## Chapter-3

### **Upgrading Facilities of KENMS *Musolla***

**Khaliq Ahmad/ Nurul Afifa Sofin, et.al.**

#### **INTRODUCTION**

For the purpose of MIP course, we have been assigned to find problems that occur in the community and try to come out with the solutions. Due to that, after some discussions and studies, we are agreed to take a closer look, and try to concentrate the scope within IUM Kulliyah.

We are agreed to concentrate on the facilities provided in KENMS musolla. The purpose of the program is tried to find the best solution in order to upgrade the services provided in KENMS musolla. This is because there are several grievances and complaints received among the students and staff regarding the facilities provided in KENMS sister's musolla. After several observations and interviews, the objectives of concentrating on this problem became clearer where we want to give the best services for KENMS community, mainly for sisters.

Our scope is KENMS musolla, mainly for sisters' area. This is because musolla is one of the important places for performing prayers. However, the condition of musolla in Kulliyah of Economics and Science Management mainly for sisters is unfavorable to be used to perform prayers and ibadah. Due to that, we want to take that responsibility as a part of the users of musolla by try to purposed with several solutions so that students, staffs and outsiders will have high level of satisfactions and they may able to perform their prayers and ibadah in the most comfortable, cozy and pleasant condition.

#### **PROBLEM STATEMENT**

We are agreed to find solutions for the problems after investigate lots of complaints occur regarding the facilities provided. Through observation, we find out as there are several improvements should be done in order to ensure the users will have the best satisfaction or at least, they can perform ibadah in the most comfy conditions.

Based on interviews and observation, the main major problem is there is not enough space for them to prayer. The situation needs extra attention especially for Dhuhr and Maghrib. This is due to several students misuse the place, not for performing their prayer but to sleep and chat, as well as eat. This habit creates a problem to the other students that intend to pray.
