EDITORIAL NOTE
Zulkefli Bin Muhammed Yusof ................................................................. i

1. Web And Mobile Based Phrase Dictionary
Normaziah A. Aziz, Noranidah Binti Mohamad, Nur Asfah Binti Ahmad Murad ................................................................. 1

2. Computerized Observation Of Motion In Badminton Tracking System
Normaziah A. Aziz, M. Amar Odenan, Taufiq M. Khadafi ....................... 11

3. Analyzing Driving Behaviour Using Speech Recognition Through KDE And MLP
Abdul Wahab Bin Abdul Rahman, Norazilah Nuji, Khadijah Adibah Ahmad ................................................................. 21

4. Driver Identification and Driver’s Emotion Verification Using KDE and MLP Neural Networks
Abdul Wahab Bin Abdul Rahman, Norzaliza Md Nor, Asma’ Ismail ................................................................. 35

5. Emotion Speech Recognition Using KDE and MLP Neural Networks
Abdul Wahab Bin Abdul Rahman, Nor Fadilah Basiron, Nor Ashikin Ishak ................................................................. 55

6. Investigating Computer Forensic Tools And Their Searching Techniques
Normaziah A. Aziz, Aniyath Ali, Mahmoud Abdul Wahab ....................... 69
7. A Web-Based Approach for the KICT Evaluation System
Al-Sakib Khan Pathan, Nurul Nabilah Kamarudin, Hasfaizaidah Hassan, Nadilatul Eliana Ali ................................................................. 87

8. Brainwave Study On The Effect Of Music On Perception
Abdul Wahab Bin Abdul Rahman, Nur Izrin Roslan, Siti Norhaizum Mohd Hasnan ................................................................. 95

Al-Sakib Khan Pathan, Ahmad Nazmi Fadzal .................................. 113

10. A Study Using Driving Simulator To Understand Driver’s Perception A Priori And Post Priori Of Accidents
Abdul Wahab Bin Abdul Rahman, Nor Akmal Harun, Norasyikin Lipoh ................................................................. 125

11. Secure Coding in Cross Site Scripting
Normaziah A. Aziz, Milly Hafizah Mohd Kanafia, Salmiah Haseng ................................................................. 143

12. Pronouncing Dictionary for Minority Languages of Muslim Community
Normaziah A. Aziz, Ahmad Hasanul Ishraf Shuib, Mohd Faizie Awalluddin ................................................................. 157

13. The Impact of Transmission Range over Node Density in Vehicular Ad Hoc Network (VANET) with Obstruction of Road Infrastructure
Zulkefli Bin Muhammed Yusof, Nur Nazmah Mat Zin .................. 167

Zulkefli Bin Muhammed Yusof, Mohd Asyraf .................................. 177
15. Content Management System Minbsite
Zulkefli Bin Muhammed Yusof, Ammar Bin Mat Rawi

16. Classification Based On Basic Emotion
Abdul Wahab Abdul Rahman, Husna Mohd Salih, Nurulhidayah Abd. Latif

17. Basic Emotions Verification and Identification using Gaussian Mixture Model (GMM) Features Extraction
Abdul Wahab Abdul Rahman, Siti Norhidayah Saad, Syuwaida N. Zahari

18. SQL Injection Penetration Testing Tutorial
Al-Sakib Khan Pathan, Diallo Abdoulaye Kindy

19. A Survey of Photonic Switching Network
Al-Sakib Khan Pathan, M. M. Hafizur Rahman

20. An Evaluation of Photonic Switching Network
Al-Sakib Khan Pathan, M. M. Hafizur Rahman
15. CONTENT MANAGEMENT SYSTEM MINISITE

Zulkefli Bin Muhammed Yusof, Ammar Bin Mat Rawi

Communication Technology, International Islamic University Malaysia,
Malaysia

ABSTRACT
There are several Content Management Systems (CMS) that have been used nowadays. For instance, phpBB and SMF to design discussion board or called Forum), Drupal, PHP-Nuke, and Joomla to design CMS Website, CubeCart, Zen Cart and OS Commerce to design E-Commerce. Several web-based content management systems exist both in the Open Source and commercial domains. All of these web systems are designed to simplify the publication of web content to web sites. In particular, they are allowing content creators to submit content without requiring technical knowledge of HTML. Another popular website is Minisite, which is a single-page website where the operator aims to sell one particular product rather than present a company's product portfolio. Unlike usual websites, minisites usually consist of a single page website that utilizes a direct response marketing approach to sell its single product. Traditionally, minisites were developed or designed by web designer using HTML Editor like Dreamweaver, FrontPage, or any website builder software. For users who have limited knowledge on this matter, they need to hire web developer every time they want to update their site. In this proposed project, the system that is going to be developed will reduce the cost and time of the users. By having this kind of system, they can easily update their site online, with no technical skill required.
