TABLE OF CONTENTS

	Page
Preface	8
CHAPTER 1	9
Examining views on balance of payment: Polynomial Distributed Lag (PDL) model	9
Abstract	9
1.1 Introduction	9
1.2 The theoretical framework	11
1.2.1 Keynesian approach versus monetary approach	12
1.2.2 The importance of trade balance (TB) and Official Reserves Transaction Balance (ORTB): Keynesian approach versus monetary approach	17
1.3 Data and methodology	18
1.4 Results and analysis	22
1.4.1 Analysis results of the test of signs	26
1.4.2 Analysis results of the test of speed adjustment	28
1.5 Conclusion	29
Endnotes	30
References	31
CHAPTER 2	33
Identifying good inflation forecaster: Vector Error Correction Model (VECM)	33
Abstract	33
2.1 Introduction	33
2.2 Inflation trend in Malaysia	34
2.3 Data and methodology	37

2.3.1 Data and variables	40
2.3.2 Illustration of data	41
2.4 Results and analysis	43
2.4.1 Forecasting results using commodity price	43
2.4.2 Forecasting results using financial indicator	45
2.4.3 Forecasting results using real indicator	49
2.5 Conclusion	53
Endnotes	54
References	54
CHAPTER 3	57
Finance and growth nexus: Causality tests	57
Abstract	57
3.1 Introduction	57
3.2 Data and empirical method	60
3.2.1 Data	60
3.2.2 Methodology	60
3.3 Empirical findings	64
3.4 Policy implication and conclusion	68
References	69
CHAPTER 4	72
Malaysian export demand: Non-linear cointegration and adjustment	72
Abstract	72
4.1 Introduction	72
4.2 Empirical method	76
4.2.1 Symmetric cointegration model	76
4.2.2 Asymmetric cointegration models (TAR and M-TAR models)	76
4.2.3 Exponential smooth-transition	

(ESTAR) model	78
4.3 Empirical results and analysis	79
4.4 Conclusion	83
Endnotes	85
References	85
