CONTENTS

| | | Page No. |
|--|---|-------------|
| Part-I Human Posture Recognition | | |
| Chapter 01 | Human Posture Recognition: An Overview <i>Othman O. Khalifa, Kyaw Kyaw Htike, Aisha-Hassab Abdalla and Lai Weng Kin</i> | 1 |
| Chapter 02 | Human Posture Recognition: Literature review <i>Othman O. Khalifa, Kyaw Kyaw Htike, Lai Weng Kin and A. A. Alkhazmi</i> | 7 |
| Chapter 03 | Theoretical Background of Human Posture Recognition <i>Kyaw Kyaw Htike, Othman O. Khalifa, Sheroz Khan and Lai Weng Kin</i> | 15 |
| Chapter 04 | Human Posture Recognition Classifiers <i>Kyaw Kyaw Htike, Othman O. Khalifa, Lai Weng Kin and MD Rafiqul Islam</i> | 22 |
| Chapter 05 | Human Posture Recognition: Methodology and Implementation <i>Kyaw Kyaw Htike, Othman O. Khalifa, and Lai Weng Kin</i> | 32 |
| Chapter 06 | Human Posture Recognition Database and Preprocessing Simulation Results <i>Kyaw Kyaw Htike, Othman O. Khalifa, Rashid Abdallah and Lai Weng Kin</i> | 39 |
| Chapter 07 | Human Posture Recognition Results using Database A <i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i> | 49 |
| Chapter 08 | Human Posture recognition Implementation and Deployment <i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i> | 58 |
| Chapter 09 | Review on Hand Gesture Recognition <i>Sara Bilal and Rini Akmeliawati</i> | 68 |
| Chapter 10 | Computational Intelligence techniques for Hand Gesture Recognition <i>Sara Bilal and Rini Akmeliawati</i> | 77 |
| Chapter 11 | Feature Extraction:Hand Shape, Hand Position and Hand Trajectory Path <i>Sara Bilal and Rini Akmeliawati</i> | 85 |
| Chapter 12 | Towards Malaysian Sign Language Database <i>Haris Al Qodri Maarif, Sara Bilal and Rini Akmeliawati</i> | 92 |
| Chapter 13 | The Development of Malaysian Sign Language Translator : Preliminary results <i>Sara Bilal, Haris Al Qodri Maarif and Rini Akmeliawati</i> | 100 |
| Part II Human Path Detection for Video Surveillance Systems | | |
| Chapter 14 | Introduction to Intelligent Video Surveillance Systems <i>Othman O. Khalifa, Imran Moez Khan, Yusof Zaw Zaw and Lai Weng Kin</i> | 107 |
| Chapter 15 | Human Path Detection : A review <i>Imran Moez Khan, Othman O. Khalifa, Yusof Zaw Zaw, Sheroz Khan and Lai Weng Kin</i> | 113 |

| | | |
|------------|--|-----|
| Chapter 16 | Fuzzy Set Theory <i>Imran Moez Khan, Yusof Zaw Zaw and Othman O. Khalifa</i> | 129 |
| Chapter 17 | The Mamdani Fuzzy Inference Algorithm <i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i> | 138 |
| Chapter 18 | Human Path Classifier Architecture <i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i> | 145 |
| Chapter 19 | Human Motion Detection and Classification <i>Othman O. Khalifa, Mat Kamil Awang and Aisha-Hassan Abdulla</i> | 154 |
| Chapter 20 | Real-Time Human Detection for Video Surveillance <i>Fadhlan H. Kamaru Zaman, Amir A. Shafie and Othman O. Khalifa</i> | 163 |
| Chapter 21 | Human Tracking Algorithm for Video Surveillance <i>Fadhlan H. Kamaru Zaman, Amir A. Shafie and Othman O. Khalifa</i> | 178 |

Part- III Human Identification and Computer Interaction

| | | |
|------------|---|-----|
| Chapter 22 | Automatic Identity Recognition Systems: A Review <i>Assal A. M. Alqudah,, Roziati Zainuddin, Mohammad A. M. Abushariah, and Othman O. Khalifa</i> | 192 |
| Chapter 23 | An Application of Biometric Technology: Iris Recognition <i>Othman O Khalifa, Rashidah F. Olanrewaju and Mohd Fariz Ramli</i> | 206 |
| Chapter 24 | Interactive Voice Response Technology for Telephony System <i>Mohammad A.M. Abu Shariah, R.N. Aionon and Othman O. Khalifa</i> | 213 |
| Chapter 25 | EMG Signal Classification Techniques For The Development Of Human Computer Interaction System <i>Md. Rezwanul Ahsan, Muhammad Ibn Ibrahimyand Othman Omran Khalifa</i> | 224 |
| Chapter 26 | English Digits Speech Recognition System Based on Hidden Markov Models <i>Teddy S. Gunawan, Ahmad A. M. Abushariah, Othman O. Khalifa</i> | 244 |
| Chapter 27 | Signature Recognition Using Artificial Neural Network <i>Ahmad A. M. Abushariah, Teddy S. Gunawan, Othman O. Khalifa, and Jalel Chebil</i> | 255 |
| Chapter 28 | Speaker Recognition Using Mel Frequency Cepstrum <i>Othman O. Khalifa, S. Khan, MD. Rafidul Islam, M. Faizal and D. Dol</i> | 263 |
| Chapter 29 | Handwritten Arabic Word/Character Recognition: Common approaches <i>Assma O. H. , Othman Khalifa and Aisha Hassan</i> | 289 |
| Chapter 30 | Speaker's Variabilities, Technology and Language Issues that Affect Automatic Speech and Speaker Recognition Systems <i>Mohammad A. M. Abushariah, Roziati Zainuddin, Assal A. M. Alqudah, and Othman O. Khalifa</i> | 298 |

| | | |
|------------|---|-----|
| Chapter 31 | Arabic Automatic Continuous Speech Recognition Systems | 306 |
| | <i>Mohammad A. M. Abushariah, Roziati Zainuddin, Assal A. M. Alqudah, and Othman O. Khalifa</i> | |
| Chapter 32 | Face Verification : An Introduction | 317 |
| | <i>Shihab A. Hameed, Waleed A. Badurik</i> | |
| Chapter 33 | Introduction to Fingerprint Verification | 326 |
| | <i>Shihab A. Hameed, Waleed A. Badurik</i> | |
| Chapter 34 | Protein Coding Identification using Modified Gabor Wavelet Transform on Multicore Systems | 334 |
| | <i>Teddy Surya Gunawan</i> | |
| Chapter 35 | Current Trend in Image Guided Surgery (IGS) | 344 |
| | <i>Abdulfattah A. Aboaba, Shihab A. Hameed, Othman O. Khalifa, Aisha H. Abdalla</i> | |

Chapter 4

Human Posture Recognition Classifiers

Kyaw Kyaw Htike¹, Othman O. Khalifa¹, Lai Weng Kin² and MD Rafiqul Islam¹

4.1 INTRODUCTION

Human activities recognition is becoming a field of great interest and relevance to a number of areas of research and applications. The availability of a system capable of automatically classifying the physical activity performed by a human subject is extremely attractive for many applications such as in surveillance and security systems, choreography, sports, virtual reality, human-computer interaction, content-based image and video retrieval, automatic scene understanding and other vision-based interfaces. In particular, there has been incredible growth in the volume of computer vision research geared at understanding human actions and behaviors. These advances range from classification of basic low-level activities such as recognizing someone walking or sitting, to the higher level task of recognizing and interpreting the global behavior of several interacting people [1].

The recognition of human postures is usually the initial step in human behavioral analysis. It is a challenging problem due to the huge quantity of possible cases. The number of postures depends on the degree of freedom of the human body. Moreover, the physical attributes and clothes of a person influence the perception of a particular posture. There are two general techniques for human posture recognition: intrusive and non-intrusive techniques. Intrusive techniques make use of sensors and markers placed on the human body for data acquisition. In contrast, non-intrusive techniques use remote sensing devices such as video cameras for data acquisition. For the purpose of video understanding, non-intrusive techniques are superior to intrusive ones because the observed person is not always cooperative [2].

4.2 Human Posture Recognition Classifiers

The binary preprocessed images (henceforth referred to as training samples) are trained and evaluated with various classifiers whose performances are to be compared. The classifiers used are:

1. Multilayer Perceptron Feed-forward Neural Networks (MLP).
