ABSTRACT

Rapid increase in the development of Information & Communication Technologies (ICTs) and the desire of obtaining education has left the society with no choice of education through ICTs. Education facilitated by the new ICT is transforming learning and instruction forms in ways “that extend beyond the efficient delivery or entertainment value of traditional approaches”. Education in Islam is considered as an instrument by which people can be trained in the Islamic way of life. It’s challenging to achieve the objective of Islamic education through ICTs. This paper discusses the integration of ICTs in education, highlight the objective of Islamic education and then finally suggests an innovative approach to obtain desired objectives.

Keywords: Information & Communication Technologies (ICTs), Education, e-Learning, Islamic Education.

INTRODUCTION

Information & Communication Technologies (ICTs) is impacting all sectors of society especially in education. Education is the foundation of any modern society and it is to transmit a common set of beliefs, values, norms, and understanding from the adult generation to its youths. ICTs are promoting equity in education by providing educational opportunities to a greater number of people of all ages, including the traditionally unserved or underserved (e.g. those in rural and remote areas, women and girls). New technologies provide more opportunities for matching diverse teaching methods to diverse student’s need and use of technology in education has several benefits for motivating students. These advanced technologies have become an essential tool of communication and information, thus offering unique advantages to both educators and students (Al-Harbi, 2011). Education facilitated by the new ICTs is transforming learning and instruction forms in ways “that extend beyond the efficient delivery or entertainment value of traditional approaches” (Garrison and Anderson, 2003).

Recent development in the field of information and communication technology, the sharp growth in education, and the new delivery mode of
