## 9. COURSE ADVISOR SYSTEM

---

Abdul Rahman Ahlan and Nur Farhana Binti Ahmad  
Department of Information Systems, Kulliyah of Information and  
Communication Technology, International Islamic University Malaysia,  
Malaysia

### ABSTRACT

The Course Advisor System is presented in this chapter. The system mainly serves for students who mainly majoring in BIT, for both local and international students. The system will act as a guide to help students in making decision of choosing courses to register for each semester. The system first will display student personal information, and then display student academic information. This is all the detail information about a particular student that stored in the department database. After that, the system will automatically generate the study plan base on individual. The Course Advisor System will suggest consecutive courses to be taken by students to ensure progress toward completing degree requirements. Students usually make wrong decision in choosing courses to register and they do not have any plan ahead for their study. Therefore, the Course Advisor System will help them to do that.

### 9.1 INTRODUCTION

#### 9.1.1 *Problem Background*

In each semester, students are required to pre-register courses online for next semester and to decide which courses should register are something really concern to the students. To make the decision, it is really confusing the students and time consuming. Students are advice to follow the study plan or consult the advisor in order to choose what courses that they should take.
