CONTENTS

PREFACE v

CHAPTER 1 SCREENING FOR ANTI-CANCER COMPOUND FROM SELECTED MALAYSIAN PLANTS BY SULFORHODAMINE B ASSAY ON MCF-7 CANCER CELL LINE Azura Amid, Abdul Aziz Ahmad and Raha Ahmad Raus 1

CHAPTER 2 THE EVALUATION ON ANTICANCER PROPERTIES FROM KENAF SEEDS OIL FROM DIFFERENT VARIETIES Azura Amid, Parveen Jamal, Nurul Elyani Mohamad and Engku Hasmah Engku Abdullah 9

CHAPTER 3 SCREENING AND EVALUATION OF ANTICANCER PROPERTY IN MANGO FRUIT Mangifera indica Azura Amid, Irwandi Jasvir and Muhd. Ezza Faiez Othman 16

CHAPTER 4 SENSORY EVALUATION AND CONTAMINATION TEST ON MANGO FRUIT (Mangifera indica) PUREE Azura Amid, Irwandi Jasvir and Muhd. Ezza Faiez Othman 23

CHAPTER 5 THE OBSERVATION ON THE INHIBITION OF ANTI-INFLAMMATORY MEDIATOR OF THE TOMATO LEAVES EXTRACT Azura Amid, Sulawati Semail and Parveen Jamal 30

CHAPTER 6 A STUDY OF BACTERIAL CELL IMMOBILIZATION IN ALGINATE GEL BEADS FOR THE PRODUCTION OF MYO-INOSITOL PHOSPHATES Noor Ili Mohamad Puad, Abd-ElAzim Farouk and Hamzah Mohd. Salleh 36

CHAPTER 7 EXTRACTION AND EVALUATION OF ANTIBACTERIAL ACTIVITY FROM SELECTED FLOWERING PLANTS Raha Ahmad Raus, Erlina Abdullah and Parveen Jamal 43
CHAPTER 8 EXTRACTION OF ANTIBACTERIAL COMPOUNDS FROM PLANTS USING SONICATOR
Raha Ahmad Raus, Nur Shazwana Mohd Puzi and Parveen Jamal

CHAPTER 9 EXTRACTION AND EVALUATION OF ANTICANDIDAL ACTIVITY FROM SELECTED MALAYSIAN PLANTS
Raha Ahmad Raus, Nor Azlin Alia Nor Muhammad and Jacinta Santhanam

CHAPTER 10 EXTRACTION AND EVALUATION OF ANTIFUNGAL ACTIVITY FROM SELECTED MALAYSIAN PLANTS
Raha Ahmad Raus, Hayatunissa Samsuddin, Nor Hafizah Addnan and Jacinta Santhanam

CHAPTER 11 MOLECULAR MODELING OF BIODEGRADATION POLYESTERS USING LIPASE
Ibrahim Ali Noorbachta, Nor Afina Eidura Hussin and Hamzah Mohd Salleh

CHAPTER 12 POTENTIAL OF NAHAR SEED OIL EXTRACT AS ANTIMICROBIALS
Mohamed E. S. Mirghani, I. A. Ahmed, S. A. Muyibi., J. I. Daoud and M. A. Mikail

CHAPTER 13 NAHAR (Mesua ferrea) TREE AS A MEDICINAL PLANT
Mohamed E. S. Mirghani, I. A. Ahmed, S. A. Muyibi., J. I. Daoud and M. A. Mikail

CHAPTER 14 EXPLOIT OF MALAYSIAN MANGO KERNEL EXTRACT AS ANTIBACTERIAL AGENT
Mohamed Elwathig Saeed Mirghani, Nasereldin A. Kabbashi, Parveen Jamal and H. A. Abdullah

CHAPTER 15 PREPARATION OF NUTRITIOUS DRINK FROM DATE PALM KERNEL (DPK)
Mohamed Elwathig Saeed Mirghani, Irwandi Jaswir and Nurul Hanan Mustapha

CHAPTER 16 DATE SEED EXTRACT AS PRESERVATIVES
Mohamed E. S. Mirghani, M. A. Mikail, I. A. Ahmed, M. I. Abdul Karim and J. I. Daoud

ABSTRACT

Two major red seaweed species available locally in Malaysia (in the coastal area of Sabah) which are *Kappaphycus alvarezii* and *Eucheuma denticulatum* were tested to the effect of alkali treatments on the yield and gel strength (quality) of the carrageenans which were collected from the different coastal areas of Sabah. They were analyzed using different alkali concentrations, temperatures and treatment times. For the screening stage of the agar, all samples were treated at set alkali treatment condition which at KOH concentration (5% w/v), temperature (85°C) and treatment time (90min). All samples were then will be subjected to hot water extraction (phosphate buffer solution at pH 7.2) at constant parameter of 95°C temperature and 1 hour extraction time. Carrageenan percentage yields value were for *Eucheuma denticulatum*, 55.9 % yield, *Kappaphycus alvarezii* collected from Semporna, 61.5 % yield and *Kappaphycus alvarezii* collected from Kota Kinabalu, 37.5 % yield. Based on the highest yield of carrageenan, *Kappaphycus alvarezii* collected from Semporna been chosen for the next stage of optimization where this species been subjected to different condition of parameters which are KOH concentration (2.0-6.0%), temperature (65-95°C) and treatment time (10-120min). The optimal conditions are those providing the highest gel strength (tested by using texture analyzer TA-XT plus). In this stage the highest gel strength was 659.13 g/cm2 at condition of 6% w/v KOH concentration, 80°C temperature and 65 min extraction time.

Keywords: Seaweed, carrageenan, gel strength, *Kappaphycus alvarezii*, *Eucheuma denticulatum*.

INTRODUCTION

Carrageenan is a gel forming and viscosifying polysaccharides that are obtained by extraction of certain species in the class of red seaweeds or Rhodophyceae. Most of today’s carrageenan productions are from the species of *Kappaphycus (Kappaphycus alvarezii)* and *Eucheuma (Eucheuma cottonii, Eucheuma denticulatum and Eucheuma spp.)* which contribute to the source of kappa and iota type of carrageenan respectively (McHugh, 2003). According to FAO (Food and Agricultural Organization of the United Nation) statistic, by 2005 nearly 92
