within today's industries (Roy, 2003). It is the sum of money expended in terms of labor, materials and use of equipment to produce a product or service (Layer et al., 2002).

In that case, machining costs is the resources that are necessary to perform machining activities and it is related. The resources in machining are not only the tools but also operators, energy and materials.

Costs are classified in many different ways. One of the ways to classify them is variable costs or fixed costs. The variable cost elements are; work piece material, direct labor, energy and all the costs that depend on production rate or time consuming. Fixed costs are those elements of output cost which are a function of the annual production volume.

Other criteria of classification are direct and indirect cost. The direct cost is one which can be allocated to a specific part while the indirect costs cannot be allocated to a specific part (Jong, 2000).

Cost has other types of classification, these types are; recurring and non-recurring (Stewart, 1995). Recurring costs occur on a day to day basis and are also called operating costs while the nonrecurring costs are basically start-up costs and are independent of the production rate.

However, all the cost classification methods are in the bases of variable - fixed costs and direct - indirect costs. These costs are going up or down depend on what we call the cost drivers.
