Communication Technology, International Islamic University Malaysia,
Malaysia

ABSTRACT

According to the report, the school resource centre was not heavily used by the students. We aimed to study the students' preferences on SRC and the usage level of SRC in the school. From data analyzed using SPSS, we found less than fifty percent of the students visited the school resource centre once or twice weekly. Most of these students who visited the school resource centre are residing in the hostel, sixty five percent of them. The main reason for visiting the school resource centre is not academically based but rather leisure based. More than sixty percent of the students visited the school resource centre because of leisure reading.

23.1 INTRODUCTION

In our survey, 9 questions regarding the resource centre usage were posed. The information was crucial to identify the pattern of the school resource centre usage among the students. The data collected has not only answered one of the research questions, in fact, it was also relevant in providing clearer picture that leads towards the students' perceptions of their school resource centre quality.

Our results on the frequency of visit, purpose of visit, materials used,
