2.1. Introduction

Chapter 1 introduces the fundamentals of higher education in developing and Islamic world. It explains briefly the current status of higher education and the challenges facing universities and high institutions [1, 2, 3, 4, 5]. Other section summarizes the main problems associated with higher education in developing and Islamic countries [2, 3, 5, 6, 7, 8]. The Islamic point of view in education, science, knowledge seeking, innovation and creative thinking is briefly discussed and integrated with related verses of Qur'an and Sunnah of Prophet Mohammed PBUH [9 - 16]. The needs for Islamic guidance and importance of Islamic principles in enhancing the evolution of higher education was summarized to offer good background for planning the future of higher education especially in Islamic world. Ethics represented the core for Islamic guidance and associated with all aspects of life so we have to consider ethical principles within all steps of educational process. Thousands of verses and Sunnah (Hadiths) provide the various dimensions of ethical principles in human life. To overcome weaknesses in higher education we propose a future plan.

To have an effective future plan for higher education in Islamic world; we have to understand how to reflect Islam in whole education process (curriculum, campus life, and administration). Muslims should understand and satisfy that enhancing higher education process with Islamic principles and practices will lead to change societies for better. Higher institutions can implement Islamic based policy to respond effectively and create educational environments that are supportive to university stakeholders (students, faculty, administrators, and employers). Such effective policy is required in understanding and embedding the role of cultural, social and religious values in university life. This leads to having an integrated plan in higher education based on Islamic view to form future of Islamic World.
