ABSTRACT
This project involves analyzing and designing a prototyping system that automates the membership online system of Malaysian Islamic Youth Movement (ABIM). The primary objective is to create a web-based membership system that will help ABIM's administrator to collect and store members' information in efficient and reliable way as well as to manage the database efficiently. The system will enable the user to do online registration, manage the payment fee, view the activity and muktamar report as well as update their personal detail. It also enables the admin to track members' information, view the payment, activity, muktamar and also membership database. The system is developed using PHP and MySQL.

11.1 INTRODUCTION

11.1.1 Problem Background
ABIM offer many activities to the community such as organizing the seminar, volunteerism and many more. The researcher found there are a lot of people participating as members of ABIM. Currently, there are 70,000 people participating as members of ABIM.
