CONTENTS

Editorial Notes	v
About the Editors	vi
Contents	vii
1. A Brief Overview of Biomechatronics and Its Applications.....	1
<i>Nur Izatulnisha A.Rashid, Jamaliah Kassim and Asan G. A. Muthalif</i>	
2. Self-Powered Solar Tracking System Part 1: System Modeling and Hardware Selections.....	7
<i>Asan G. A. Muthalif, Dzairul Hafiz and Haris Shafiq</i>	
3. Self-Powered Solar Tracking System Part 2: System Design.....	14
<i>Asan G.A. Muthalif, Dzairul Hafiz and Haris Shafiq</i>	
4. Self-Powered Solar Tracking System Part 3: System Integration and Testing.....	19
<i>Asan G.A. Muthalif, Dzairul Hafiz and Haris Shafiq</i>	
5. Smart System For Monitoring Electrical Power Usage at Homes.....	25
<i>Kawthar A. Rahman, Asan G. A. Muthalif and Nurul F. Shua'ib</i>	
6. Vibration Based Predictive Maintenance: Common Rotating Machinery Faults and Their Signatures.....	30
<i>Siti F. Mansor, Asan G. A. Muthalif and Nurul 'I. Zaman</i>	
7. Modeling of Disc Rotor Induction Motor.....	38

M. M. Rashid, S. Abubakar and R. Tamjis

8. Computer Communication for a Smart Card Based Ordering System Via Visual Basic..... 52
Siti Fauziah Toha and Rosdiazli Ibrahim
9. Electronic Smart Ordering System: Graphical User Interface 59
Siti Fauziah Toha and Rosdiazli Ibrahim
10. Intruder Avoidance System Via Short Message Service (SMS)..... 65
Siti Fauziah Toha and Mohammad Zafran Haja Mohideen
11. Anti Skid Control System, A Tutorial..... 71
M. J. E. Salami, R. Khan, A.M. Aibinu, Syahrul Syazanizam Bin Md Said and Mohd Sofian Bin Basrah
12. Intelligent Anti Skid Control System..... 75
M. J. E. Salami, R. Khan, A.M. Aibinu, Syahrul Syazanizam Bin Md Said and Mohd Sofian Bin Basrah
13. Principles of FMCW Radar Signal Processing..... 91
Wahju Sediono and Andrian Andaya Lestari
14. Design and Implementation of a Simple Queueing System for Vehicle Traffic Simulator..... 99
Wahju Sediono
15. Determination of Target Speed from the FMCW Radar Data..... 107
Wahju Sediono and Andrian Andaya Lestari
16. Intelligent Egg Incubator: Introduction..... 116
Shahrul Na'im Sidek, Yasir Mohd Mustafah, Urwah Ismail, Nur Hasnaa Che Awang
17. Intelligent Egg Incubator: Mechanical Design..... 125

Shahrul Na'im Sidek, Yasir Mohd Mustafah, Urwah Ismail, Nur Hasnaa Che Awang

18. Intelligent Egg Incubator: System Integration And Results 137
Shahrul Na'im Sidek, Yasir Mohd Mustafah, Urwah Ismail, Nur Hasnaa Che Awang

19. Human Posture Recognition Classification And Recognition..... 157
Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin

20. Human Posture Recognition Preprocessing Techniques..... 162
Othman O. Khalifa, Kyaw Kyaw Htike, Lai Weng Kin and A. Albagoul

21. Path Detection Implementation Using Fuzzy Classifier 171
Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin

22. Mechanical Design Of Unmanned Underwater Vehicle 180
Md. Raisuddin Khan, M. Zuhdi and Masum Billah

23. Design And Development Of An Automated Café System..... 187
Md. Raisuddin Khan, MAS Kamal and Masum Billah

24. Speech Coding Using Compressive Sensing On A Multicore System 194
T.S. Gunawan, Othman O. Khalifa, A. A. Shafie and E. Ambikairajah

25. A Case For Cooperative Vision System..... 202
A. A. Shafie and N. Samudin

26. Path Following Autonomous Vehicle Based On Vision System..... 208
A. A. Shafie, E. A. Syukur and N. I. Sidek

27. Trajectory Planning Using Gps For Unmanned Aerial Vehicle With Microcontroller Based System 215
A. A. Shafie, Md. Raisuddin Khan and M Shehzad Islam

28. Digital Hearing Aids Analysis And Implementation.....	224
<i>Othman O. Khalifa, Aisha H. Abdalla and Sheroz Khan</i>	
29. Automatic Intelligent Ordering System: Design And Tools Selection	233
<i>Siti Fauziah Toha and Rosdiazli Ibrahim</i>	
30. Automatic Smart Card Purchasing System for Express Kiosk.....	240
<i>Siti Fauziah Toha and Rosdiazli Ibrahim</i>	
31. Finite Element Formulation of Piezoelectric Laminated Composite Plate	247
<i>Iskandar Al-Thani Mahmood and Md. Raisuddin Khan</i>	
32. A Review on Modeling And Shape Control Of Piezoelectric Laminated Composite Plate Using Finite Element Method.....	257
<i>Iskandar Al-Thani Mahmood and Md. Raisuddin Khan</i>	
33. Development of Auto Parking System & Auto Billing System Using Image Processing Technique (Part 1).....	267
<i>M. M. Rashid</i>	
34. Development of Auto Parking System and Auto Billing System Using Image Processing Technique (Part 2)	274
<i>M. M. Rashid</i>	
35. Development of Auto Parking System& Auto Billing System Using Image Processing Technique (Part 3).....	281
<i>M. M. Rashid</i>	
36. Automatic Car Parking Management System for Large Parking Lot.....	289
<i>M. M. Rashid</i>	
37. Development of Wireless Home Power Monitoring System	296
<i>M. M. Rashid</i>	

CHAPTER 26

PATH FOLLOWING AUTONOMOUS VEHICLE BASED ON VISION SYSTEM

A. A. Shafie^a, E. A. Syukur and N. I. Sidek

26.1 Introduction

One of the problems that have been in active research in designing an autonomous vehicle is related to its navigation system [1]. Currently, many robots rely on variation of line-tracking methods for navigation, thus require a system grid of some kinds in the layout [2, 3]. This method poses some disadvantages which links to a series of other disadvantages.

The line-tracking method limits the robots traversing speed. This is mainly due to two reasons. First, the robot has to travel according to the grid placed on the field. The robot will not be able to take the shortest route which is a straight line between point A and B. Also, if the robot needs to make a turn, it will have to stop at every junction and make the turn. This will add a huge amount of overhead time taken to reach the destination.

Second, the line-tracking sensor has a limited view of the line. This is in terms of resolution and also the range. When with control system, usually a system will not be static at the set point, instead, it oscillates. Furthermore, since the viewing range of the sensor is not all encompassing, the robot could not tolerate high overshoot. This will also result in low transient response, since high transient response would normally produce high overshoot. If overshoot occurs, the robot would be in a 'lost' state.

Another drawback of the line-tracking system is that, it is very susceptible to collision. If a collision were to happen, the robot might be pushed out of the viewing range of the line-tracking sensor. This would, again, causes the robot to lose its position, rendering it is incapable of further continuing the traverse to the destination.

Dead reckoning using wheel or shaft encoders are the other popular method of navigation system used in autonomous vehicle system. This method was mainly adopted for the vehicles that have relatively simple route and requires rapid movement. The trouble with this method is; it is neither accurate nor precise. It is suitable when the robot has to be within a certain bounded area. It is also very vulnerable to collision and also wheel slip which will give false current position of the robot.

Jung et.al. [4] have implemented a machine vision system for collaborative cleaning robot where it utilize histogram thresholding as the primary object recognition system feeding information to PID controller. Roth et. al. [5] meanwhile uses a high level topological system of the world being built based on color-blob and contour information from the camera. Takatori [6] and Illman et. al. [7] combined the use of vision system
