Table of Content

PREFACE.....	v
EDITOR.....	vi
SECTION 1: INTELLIGENT CONTROL SYSTEM	5
Chapter 1	6
Working Principle and Operating Mode of Atomic Force Microscopy Iskandar Al-Thani Mahmood	
Chapter 2	13
Design and Development of controller of Active Power Filter for Industrial Usage part 1 M.M.Rashid ¹ , N.A.Ramin ² and Zahurul ²	
Chapter 3	21
Design and Development of controller of Active Power Filter for Industrial Usage part 2 M.M.Rashid ¹ , N.A.Ramin ² and Zahurul ²	
Chapter 4	30
Design and Implementation of Instant Noodles Vending Machine M.M.Rashid	
Chapter 5	39
Development of Intelligent Belt Conveyor System (Part 1) M. M. Rashid, Faruok Alliays	
Chapter 6	45
Development of Intelligent Belt Conveyor System M.M.Rashid, Faruk, M J E Salami	
Chapter 7	50
Anti Skid Control System, A Tutorial M. J. E. Salami, A. M. Aibinu, A. F. Salami and Mohd Sofian Bin Basrah	
Chapter 8	54
Design and Prototyping of Inertia Wheel W. Astuti, A. R. Kasim, M. I. Solihin, A.M. Aibinu, Momoh Jimoh E.Salami and Wahyudi	
Chapter 9	62
Control of Automatic Drilling Machine by PLC Md Mozasser Rahman, Najiah Md Zain @Abdul Rahman and Mohd Syazwan Bin Jamil	
Chapter 10	74
Automatic Storage and Retrieval System Abdul Kadir Abdul Jabar Abdul Kadir, M. J. E. Salami and A. M. Aibinu	
Chapter 11	80
Control of Unmanned Underwater Vehicle Raisuddin Khan ^{1,a} , Faried Hasbullah ^{2,b} and Masum Billah ^{3,c}	
Chapter 12	85

Adaptive Sliding Mode Control for 3dof Helicopter	
Mostafa A. Hamood ^a , Rini Akmeliaawati ^b	
Chapter 13	93
Backstepping Control of an Autonomous Quadrotor	
Norafizah Abas ¹ , Rini Akmeliaawati ²	
Chapter 14	103
Piezoelectric Tube Scanner in Atomic Force Microscope	
Iskandar Al-Thani Mahmood	
 SECTION II : INTELLIGENT CONTROL SYSTEM DESIGN	111
 Chapter 15	112
A Review on Control of Two-Wheeled Wheelchair System	
Salmiah Ahmad ^{1, a} , M. O. Tokhi ^{2,b}	
Chapter 16	121
A Smart Car Surveillance System using Programmable Logic Controller (PLC)	
Siti Fauziah Tohaa and Mohammad Zafran Haja Mohideen	
Chapter 17	128
Design of Controller for Elevator Group Using Fuzzy Logic Part 1	
M.M.Rashid, Azhar	
Chapter 18	133
Design of Controller for Elevator Group Using Fuzzy Logic Controller Part 2	
M.M.Rashid, Azhar	
Chapter 19	139
Fuzzy Logic-based Intelligent Control of Flexible Link Manipulator	
Ismaila B. Tijani and Rini Akmeliaawati	
Chapter 20	148
EEG based robot control	
A. Khorshidtalab and M. J. E. Salami	
Chapter 21	158
Visual-Based Intelligent Solar Tracking System	
Rini Akmeliaawati*, Samir A. Abdul Kareem, Riza Muhida	
 SECTION III: INTELLIGENT SYSTEM DESIGN	172
 Chapter 22	173
Intelligent Air-conditioning System	
Amir A. Shafie, Raisuddin Khan, H. Al-haieaid M. Ebrahim	
Chapter 23	179
An Intelligent Car Surveillance System: Design and Tools Selection	
Siti Fauziah Toha ³ and Mohammad Zafran Haja Mohideen	
Chapter 24	185
Automatic Pipe Bursting Monitoring System	
M. J. E Salami, Syed Ahmed @ Hla Moe Win	

Chapter 37	292
Kernel PCA – An Introduction	
Hamza Baali ^{1,a} , Momoh-Jimoh Eyiomika Salami ^{2,b} , Rini Akmeliawati ^{3,c}	
Chapter 38	297
System Modelling of a Twin rotor System: Time and Frequency Domain Analysis	
Siti Fauziah Toha ^{1,a} and M. O. Tokhi ^{2,b}	
Chapter 39	304
System Identification Technique for a Helicopter Using Genetic Algorithms	
Siti Fauziah Toha ^{1,a} and M. O. Tokhi ^{2,b}	
Chapter 40	311
Advanced Noise Removal Techniques for the Detection of EMG Signal	
Md. Rezwanul Ahsan ^{1,a} , Muhammad Ibn Ibrahimy ^{2,b} and Othman Omran Khalifa ^{3,c}	
Chapter 41	322
Active suspension system: Part 1 - Mathematical Modelling	
Aiman O. Bajaber ^a , Asan G. A. Muthalif ^b , Ayman S.I. Elzubair ^c	
Chapter 42	327
Active Suspension System: Part 2 - Controller Design and Simulation	
Ayman S.I. Elzubair ^a , Asan G. A. Muthalif ^b , Aiman O. Bajaber ^c	
Chapter 43	332
Book Shelving Robotics	
M. J. E. Salami ^{1,a} , Mohd Farid Md Alias ^{2,b} , Nurul Izzah Sidek ^{3,c} , Mohamed Mousa ^{4,d}	
Chapter 44	337
Model Structure and Random Input for System Identification Technique for Flexible Manipulating System	
Siti Fauziah Toha ^{1,a} and M. O. Tokhi ^{2,b}	
Chapter 45	344
Fault Tree Analysis, A case study of a simple Line Following Robot	
Abiodun Musa Aibinu, Haaris Ahmad Quadri, Mu Ham Mach A Mine, Almehmadi Tarig Saeed S . And Hamide Rohimah	
Chapter 46	351
Review of Malaysian Traffic Summon and Payment system	
A. M. Aibinu, Sharifah Nadiah bt Syed Mohammad, Wan Nur Faezah bin Wan Azmi	

Chapter 9

Control of Automatic Drilling Machine by PLC

Md Mozasser Rahman, Najiah Md Zain @Abdul Rahman and Mohd Syazwan Bin Jamil

Department of Mechatronics Engineering, IIUM, Malaysia

9.1 Introduction

In this massive development era, world's manufacturing industry nurtured rapidly to compensate the demand of quality product in shorter time of production. Narrowing down the case to Malaysia, where the manufacturing industry has grown fast from manual factory operation to partial automation of factory operation and now is in stage of implementing fully automation in factory operation. Having a large population of 30 million and pursuing to be a modern developing industrial country by year 2020, Malaysia has become one of the most preferred places for factory establishment. Therefore automation of machines such as drilling, milling, welding and assembling will make production faster and flexible.

Control engineering has evolved over a long period. Most recently, electricity is utilized for control and the early electrical control was based on the relays because they allow power to be switched on and off without the present of mechanical switches. As the computer industry grown, it brought into the manufacturing industry the most practical logic control decision device, the Programmable Logic Controller (PLC).

The biggest force to the fast change in factory operations is the use of PLC in autonomous machine operation. The researchers report in many articles that using PLC in controlling machines such as drilling, milling and welding machine has made mass production of various types of products easier and more flexible because those machines do not have to be re-hard-wired in order to change the production from a particular type of product to another type (Onwobulu et.al, 2002). The change can be done by only reprogramming the PLC programming which is among the most uncomplicated and most comprehensible programming to master.

Most of the drilling machines in small or medium workshop are semi-automatic where the quill feed is automatically powered but, the position of holes must be oriented manually for drilling action. Some of the machines are even still manually operated where the drill bit must be fed to the work piece manually and the same action goes for positioning of holes to be drilled.

In order to drill multiple holes for a large number of work pieces, an automatic drilling machine with automatic clamer and controlled by a controller becomes essential. The repetitive tasks like loading the work piece, positioning the target holes and pressing the quill lever become tedious jobs and are prone to careless mistakes. Therefore, the drilling job needs to be automated to achieve better accuracy and productivity.

Basically, the project is to design automation operation for drilling mass similar type of part at one time. There are two fields involved in this project: Mechanical and Electrical and Control Systems. The mechanical part consists of drilling machine itself and clamping
