## Chapter-7

### **Unemployed KENMS Graduates**

**Khaliq Ahmad/Intan Paraha, et.al**

#### INTRODUCTION

“Education Act 1996 has outline the purpose of education is to enable the Malaysian society to have a command of knowledge, skills and value for achieving the country’s vision of attaining the status of a fully developed nation in terms of economic development, social justice and spiritual, moral and ethical strength, towards creating a society that is unite, democratic, liberal and dynamic. AND, one of the objectives of Ministry of Higher Education is to produce competent graduates to fulfil national and international manpower needs with 75% of the graduates employed in their relevant field within six months of their graduation...”(Source: MOHE)

The increasing unemployment rate among the graduates in Malaysia is a worrying trend. This issue cropped up again and again, highlighted the news headlines and even hit the parliament. This situation was somewhat different the 1997 crisis when Malaysia was having a vibrant employment and graduates were in high demand. Why this problem happened? Is the job market getting more competitive or it is the job seekers and graduates are actually unmarketable these days? We have given supported idea from our lecturer Sir Ridhwan Fontaine to focus on this hot issue and limit the scope in our university, especially for fresh graduate KENMS student. Originated out of consideration from that, here, we want to explore indeed and we come out with possible solutions for this unemployment problem and focus on our IIUM, KENMS students.

The purpose of this project;

1. To identify the reasons why IIUM, KENMS students are unemployed
2. To share and expose the students with real employment experience
