CONTENTS

Editorial Notes.....	v
About the Editors.....	vi
Contents.....	vii
1. A Brief Overview of Biomechatronics and Its Applications.....	1
<i>Nur Izatulnisha A.Rashid, Jamaliah Kassim and Asan G. A. Muthalif</i>	
2. Self-Powered Solar Tracking System Part 1: System Modeling and Hardware Selections.....	7
<i>Asan G. A. Muthalif, Dzairul Hafiz and Haris Shafiq</i>	
3. Self-Powered Solar Tracking System Part 2: System Design.....	14
<i>Asan G.A. Muthalif, Dzairul Hafiz and Haris Shafiq</i>	
4. Self-Powered Solar Tracking System Part 3: System Integration and Testing.....	19
<i>Asan G.A. Muthalif, Dzairul Hafiz and Haris Shafiq</i>	
5. Smart System For Monitoring Electrical Power Usage at Homes.....	25
<i>Kawthar A. Rahman, Asan G. A. Muthalif and Nurul F. Shua'ib</i>	
6. Vibration Based Predictive Maintenance: Common Rotating Machinery Faults and Their Signatures.....	30
<i>Siti F. Mansor, Asan G. A. Muthalif and Nurul 'I. Zaman</i>	
7. Modeling of Disc Rotor Induction Motor	38

<i>M. M. Rashid, S. Abubakar and R. Tamjis</i>	
8. Computer Communication for a Smart Card Based Ordering System Via Visual Basic	52
<i>Siti Fauziah Toha and Rosdiazli Ibrahim</i>	
9. Electronic Smart Ordering System: Graphical User Interface	59
<i>Siti Fauziah Toha and Rosdiazli Ibrahim</i>	
10. Intruder Avoidance System Via Short Message Service (SMS)	65
<i>Siti Fauziah Toha and Mohammad Zafran Haja Mohideen</i>	
11. Anti Skid Control System, A Tutorial	71
<i>M. J. E. Salami, R. Khan, A.M. Aibinu, Syahrul Syazanizam Bin Md Said and Mohd Sofian Bin Basrah</i>	
12. Intelligent Anti Skid Control System	75
<i>M. J. E. Salami, R. Khan, A.M. Aibinu, Syahrul Syazanizam Bin Md Said and Mohd Sofian Bin Basrah</i>	
13. Principles of FMCW Radar Signal Processing	91
<i>Wahju Sediono and Andrian Andaya Lestari</i>	
14. Design and Implementation of a Simple Queueing System for Vehicle Traffic Simulator	99
<i>Wahju Sediono</i>	
15. Determination of Target Speed from the FMCW Radar Data	107
<i>Wahju Sediono and Andrian Andaya Lestari</i>	
16. Intelligent Egg Incubator: Introduction	116
<i>Shahrul Na'im Sidek, Yasir Mohd Mustafah, Urwah Ismail, Nur Hasnaa Che Awang</i>	
17. Intelligent Egg Incubator: Mechanical Design	125

Shahrul Na'im Sidek, Yasir Mohd Mustafah, Urwah Ismail, Nur Hasnaa Che Awang

18. Intelligent Egg Incubator: System Integration And Results.....	137
<i>Shahrul Na'im Sidek, Yasir Mohd Mustafah, Urwah Ismail, Nur Hasnaa Che Awang</i>	
19. Human Posture Recognition Classification And Recognition.....	157
<i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i>	
20. Human Posture Recognition Preprocessing Techniques.....	162
<i>Othman O. Khalifa, Kyaw Kyaw Htike, Lai Weng Kin and A. Albagoul</i>	
21. Path Detection Implementation Using Fuzzy Classifier	171
<i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i>	
22. Mechanical Design Of Unmanned Underwater Vehicle	180
<i>Md. Raisuddin Khan, M. Zuhdi and Masum Billah</i>	
23. Design And Development Of An Automated Café System.....	187
<i>Md. Raisuddin Khan, MAS Kamal and Masum Billah</i>	
24. Speech Coding Using Compressive Sensing On A Multicore System	194
<i>T.S. Gunawan, Othman O. Khalifa, A. A. Shafie and E. Ambikairajah</i>	
25. A Case For Cooperative Vision System.....	202
<i>A. A. Shafie and N. Samudin</i>	
26. Path Following Autonomous Vehicle Based On Vision System.....	208
<i>A. A. Shafie, E. A. Syukur and N. I. Sidek</i>	
27. Trajectory Planning Using Gps For Unmanned Aerial Vehicle With Microcontroller Based System	215
<i>A. A. Shafie, Md. Raisuddin Khan and M Shehzad Islam</i>	

28. Digital Hearing Aids Analysis And Implementation.....	224
<i>Othman O. Khalifa, Aisha H. Abdalla and Sheroz Khan</i>	
29. Automatic Intelligent Ordering System: Design And Tools Selection	233
<i>Siti Fauziah Toha and Rosdiazli Ibrahim</i>	
30. Automatic Smart Card Purchasing System for Express Kiosk.....	240
<i>Siti Fauziah Toha and Rosdiazli Ibrahim</i>	
31. Finite Element Formulation of Piezoelectric Laminated Composite Plate	247
<i>Iskandar Al-Thani Mahmood and Md. Raisuddin Khan</i>	
32. A Review on Modeling And Shape Control Of Piezoelectric Laminated Composite Plate Using Finite Element Method.....	257
<i>Iskandar Al-Thani Mahmood and Md. Raisuddin Khan</i>	
33. Development of Auto Parking System & Auto Billing System Using Image Processing Technique (Part 1).....	267
<i>M. M. Rashid</i>	
34. Development of Auto Parking System and Auto Billing System Using Image Processing Technique (Part 2)	274
<i>M. M. Rashid</i>	
35. Development of Auto Parking System& Auto Billing System Using Image Processing Technique (Part 3).....	281
<i>M. M. Rashid</i>	
36. Automatic Car Parking Management System for Large Parking Lot.....	289
<i>M. M. Rashid</i>	
37. Development of Wireless Home Power Monitoring System	296
<i>M. M. Rashid</i>	

CHAPTER 17

INTELLIGENT EGG INCUBATOR: MECHANICAL DESIGN

^aShahrul Na'im Sidek, ^bYasir Mohd Mustafah, Urwah Ismail, and Nur Hasnaa Che Awang,
Department of Mechatronics Engineering
Kulliyyah of Engineering, International Islamic University Malaysia

17.1 Introduction

In the previous chapter, some introduction to the egg incubator system was presented. This chapter will look into the details of the design of an egg incubator system and the proposed mechanical design of our incubator system. Knowing the design is important in designing a better and more intelligent egg incubator. Firstly, it is important to know the basic system requirement for the eggs incubator. From the previous chapter, it is highlighted that an egg incubator should be able in maintaining the temperature and the humidity within the incubator to let the egg in an ideal condition to be hatched. Moreover, the eggs also need to be turned daily in order to ensure that the eggs embryo will grow up healthy. Moreover, we also need to ensure the egg incubator have a good ventilation during the incubation. There also some different conditions that needs to be fulfilled whenever the eggs get older depending on the stages of their development.

17.2 Incubating conditions

In order to get good result of hatching the eggs, there are some major conditions which must be considered including maintaining the temperature, ventilation system, controlling the humidity as well as the eggs turning mechanism [1]. All these variables must be properly controlled so that the good hatching environment can be preserved.

17.2.1 Temperature

Incubating temperature is one of the most critical aspects to be controlled as the improper temperature may cause bad result in developing the embryo in the eggs [3]. The most suitable hatching temperature is 37.5°C with tolerance of $\pm 0.275^\circ\text{C}$. In particular, the temperature must be kept and maintained at 37.5°C and must not be below 37.2°C and exceed 37.7°C [4]. Low temperature can cause longer time for the eggs to hatch while high temperature will cause short time of hatching.

17.2.2 Relative Humidity

Generally the humidity in air is measured as the fraction of the maximum amount of water that air can absorbed at a certain temperature. At atmospheric conditions and a given temperature this fraction can vary between 0 (absolute dry) and 100% (the point where condensation will begin to form). The Relative humidity is a term used to describe the amount of water vapor that exists in a gaseous mixture of air and water vapor. The relative humidity (RH) of an air-water mixture is defined as the ratio of the partial
