CONTENTS

EDITORIAL NOTE
Zulkefli Bin Muhammed Yusof ........................................... 1

1. Web And Mobile Based Phrase Dictionary
Normaziah A. Aziz, Noranidaah Binti Mohamad, Nur Afisah Binti Ahmad Murad ................................................................. 1

2. Computerized Observation Of Motion In Badminton Tracking System
Normaziah A. Aziz, M. Amar Odenan, Taufiq M. Khadafi .................. 11

3. Analyzing Driving Behaviour Using Speech Recognition Through KDE And MLP
Abdul Wahab Bin Abdul Rahman, Norazilah Nuji, Khadijah Adibah Ahmad ............................................................... 21

4. Driver Identification and Driver’s Emotion Verification Using KDE and MLP Neural Networks
Abdul Wahab Bin Abdul Rahman, Norzaliza Md Nor, Asma’ Ismail .......................................................... 35

5. Emotion Speech Recognition Using KDE and MLP Neural Networks
Abdul Wahab Bin Abdul Rahman, Nor Fadilah Basiron, Nor Ashikin Ishak .......................................................... 55

6. Investigating Computer Forensic Tools And Their Searching Techniques
Normaziah A. Aziz, Aniyath Ali, Mahmoud Abdul Wahab ...................... 69
7. A Web-Based Approach for the KICT Evaluation System
Al-Sakib Khan Pathan, Nurul Nabilah Kamarudin, Hasfaizaidah Hassan, Nadilatul Eliana Ali
.............................................................................................................. 87

8. Brainwave Study On The Effect Of Music On Perception
Abdul Wahab Bin Abdul Rahman, Nur Izrin Roslan, Siti Norhaizum Mohd Hasnan
.............................................................................................................. 95

Al-Sakib Khan Pathan, Ahmad Nazmi Fadzal .............................................. 113

10. A Study Using Driving Simulator To Understand Driver’s Perception
A Priori And Post Priori Of Accidents
Abdul Wahab Bin Abdul Rahman, Nor Akmal Harun, Norasyikin Lipoh
.............................................................................................................. 125

11. Secure Coding in Cross Site Scripting
Normaziah A. Aziz, Milly Hafizah Mohd Kanafia, Salmiah Haseng
.............................................................................................................. 143

12. Pronouncing Dictionary for Minority Languages of Muslim Community
Normaziah A. Aziz, Ahmad Hasanul Ishraf Shuib, Mohd Fazlie Awalluddin
.............................................................................................................. 157

13. The Impact of Transmission Range over Node Density in Vehicular Ad Hoc Network (VANET) with Obstruction of Road Infrastructure
Zulkefli Bin Muhammed Yusof, Nur Nazmah Mat Zin ............................... 167

Zulkefli Bin Muhammed Yusof, Mohd Asyraf ........................................... 177
15. Content Management System Minisite
Zulkefli Bin Muhammed Yusof, Ammar Bin Mat Rawi .......................... 189

16. Classification Based On Basic Emotion
Abdul Wahab Abdul Rahman, Husna Mohd Salih, Nurulhidayah Abd. Latif ................................................................. 199

17. Basic Emotions Verification and Identification using Gaussian Mixture Model (GMM) Features Extraction
Abdul Wahab Abdul Rahman, Siti Norhidayah Saad, Syuwaida N. Zahari ............................................................. 211

18. SQL Injection Penetration Testing Tutorial
Al-Sakib Khan Pathan, Diallo Abdoulaye Kindy ........................................ 225

19. A Survey of Photonic Switching Network
Al-Sakib Khan Pathan, M. M. Hafizur Rahman ........................................ 235

20. An Evaluation of Photonic Switching Network
Al-Sakib Khan Pathan, M. M. Hafizur Rahman ........................................ 255
18. SQL Injection Penetration Testing Tutorial

Al-Sakib Khan Pathan, Diallo Abdoulaye Kindy
Department of Computer Science, Faculty of Information and Communication Technology, International Islamic University Malaysia, Malaysia

ABSTRACT
Currently, almost everyone is connected online via a proper device and has his or her data stored in a particular database server. This data which is personally identifiable information (PII) may include: student personal account, bank account, credit card account and many more. Illegal access to this sensitive data stored at the backend database will harm the owner. SQL Injection attacks are identified as the top and prevalent risk which allows a malicious or crafted attacker to steal users’ information. In June 2005, due to an SQL injection attack, CardSystems had 263,000 credit card numbers stolen from its database. As these credit cards were unencrypted, over 40 million credit card numbers were exposed to attack. Due to this threat of SQL Injections, many big companies are losing businesses and reputation among potential clients. Vulnerabilities in Web Application are mainly due to a less secure coding implementation by the developers. In this penetration testing tutorial, we will expose users (students, lecturers, web developers and researchers) on various SQL Injections attacks type, have hands on few pen testing on web applications in order to identify the vulnerabilities. Finally we will suggest few secure coding approaches which are a must for any web developers to avoid SQL Injections attacks.
