## CONTENTS

		Page No.
<b>Part-I Human Posture Recognition</b>		
Chapter 01	Human Posture Recognition: An Overview <i>Othman O. Khalifa, Kyaw Kyaw Htike, Aisha-Hassab Abdalla and Lai Weng Kin</i>	1
Chapter 02	Human Posture Recognition: Literature review <i>Othman O. Khalifa, Kyaw Kyaw Htike, Lai Weng Kin and A. A. Alkhazmi</i>	7
Chapter 03	Theoretical Background of Human Posture Recognition <i>Kyaw Kyaw Htike, Othman O. Khalifa, Sheroz Khan and Lai Weng Kin</i>	15
Chapter 04	Human Posture Recognition Classifiers <i>Kyaw Kyaw Htike, Othman O. Khalifa, Lai Weng Kin and MD Rafiqul Islam</i>	22
Chapter 05	Human Posture Recognition: Methodology and Implementation <i>Kyaw Kyaw Htike, Othman O. Khalifa, and Lai Weng Kin</i>	32
Chapter 06	Human Posture Recognition Database and Preprocessing Simulation Results <i>Kyaw Kyaw Htike, Othman O. Khalifa, Rashid Abdallah and Lai Weng Kin</i>	39
Chapter 07	Human Posture Recognition Results using Database A <i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i>	49
Chapter 08	Human Posture recognition Implementation and Deployment <i>Kyaw Kyaw Htike, Othman O. Khalifa and and Lai Weng Kin</i>	58
Chapter 09	Review on Hand Gesture Recognition <i>Sara Bilal and Rini Akmeliawati</i>	68
Chapter 10	Computational Intelligence techniques for Hand Gesture Recognition <i>Sara Bilal and Rini Akmeliawati</i>	77
Chapter 11	Feature Extraction: Hand Shape, Hand Position and Hand Trajectory Path <i>Sara Bilal and Rini Akmeliawati</i>	85
Chapter 12	Towards Malaysian Sign Language Database <i>Haris Al Qodri Maarif, Sara Bilal and Rini Akmeliawati</i>	92
Chapter 13	The Development of Malaysian Sign Language Translator : Preliminary results <i>Sara Bilal, Haris Al Qodri Maarif and Rini Akmeliawati</i>	100
<b>Part II Human Path Detection for Video Surveillance Systems</b>		
Chapter 14	Introduction to Intelligent Video Surveillance Systems <i>Othman O. Khalifa, Imran Moez Khan, Yusof Zaw Zaw and Lai Weng Kin</i>	107
Chapter 15	Human Path Detection : A review <i>Imran Moez Khan, Othman O. Khalifa, Yusof Zaw Zaw, Sheroz Khan and Lai Weng Kin</i>	113

Chapter 16	Fuzzy Set Theory <i>Imran Moez Khan, Yusof Zaw Zaw and Othman O. Khalifa</i>	129
Chapter 17	The Mamdani Fuzzy Inference Algorithm <i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i>	138
Chapter 18	Human Path Classifier Architecture <i>Imran Moez Khan, Yusof Zaw Zaw, Othman O. Khalifa and Lai Weng Kin</i>	145
Chapter 19	Human Motion Detection and Classification <i>Othman O. Khalifa, Mat Kamil Awang and Aisha-Hassan Abdulla</i>	154
Chapter 20	Real-Time Human Detection for Video Surveillance <i>Fadhlan H. Kamaru Zaman, Amir A. Shafie and Othman O. Khalifa</i>	163
Chapter 21	Human Tracking Algorithm for Video Surveillance <i>Fadhlan H. Kamaru Zaman, Amir A. Shafie and Othman O. Khalifa</i>	178

### **Part- III Human Identification and Computer Interaction**

Chapter 22	Automatic Identity Recognition Systems: A Review <i>Assal A. M. Alqudah,, Roziati Zainuddin, Mohammad A. M. Abushariah, and Othman O. Khalifa</i>	192
Chapter 23	An Application of Biometric Technology: Iris Recognition <i>Othman O Khalifa, Rashidah F. Olanrewaju and Mohd Fariz Ramli</i>	206
Chapter 24	Interactive Voice Response Technology for Telephony System <i>Mohammad A.M. Abu Shariah, R.N. Ainon and Othman O. Khalifa</i>	213
Chapter 25	EMG Signal Classification Techniques For The Development Of Human Computer Interaction System <i>Md. Rezwanul Ahsan, Muhammad Ibn Ibrahimyand Othman Omran Khalifa</i>	224
Chapter 26	English Digits Speech Recognition System Based on Hidden Markov Models <i>Teddy S. Gunawan, Ahmad A. M. Abushariah, Othman O. Khalifa</i>	244
Chapter 27	Signature Recognition Using Artificial Neural Network <i>Ahmad A. M. Abushariah, Teddy S. Gunawan, Othman O. Khalifa, and Jalel Chebil</i>	255
Chapter 28	Speaker Recognition Using Mel Frequency Cepstrum <i>Othman O. Khalifa, S. Khan, MD. Rafidul Islam, M. Faizal and D. Dol</i>	263
Chapter 29	Handwritten Arabic Word/Character Recognition: Common approaches <i>Assma O. H. , Othman Khalifa and Aisha Hassan</i>	289
Chapter 30	Speaker's Variabilities, Technology and Language Issues that Affect Automatic Speech and Speaker Recognition Systems <i>Mohammad A. M. Abushariah, Roziati Zaimuddin, Assal A. M. Alqudah, and Othman O. Khalifa</i>	298

Chapter 31	Arabic Automatic Continuous Speech Recognition Systems <i>Mohammad A. M. Abushariah, Roziati Zainuddin, Assal A. M. Alqudah, and Othman O. Khalifa</i>	306
Chapter 32	Face Verification : An Introduction <i>Shihab A. Hameed, Waleed A. Badurik</i>	317
Chapter 33	Introduction to Fingerprint Verification <i>Shihab A. Hameed, Waleed A. Badurik</i>	326
Chapter 34	Protein Coding Identification using Modified Gabor Wavelet Transform on Multicore Systems <i>Teddy Surya Gunawan</i>	334
Chapter 35	Current Trend in Image Guided Surgery (IGS) <i>Abdulfattah A. Aboaba, Shihab A. Hameed, Othman O. Khalifa, Aisha H. Abdalla</i>	344

# **Chapter 34**

## **Protein Coding Identification Using Modified Gabor Wavelet Transform on Multicore Systems**

### **34.1 Introduction**

The gene identification problem, which identifies the protein-coding regions (exons) in DNA sequences through computational means, is of great importance nowadays. A DNA sequence can be divided into genes and intergenic spaces. In eukaryotic genes, these regions can be divided into two sub-regions called coding regions (exons) and non-coding regions (introns). The intergenic and intronic regions make up most of the genome. For example, in the human genome, the exonic fraction is as low as 2%. It is well known that protein-coding regions of DNA sequences tend to exhibit a period-3 pattern because of the codon structure involved in the translation of base sequences into amino acids [1-4]. Many researchers have regarded the period-3 property to be a good indicator of gene location.

Previous digital signal processing methods for the identification of exons in DNA sequences include the sliding window discrete Fourier transform (DFT) [1, 2], the anti-notch IIR filter, and the multi-stage bandpass filter centered at  $2\pi/3$  [4]. The multi-stage bandpass filter is of particular interest because it can be used to suppress the  $1/f$  noise exhibited by DNA sequences of many organisms in general [4, 5].

Previous researches on genomic signal processing used fixed window length, i.e. 351 samples [1], which limited the ability to identify protein coding regions of various DNA sequences. In [6], a new method was introduced based on a modified Gabor-wavelet transform. The method analyzed periodic signal components with independent window length in which it outperformed other methods identification accuracy.

Identification of protein coding regions is a time consuming process, especially on large data sets. Nowadays multicore system which integrates two or more independent cores into a single package becomes common computing platform. To harness the power of multicore
