Preface

Part I Pure Mathematics Concentration

Chapter 1	THE BEHAVIOR OF TRAJECTORY OF ξ^s QUADRATIC STOCHASTIC OPERATIONS	2
Chapter 2	THEORY OF MARKOV CHAINS IN PEDIATRIC DISEASES	8
Chapter 3	ON NONLINEAR DYNAMIC SYSTEMS ARISING IN POTTS MODEL	14
Chapter 4	THE FIRST RETURN TIME AND DIMENSION	22
Chapter 5	ON AS SOCIATIVE ALGEBRAIC STRUCTURE OF GENETIC INHERITANCE	31
Chapter 6	INTERACTING PARTICLE SYSTEM	37
Chapter 7	DYNAMICS OF GENERALIZED LOGISTIC MAPS	43
Chapter 8	GEOMETRIC BROWNIAN MOTION AND CALCULATION OF OPTION PREMIUM IN BLACK-SCHOLES MODEL	50
Chapter 9	ON THE ELEMENTARY CHARACTERIZATION OF PRIMES IN PRIMALITY TESTS: TWO SHORT STUDIES.	57
Chapter 10	ON ASSOCIATIVE ALGEBRAIC STRUCTURE OF GENETIC INHERITANCE	64
Chapter 11	SOME APPLICATION OF ERGODIC THEORY IN NUMBER THEORY	70
Chapter 12	STUDY OF ROLES OF EXTERNAL MAGNETIC FIELD ON ISING AND POTTS MODEL	76
Chapter 13	INVESTIGATION OF STABILITY OF FIXED POINTS OF NONLINEAR DISCRETE DYNAMICAL SYSTEMS	82
Chapter 14	MARKOV CHAINS AND ITS APPLICATION: THE INVENTORY MODEL	90
Chapter 15	PHASE TRANSITION FOR ISING MODEL WITH TWO COMPETING INTERACTION ON CAYLEY TREE OF ORDER 4	96
Chapter 16	LIMIT BEHAVIOR OF DYNAMIC SYSTEMS CORRESPONDING TO LATTICE MODELS WITH COMPETING PROLONGED AND ONE-LEVEL BINARY INTERACTIONS	101
Chapter 17	ASSOCIATIVE ALGEBRA IN GENETIC INHERITANCE	109
Chapter 18	ON ξ^a -QUADRATIC STOCHASTIC OPERATORS AND THEIR CLASSIFICATIONS	115

Part II Finance Mathematics Concentration

Chapter 19	ANALYZING THE PERFORMANCE OF INVESTMENT STRATEGY OF EPF	123
Chapter 20	PREDICTION OF STOCK PRICE USING NEURAL NETWORK	130
Chapter 21	COMPARISON BETWEEN CONVENTIONAL AND ISLAMIC BOND IN MALAYSIA	136
Chapter 22	STOCK PERFORMANCE ANALYSIS BETWEEN MALAYSIAN AIRLINES SYSTEM BERHAD AND AIRASIA BERHAD	144
Chapter 23	ISLAMIC PAWNBROKING (AR-RAHNU) AS A MICRO CREDIT INSTRUMENT IN MALAYSIA	151
Chapter 24	ANALYSIS OF CRUDE PALM OIL FUTURES PRICES TRADED ON BURSA MALAYSIA	160
Chapter 25	AN EMPIRICAL STUDY ON THE EFFICIENCY OF THE TRIM AND FILL METHOD IN CORRECTING PUBLICATION BIAS IN META ANALYSIS	166
Chapter 26	PERFORMANCE ANALYSIS OF INSURANCE AND TAKAFUL INDUSTRIES IN MALAYSIA	171
Chapter 27	ANALYSIS OF DATA USING MULTILEVEL MODELLING WITH MLwiN	179
Chapter 28	FINANCIAL PERFORMANCE OF ISLAMIC BANKING AND CONVENTIONAL BANKING IN MALAYSIA	186
Chapter 29	A STUDY ON THE EFFECT OF PUBLICATION BIAS IN META ANALYSIS	194
Chapter 30	RATIO ANALYSIS: BANK ISLAM MALAYSIA BERHAD (BIMB) & MALAYAN BANKING BERHAD (MAYBANK)	201
Chapter 31	AN ANALYSIS OF MALAYSIAN UNIT TRUST FUNDS: ISLAMIC VS CONVENTIONAL	207

Part III Optics Concentration

Chapter 32	QUANTUM TRAJECTORY METHOD USING MPI PARALLEL COMPUTING	214
Chapter 33	LINEAR WAVE PROPAGATION IN SINGLE MODE OPTICAL FIBRE	220
Chapter 34	THE OPTICAL RAY TRACING TECHNIQUE IN LENS SYSTEM WITHIN AND BEYOND PARAXIAL APPROXIMATION	226
Chapter 35	WAVE PROPAGATION IN NONLINEAR AND HOMOGENEOUS MEDIA: KERR MEDIA	234
Chapter 36	MATRIX METHODS OF OPTICAL RESONATORS	240

SOME APPLICATION OF ERGODIC THEORY IN NUMBER THEORY

Mohd Hirzie Mohd Rodzhan
Prof. Dr. Nasir Ganikhodjaev

Abstract. For a given sequence, $\{a^n\}$ where $\forall a \in \mathbb{N} \setminus \{1, 10, 10^2, 10^3, \dots\}$, distribution of first digit (DFD) could be calculated from this sequence. In this project, as $n \rightarrow \infty$, DFD for this sequence will be formulate and proven by applying definition of Uniform Distribution Modulo One. In addition, this distribution confirms Benford's distribution of first digit or well known as Benford's Law.

1 Introduction of Benford's Law

First Digit Law, well-known as Benford's Law was introduced by Frank Benford, an American physicist in 1936. In a certain paper, this law has been called as Newcomb-Benford's Law, since the law had been discovered by Simon Newcomb (1881). Simon Newcomb, an astronomer published a 2-page article in the American Journal of Mathematics describing his observation of books of logarithms (using for the calculations at that time) in the library', at the earlier pages, numbers starting with 1 much more than other numbers and numbers starting with 9 is less.

He inferred that researchers, mathematicians, biologists, sociologists as well as physicists, were looking up numbers starting with 1 much more often than numbers starting with 2, then numbers starting with 2 much more often than numbers starting with 3 and so on' This led him to conclude that the probability that a number has first significant digit, d ($1 \leq d \leq 9$) is $\text{Prob}(d) = \log_{10}(1 + 1/d)$. In addition, Newcomb's conjecture stated that the first digit is 1 about 30.1% of the time and 9 is only about 4.6% of the time.

The proposed law was discovered again by Frank Benford (1938). He provided empirical evidence by analyzing the frequency of significant digits from twenty different tables including such diverse data such as surface areas of 355 rivers, specific heat of thousands of chemical compounds and square-root tables.

In more interesting cases, Benford's law has been applied in real life applications. Some applications of Benford's Law had been discussed by Schatte (1988). He had mentioned on how Benford's law contributes in the development of computer science. The computer design that minimizes expected storage space is base 8 and other researchers have started exploring the use of logarithm computers to speed up calculations. In other paper published by Hill (1995) suggested Benford's law could be as test of reasonableness of forecasts of a proposed model. Furthermore, Nigrini (1999) had mentioned in his paper that Benford's law could be used to test the accuracy of measuring equipment.

1.1 Distribution of First Digit (DFD), r , ($r = 1, 2, \dots, 9$)
