CONTENTS

	Page No.
Part-I Human Posture Recognition	
Chapter 01 Human Posture Recognition: An Overview <i>Othman O. Khalifa, Kyaw Kyaw Htike, Aisha-Hassab Abdalla and Lai Weng Kin</i>	1
Chapter 02 Human Posture Recognition: Literature review <i>Othman O. Khalifa, Kyaw Kyaw Htike, Lai Weng Kin and A. A. Alkhazmi</i>	7
Chapter 03 Theoretical Background of Human Posture Recognition <i>Kyaw Kyaw Htike, Othman O. Khalifa, Sheroz Khan and Lai Weng Kin</i>	15
Chapter 04 Human Posture Recognition Classifiers <i>Kyaw Kyaw Htike, Othman O. Khalifa, Lai Weng Kin and MD Rafiqul Islam</i>	22
Chapter 05 Human Posture Recognition: Methodology and Implementation <i>Kyaw Kyaw Htike, Othman O. Khalifa, and Lai Weng Kin</i>	32
Chapter 06 Human Posture Recognition Database and Preprocessing Simulation Results <i>Kyaw Kyaw Htike, Othman O. Khalifa, Rashid Abdallah and Lai Weng Kin</i>	39
Chapter 07 Human Posture Recognition Results using Database A <i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i>	49
Chapter 08 Human Posture recognition Implementation and Deployment <i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i>	58
Chapter 09 Review on Hand Gesture Recognition <i>Sara Bilal and Rini Akmeliawati</i>	68
Chapter 10 Computational Intelligence techniques for Hand Gesture Recognition <i>Sara Bilal and Rini Akmeliawati</i>	77
Chapter 11 Feature Extraction: Hand Shape, Hand Position and Hand Trajectory Path <i>Sara Bilal and Rini Akmeliawati</i>	85
Chapter 12 Towards Malaysian Sign Language Database <i>Haris Al Qodri Maarif, Sara Bilal and Rini Akmeliawati</i>	92
Chapter 13 The Development of Malaysian Sign Language Translator : Preliminary results <i>Sara Bilal, Haris Al Qodri Maarif and Rini Akmeliawati</i>	100
 Part II Human Path Detection for Video Surveillance Systems	
Chapter 14 Introduction to Intelligent Video Surveillance Systems <i>Othman O. Khalifa, Imran Moez Khan, Yusof Zaw Zaw and Lai Weng Kin</i>	107
Chapter 15 Human Path Detection : A review <i>Imran Moez Khan, Othman O. Khalifa, Yusof Zaw Zaw, Sheroz Khan and Lai Weng Kin</i>	113

Chapter 16	Fuzzy Set Theory <i>Imran Moez Khan, Yusof Zaw Zaw and Othman O. Khalifa</i>	129
Chapter 17	The Mamdani Fuzzy Inference Algorithm <i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i>	138
Chapter 18	Human Path Classifier Architecture <i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i>	145
Chapter 19	Human Motion Detection and Classification <i>Othman O. Khalifa, Mat Kamil Awang and Aisha-Hassan Abdulla</i>	154
Chapter 20	Real-Time Human Detection for Video Surveillance <i>Fadhlan H. Kamaru Zaman, Amir A. Shafie and Othman O. Khalifa</i>	163
Chapter 21	Human Tracking Algorithm for Video Surveillance <i>Fadhlan H. Kamaru Zaman, Amir A. Shafie and Othman O. Khalifa</i>	178

Part- III Human Identification and Computer Interaction

Chapter 22	Automatic Identity Recognition Systems: A Review <i>Assal A. M. Alqudah,, Roziati Zainuddin, Mohammad A. M. Abushariah, and Othman O. Khalifa</i>	192
Chapter 23	An Application of Biometric Technology: Iris Recognition <i>Othman O Khalifa, Rashidah F. Olanrewaju and Mohd Fariz Ramli</i>	206
Chapter 24	Interactive Voice Response Technology for Telephony System <i>Mohammad A.M. Abu Shariah, R.N. Ainon and Othman O. Khalifa</i>	213
Chapter 25	EMG Signal Classification Techniques For The Development Of Human Computer Interaction System <i>Md. Rezwanul Ahsan, Muhammad Ibn Ibrahimyand Othman Omran Khalifa</i>	224
Chapter 26	English Digits Speech Recognition System Based on Hidden Markov Models <i>Teddy S. Gunawan, Ahmad A. M. Abushariah, Othman O. Khalifa</i>	244
Chapter 27	Signature Recognition Using Artificial Neural Network <i>Ahmad A. M. Abushariah, Teddy S. Gunawan, Othman O. Khalifa, and Jalel Chebil</i>	255
Chapter 28	Speaker Recognition Using Mel Frequency Cepstrum <i>Othman O. Khalifa, S. Khan, MD. Rafidul Islam, M. Faizal and D. Dol</i>	263
Chapter 29	Handwritten Arabic Word/Character Recognition: Common approaches <i>Assma O. H. , Othman Khalifa and Aisha Hassan</i>	289
Chapter 30	Speaker's Variabilities, Technology and Language Issues that Affect Automatic Speech and Speaker Recognition Systems <i>Mohammad A. M. Abushariah, Roziati Zaimuddin, Assal A. M. Alqudah, and Othman O. Khalifa</i>	298

Chapter 31	Arabic Automatic Continuous Speech Recognition Systems <i>Mohammad A. M. Abushariah, Roziati Zainuddin, Assal A. M. Alqudah, and Othman O. Khalifa</i>	306
Chapter 32	Face Verification : An Introduction <i>Shihab A. Hameed, Waleed A. Badurik</i>	317
Chapter 33	Introduction to Fingerprint Verification <i>Shihab A. Hameed, Waleed A. Badurik</i>	326
Chapter 34	Protein Coding Identification using Modified Gabor Wavelet Transform on Multicore Systems <i>Teddy Surya Gunawan</i>	334
Chapter 35	Current Trend in Image Guided Surgery (IGS) <i>Abdulfattah A. Aboaba, Shihab A. Hameed, Othman O. Khalifa, Aisha H. Abdalla</i>	344

Chapter 28

SPEAKER RECOGNITION USING MEL FREQUENCY CEPSTRUM

Othman O. Khalifa, S. Khan, MD. Rafidul Islam, M. Faizal and D. Dol

28.1. Introduction

Automatic speaker recognition is the use of a machine (i.e. software or hardware) to recognize a person from a spoken phrase. This is done by identifying characteristic acoustic features of their voice which is unique. This makes it possible to use the speaker's voice to verify their identity and can be used to control access to services such as voice dialing, banking by telephone, database access service, security control for confidential information area and remote access to computers. Basically prior to a verification or identification session, users that are authorized to use the system will need to undergo enrollment session, where they provide speech samples that will be processed and stored in the database in order to be used later during the identification process. Here only certain important features that are unique to individuals are extracted while other redundancies are discarded.

The use of personal features, unique to all human being to identify or to verify a person's identity is a field that is being actively researched. This can be seen in the usage of finger print, retina pattern and voice pattern in various applications to identify or to verify the identity of an individual. The use of fingerprint is perhaps one of the earliest applications of biometrics or personal features, to identify a person. Here in this review the focus is more on voice identification. Speaker or voice verification / identification can be classified as shown in figure 28.1. The speaker recognition system consists of the following steps :Speaker identification; in this system, when a user inputs a test utterance, the system will identify which of the speaker made the utterance according to the speech patterns stored in the database. Therefore here the output will be either the name of the user or the system will reject if the users speech pattern is not in the database.
