Table of Content

Chapter 1		Page
Amorphous Coating of Iron Nickel Alloy		1
		Suryanto
Chapter 2		
Characterization of Electroplated Nanocrystalline NiFe Alloy Films		7
	Yusrini Marita and Iskandar I. Yaacob	
Chapter 3		
Corrosion Behavior of Zinc in Potassium Hydroxide Aqueous Solution		13
		Suryanto
Chapter 4		
Development of Carbon Doped TiO ₂ Photocatalyst for Pigment Degradation		19
	Muh Rafiq Mirza Julaihi, Asep Sofwan Faturohman Alqap and Iis Sopyan	
Chapter 5		
Dynamic Mechanical Analysis of Carbon Fibre Composites		25
	Hazleen Anuar, Sahrim Hj. Ahmad and Rozaidi Rasid	
Chapter 6		
Effect of Composition on Phase Transformation of Iron-Platinum Nanoparticles		31
	Koay Mei Hyeie and Iskandar I. Yaacob	
Chapter 7		
Effect of Nanosized Alumina Reinforcement in Intermetallic Nickel Aluminide on the Formation of γ' Precipitates		37
	Roslina Ismail and Iskandar I. Yaacob	
Chapter 8		
Effect of Sintering Temperature on Protein Foaming-consolidation Porous Alumina-tricalcium Phosphate Composites		43
	Ahmad Fadli and Iis Sopyan	
Chapter 9		
Electrical Property of ITO Thin Film Deposited by Rf Magnetron Sputtering		49
	Agus Geter Edy Sutjipto, Nurul Hajar and Farah Diana	
Chapter 10		
Electrochemical Study of Zinc Selenide Thin Films Prepared for Photovoltaic Applications		55
	Souad. A. Mohamad, A. K. Arof	
Chapter 11		
Electrodeposited CdS / CdTe Solar Cells		61
	Souad. A. Mohamad	
Chapter 12		
Fabrication of Biomass Pellet from Mesocarp Fiber		65
	Zahurin Halim and Nurshazana Mohamad	
Chapter 13		
Fabrication of Kenaf Sandwich Panel		68
	Siti Khadijah Abdul Rahman and Zahurin Halim	

Chapter 14		
Foam Impregnation Method for Artificial Bone Graft Application		78
: Study on the Effect of Drying Time	Fariza Abdul Rahman and Zuraida Ahmad	
Chapter 15		
Foam Impregnation Method for Artificial Bone Graft Application		84
: Study on the Effect of Sintering Temperature	Zuraida Ahmad and Fariza Abdul Rahman	
Chapter 16		
FTIR Analysis - Aluminium Hydroxide Treated with Silane Coupling Agent		89
	Noorasikin Samat, Nor Suhaila Nor Saidi and Muhammad Saffuan Sahat	
Chapter 17		
Inorganic / Organic /Inorganic Double Junction Thin Film Solar Cells		92
	Souad. A. Mohamad	
Chapter 18		
Investigation on The Effect of Ultra Violet on Cotton Albumen Composite		96
	Zahurin Halim , Zuraida Ahmad and Fauziah Md Yusof	
Chapter 19		
Measurement of Oxygen Permeability in Bulk Alloys by Internal Oxidation of Dilute Constituent		100
	Mohd Hanafi Bin Ani and Raihan Othman	
Chapter 20		
Natural Dye Coated Nanocrystalline Tio ₂ Electrode Films for DSSCs		106
	Souad. A. Mohamad and Iraj Alaci	
Chapter 21		
Normal Deposition to Anomalous Deposition		109
	Suryanto	
Chapter 22		
Polymer Clay Nanocomposites: Part II- Synthesis of Polymer Nanocomposites		115
	Noor Azlina Hassan, Norita Hassan	
Chapter 23		
Production of Porous Calcium Phosphate Ceramics through Polymeric Sponge Method		120
	Asep Sofwan Faturohman Alqap, Nur Ain Rakman, and Iis Sopyan	
Chapter 24		
Silicone Doped Calcium Phosphate Powder Synthesized via Hydrothermal Method		126
	Asep Sofwan Faturohman Alqap, Iis Sopyan and Zuria Farhana Kushaili	
Chapter 25		
Stress Analysis of Backend Metallization		132
	Iskandar I. Yaacob and Goh Chia Lan	
Chapter 26		
Study on Metal Removing from Alumina Ceramics		137
	Agus Geter Edy Sutjipto and Muhyiddin Bin Budah@Udah	

Chapter 27		
Surface Quality of <i>Dipterocarpus Spp</i> under Tropical Climate Change: Effect of Pre-Weathering		146
	Mohd Khairun Anwar Uyup, Hamid Hamdan, Paridah Mat Tahir, Hazleen Anuar, Noorasikin Samat, Siti Rafidah Mohamed	
Chapter 28		
Surface Topography of Sulphuric Treated Carbon Fibre		151
	Hazleen Anuar, Sahrim Hj. Ahmad and Rozaidi Rasid	
Chapter 29		
Synthesis and Characterization of Electrodeposited Iron-Platinum Nanostructured Thin Films		157
	Seoh Hian Teh and Iskandar I. Yaacob	
Chapter 30		
Synthesis of Magnetic Nanoparticles in Water-in-Oil Microemulsions		164
	Iskandar I. Yaacob	
Chapter 31		
The Effect of R-ratio on Fatigue Crack Propagation in Plasticised PVC and Modified PVC		170
	Noorasikin Samat, Alan Whittle and Mark Hoffman	
Chapter 32		
The Effect of R-ratio on Fatigue Crack Propagation in Un-plasticized PVC and Modified PVC		175
	Noorasikin Samat, Alan Whittle and Mark Hoffman	
Chapter 33		
Thin Film of Indium Tin Oxide and Its Deposition Technology Deposition		180
	Agus Geter Edy Sutjipto, Sugrib Kumar Shaha	
Chapter 34		
X-ray Photoelectron Studies on the Surface Chemical States of Yttria-Stabilized Zirconia Thin Film in Aqueous Acid Hydrofluoric		186
	Sukreen Hana Herman, Mohd Hanafi Ani, and Susumu Horita	
Chapter 35

Keywords: Corrosion, Zinc, Potassium hydroxide.

Abstract. The corrosion properties of zinc metal in aqueous potassium hydroxide (KOH) electrolyte have been studied. A three corrosion cell configuration was employed. A zinc foil of 99% purity and 1.15 mm in diameter was used as the working electrode. A nickel — plated mesh was used as the counter electrode. The reference electrode was Hg/HgO system. The concentration of aqueous KOH was varied from 1 M to 7 M. Surface roughness measurement and metallographic observation was also performed to support the corrosion rate data. The investigation shows that corrosion rate of zinc increases accordingly from 1M to 7M but the increasing rate is slower at 5M and above. Impedance measurement of KOH solution was also performed.

Introduction

Corrosion is commonly known as rust, an undesirable phenomena which destroys the luster and beauty of objects and shortens their life. Since ancient times, corrosion has affected not only the quality of daily lives of people, but also their technical progress. Corrosion is a natural and costly process. Whereas we can be only a silent spectator to the above process of destruction, corrosion can be prevented or at least controlled [1]. So, in order to control corrosion, we have to know the corrosion rates and all related information regarding the material and the process involved.

Corrosion can be defined in many ways. Some definitions are very narrow and deal with a specific form of corrosions, while others are quite broad and cover many forms of corrosion. The general definition of corrode is to eat into or wear away gradually. Corrosion can be defined as a chemical or electrochemical reaction between a material, usually a metal, and its environment that produces a deterioration of the material and its properties.

The environment consists of entire surrounding in contact with the material. The primary factors to describe the environment are the physical state (either in gas, liquid or solid), chemical compositions (constituents and concentrations) and temperature. Other factors can be the relative velocity of a solution (because of flow or agitation) and mechanical loads on the material, including residual stress within the material. When corrosion is discussed, it is important to think of a combination of a material and an environment. The corrosion behavior of a material cannot be described unless the environment in which the material is to be exposed is identified. Similarly, the aggressiveness of an environment cannot be described unless the material that is to be exposed to that environment is identified. In simple ways, we can say that the corrosion behavior of a material depends on the
