Preface

PART I: DESIGN

Chapter 1 - Design of a Simple and Affordable Electric Bicycle ........................................... 04
Tasnim Firdaus Ariff¹, Goey Ewing² and Kam Yee Wah³
1 Faculty of Engineering – International Islamic University Malaysia
2,3 School of Technology, Tunku Abdul Rahman College
✉: tasnim@iium.edu.my

Chapter 2 - Design of Bicycle Helmet Using FEA ................................................................. 10
Tasnim Firdaus Ariff¹ and Lau Ken Tick²
1 Faculty of Engineering – International Islamic University Malaysia
2 School of Technology, Tunku Abdul Rahman College
✉: tasnim@iium.edu.my

Chapter 3 - Mould Design for Handphone Casing Using Moldflow ..................................... 18
Tasnim Firdaus Ariff¹ and Law Siah Yong²
1 Faculty of Engineering – International Islamic University Malaysia
2 School of Technology, Tunku Abdul Rahman College
✉: tasnim@iium.edu.my

Chapter 4 - Improvement of Typical Hip-Joint Design for Gripping and Fixing ................. 26
Siti Norbahiyyah Binti Mohamad Badari¹ and Erry Adesta²
1, 2 Faculty of Engineering – International Islamic University Malaysia
✉: eadesta@iium.edu.my

Chapter 5 - A Surgical Training Model Manufacture Using Fused Deposition Modeling .................. 44
Hasanudin Hafis Mohamad Ali, Md. Amir Hamzah Md. Shukri, WAY Yusoff
Faculty of Engineering – International Islamic University Malaysia
✉: hasan.ma86@gmail.com; mdamirhamzah87@gmail.com
Chapter 6 - Reverse Engineering for Rapid Prototyping of Automotive Components

WAY Yusoff', Muhammad Rithuan Kamaruudin2 and Noor Illiana Mohd Salimi3
1, 2, 3 Faculty of Engineering – International Islamic University Malaysia
✉️: yusmawiza@iium.edu.my; wan_ching05@yahoo.com.my; nuriliana@yahoo.com

Chapter 7 - Design and Fabrication of Industrial Welding Robotic Arm

Syed Idros Syed Abdullah', Mohamad Sazri Mahamad Puzi2, and WAY Yusoff3
1,2,3. Faculty of Engineering – International Islamic University Malaysia
✉️: yusmawiza@iium.edu.my

PART II: QUALITY

Chapter 8 - Application of Statistical Quality Control for Quality Improvement

Tasnim Firdaus Ariff' and Yap Yee Seng2
1 Faculty of Engineering – International Islamic University Malaysia
2 School of Technology, Tun Hua Abdul Rahman College
✉️: tasnim@iium.edu.my

Chapter 9 - The Development of Cost Estimation for Quality Assurance System in Die-Casting Processes

Nur Hanisah A Hamzah' Nurhaftizah Azmi2 and Erry Yulian Tribas Adesta3
1, 2, 3 Faculty of Engineering, International Islamic University Malaysia
✉️: cadesta@iium.edu.my

Chapter 10 - Study the Adherence of the Values in The ISO 9001:2000 Certified Companies in Malaysia

Dr. Mohd Radzi Bin Haji Che Daud' and Rusdi Bin Mat Song2
1, 2. Faculty of Engineering – International Islamic University Malaysia

Chapter 11 - Cost Comparison Analysis between Strip to Coil for Support Brake Pedal at Suria Component (M) Sdn. Bhd

Dr. Mohd Radzi Bin Haji Che Daud1, Shamin Asyrafi Bt Alies3, Nohayati Bt Saleh3
1,2,3. Faculty of Engineering – International Islamic University Malaysia

Chapter 12 - Performance Measurement of SMEs Manufacturing Sector in Malaysia

viii
Chapter 13 - The Introduction of Fit Manufacturing as a Performance Measuring Approach towards Sustainability of Selected Manufacturing Companies in Malaysia .................................................. 105

WAY Yusoff¹, Aziatul Ashikin Mohd³ and Siti Mazaah Abdul Rahim³
1, 2, 3 Faculty of Engineering - International Islamic University Malaysia
✉️: yusmawiza@iiu.edu.my

Chapter 14 - The Study of the Implementation of OHSAS: 18001 at Kulliyyah of Engineering .................................................. 113

WAY Yusoff¹, Muhammad Fakhrani Hayyun² and Mohd Fairus bin Abdullah³
1, 2, 3 Faculty of Engineering - International Islamic University Malaysia
✉️: yusmawiza@iiu.edu.my

Chapter 15 - Implementation of FMECA on Fixed Assembly Cell (FAC) ......................... 121

WAY Yusoff¹ and Paul Roberts²
1. Faculty of Engineering - International Islamic University Malaysia, 2. Warwick Manufacturing Group - Warwick University, United Kingdom
✉️: yusmawiza@iiu.edu.my

Chapter 16 - Implementation of FMECA on Computer Integrated Manufacturing (CIM) ................................................................. 129

WAY Yusoff¹ and Azmil Soleh²
1, 2 Faculty of Engineering - International Islamic University Malaysia
✉️: yusmawiza@iiu.edu.my

PART III: MATERIALS

Chapter 17 - The Effect of Stucco System in Ceramic Shell Investment Casting ........... 139

Siti Norbahiyyah Binti Mohamad Badari¹ and Erry Adesta²
1, 2. Faculty of Engineering – International Islamic University Malaysia
✉️: eadesta@iiu.edu.my
Chapter 18 - Casting Investigation of Heat Treated Biocompatible Materials for Total Hip Bone Replacement ................................................................. 151

Siti Norfahiyah Binti Mohamad Badari and Erry Adesta
1, 2. Faculty of Engineering – International Islamic University Malaysia
✉: eadesta@iiu.edu.my

Chapter 19 - Pultrusion of Pineapple Leaf Fibre (PALF)-reinforced Vinyl Ester Composites: Water Absorption Property .............................................. 162

Mohamed Abd. Rahman, M. Kamarul Helmi M. Nawawi
Faculty of Engineering – International Islamic University Malaysia
✉: mrahman@iiu.edu.my

Chapter 20 - Effects of Austempering Treatment on Mechanical Properties of Ductile Iron ................................................................. 170

Belal Ahmed Ghazal and Erry Yulian Triblas Adesta
1, 2 Faculty of Engineering – International Islamic University Malaysia
✉: belalghazal88@gmail.com; ✉: eadesta@iiu.edu.my

Chapter 21 - Microwave Sintering of Metallic Materials ........................................ 179

Tasnim Firdaus Ariff
Faculty of Engineering – International Islamic University Malaysia
✉: tasnim@iiu.edu.my

Chapter 22 - Microwave Sintering of Ceramic Materials ........................................ 185

Tasnim Firdaus Ariff
Faculty of Engineering – International Islamic University Malaysia
✉: tasnim@iiu.edu.my

PART IV: MODELLING

Chapter 23 - Numerical Analysis to Characterize Triaxiality Value of Adhesive Joint due to Particular Load Configuration. Part 1: Butt Joint ..................... 194

Irfan Hilmy
MME Dept., Faculty of Engineering – International Islamic University Malaysia
✉: ihilmy@iiu.edu.my
Chapter 24 - Numerical Analysis to Characterize Triaxiality Value of Adhesive Joint due to particular Load Configuration. Part 2: Cleavage and Scarf Joint ... 202

Irfan Hilmy
Faculty of Engineering – International Islamic University Malaysia
✉: ihilmy@iiu.edu.my

Mohammad Iqbal
1. Faculty of Engineering – International Islamic University Malaysia
✉: mohammad_iqbal@iiu.edu.my

PART V: MANAGEMENT

Chapter 26 - Value Stream Mapping: an Important Footstep for Value Analysis and Value Engineering ........................................................ ..................... 223

A. N. Mustafizul Karim and Nurul Husna Binti Azon
Faculty of Engineering, International Islamic University Malaysia
✉: mustafizul@iiu.edu.my

Chapter 27 - The Project Management Challenges in Technology Innovation .............. 231

Mahmood Hameed Mahmood
1 and Erry Yulian Triblas Adesta
2
1, 2. Faculty of Engineering – International Islamic University Malaysia
✉: mahmoodfattah@yahoo.com / ✉: eadesta@iiu.edu.my

Chapter 28 - Critical Chain in Project Management ................................................ 239

Erry Yulian Triblas Adesta
1, Asfana Banu Mohamad Asharaf
2, Nur Atiqah Abdul Rahman Azmil
3
1, 2, 3 Faculty of Engineering – International Islamic University Malaysia
✉: eadesta@iiu.edu.my

PART VI: MACHINING

Chapter 29 - Engineering Project Management in Automotive Industry .................... 247

Mohamed Konneh
, and Abdul Halim
Faculty of Engineering - International Islamic University Malaysia
Chapter 30 - Surface Study when Finish Grinding Silicon using Resin Bonded Diamond Cup Wheel

Mohamed Konneh and Muhammad Mukhtar
Faculty of Engineering, International Islamic University Malaysia
E-mail: mkonneh@iium.edu.my

Chapter 31 – Surface Roughness Studies in Die-sink EDM of Tungsten Carbide using Copper Tungsten Electrode

Mohamed Konneh and Abdul Halim
Faculty of Engineering - International Islamic University Malaysia
E-mail: mkonneh@iium.edu.my

Chapter 32 – Study of the Effect of different Electrodes on Material Removal Rate, Electrode Wear Rate and Surface Roughness in the EDM of S-STAR

Mohamed Konneh, Nur Jannah Shad and Noor Fazlin Saharudin
Faculty of Engineering - International Islamic University Malaysia
E-mail: mkonneh@iium.edu.my

Chapter 33 – Kerf in Micro Wire Electro Discharge Machining

Abdus Sabur and Mohammad Yeakub Ali
Department of Manufacturing and Materials Engineering
Faculty of Engineering, International Islamic University Malaysia
E-mail: asbur72@yahoo.com

Chapter 34 - The Effect of Deep Cryogenic Treatment on the Properties of AISI D2 Tool Steel

Belal Ahmed Ghazal and Erry Yulian Triblas Adesta
1, 2. Faculty of Engineering – International Islamic University Malaysia
E-mail: belalghazal88@gmail.com, cdesta@iium.edu.my

Chapter 35 - Effect of Welding Process on Formability of Tailor Welded Blanks

Umer Mushtaq and Erry Yulian Triblas Adesta
1, 2. Faculty of Engineering – International Islamic University Malaysia
E-mail: mirkaz9@hotmail.com, cdesta@iium.edu.my
Chapter 30 Surface Roughness Studies in Die-sink EDM of Tungsten Carbide using Copper Tungsten Electrode ........................................... 257

Mohamed Konneh, and Muhammad Mulhtar
Faculty of Engineering, International Islamic University Malaysia
✉: mkonneh@iium.edu.my

Chapter 31 - Study of the Effect of different Electrodes on Material Removal Rate, Electrode Wear Rate and Surface Roughness in the EDM of S-STAR.............. 264

Mohamed Konneh, and Abdul Halim
Faculty of Engineering - International Islamic University Malaysia
✉: mkonneh@iium.edu.my

Chapter 32 - Kerf in Micro Wire Electro Discharge Machining........................................... 272

Abdus Sabur and Mohammad Yeakub Ali
Department of Manufacturing and Materials Engineering
Faculty of Engineering, International Islamic University Malaysia
✉: asbor72@yahoo.com

Chapter 33 - Engineering Project Management in Automotive Industry ...................... 279

Mohammed Kaleemullah, Erry Yulian Triblas Adesta, Waleed F. Faris
Faculty of Engineering, International Islamic University Malaysia
mkalim@gmail.com, eadesta@iium.edu.my, waleed@iium.edu.my

Chapter 34 - The Effect of Deep Cryogenic Treatment on the Properties of AISI D2 Tool Steel ........................................................................ 286

Belal Ahmed Ghazal and Erry Yulian Triblas Adesta
1, 2. Faculty of Engineering – International Islamic University Malaysia
✉: belalghazal88@gmail.com; ✉: eadesta@iium.edu.my

Chapter 35 - Effect of Welding Process on Formability of Tailor Welded Blanks .......... 294

Umer Mushtaq, and Erry Yulian Triblas Adesta
1 2. Faculty of Engineering – International Islamic University Malaysia
✉: mirkaz9@hotmail.com; mirkaz9@yahoo.com; ✉: eadesta@iium.edu.my
Kerf in Micro Wire Electro Discharge Machining

Abdus Sabur and Mohammad Yeakub Ali
Department of Manufacturing and Materials Engineering
Faculty of Engineering, International Islamic University Malaysia
✉️: asbur72@yahoo.com

5. Introduction

Recently, there has been an increasing demand for micromachining due to the reduction in size and weight of technological devices. Micro WEDM, a branch of WEDM, is more advanced and make possible to machine materials with accurate parts. It uses wire micro electrode 20–70 μm diameter 1–10 μJ per pulse discharge energy. The wire–workpiece gap usually ranges from 25–75 nm, which must be maintained by a computer controlled positioning system. Micro WEDM has many advantages compare to other non-traditional micro machining processes. The process is non-contact highly efficient. However, the most important machining responses are material removal rate, surface roughness and the kerf. The size of the kerf determines the dimensional and shape accuracy of the finished part. Kerf determines the internal corner radius to be produced in WEDM operations. The electrical discharge energy parameters have influence on kerf [2,4].

To get minimum kerf length the parameters of the process must be chosen appropriately. Selection of suitable parameters such as gap voltage and capacitance can lead into minimum kerf length. The objective of this research is to study the effect of electrical discharge energy parameters such as gap voltage and capacitance on kerf and to determine the optimal kerf size. Finally, it is to develop a mathematical model to predict the kerf size based on electrical energy discharge parameters.

According to Shichun et al. (2009), the kerf width varies with different machining parameters, such as capacitance and voltage which greatly influences the machining precision [1]. Mahapatra (2006) states that, the machining parameters that affecting the performance are discharge current, pulse duration, pulse frequency, wire speed, wire tension, and dielectric flow [5]. Vishal et al. (2010) has investigated the effects of machining parameters on the kerf width of wire EDM of 304L stainless steel. It has been observed that the machining parameters, such as gap voltage, pulse on-time, pulse off-time, wire feed and dielectric flushing pressure are the important controllable process
