TABLE OF CONTENTS

No.	Title	Page No.
	Acknowledgement	V
	Preface	vi
	Part 1: Internet Engineering Task Force (IETF) Approaches for Multicast and Mobility Management	1
1	Introduction to Multicast Mobility Management Aisha Hassan Abdalla Hashim, Shihab A. Hameed, Jamal Ibrahim Daoud	2
2	Research Direction in Mobile IPv6 Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim, Sellami Ali, Wajdi Al-Khateeb	9
3	Operation of Context Transfer Protocol Aisha Hassan Abdalla Hashim, Othman Khalifa, Azana Hafizah Mohd Aman, Farhat Anwar, Shihab A. Hameed	15
4	The Study of Multicast Hierarchical Mobile IPv6 Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim, Akram M. Zeki	21
5	The Study Of Multicast Listener Discovery Aisha Hassan Abdalla Hashim, lmad Fakhri Taha Alshaikhli, Azana Hafizah Mohd Aman, Sellami Ali	27
6	MIPv6 Based Approaches for Mobility Management Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim, Imad Fakhri Taha Alshaikhli	32
7	HMIPv6 Based Approaches for Mobility Management Aisha Hassan Abdalla Hashim, Wajdi Al-Khateeb, Farhat Anwar, Azana Hafizah Mohd Aman	36

Part 2: Extensions to Mobile Multicast Schemes

8	Introduction to Mobility Multicast Schemes Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman, Sellami Ali, Othman Khalifa	42
9	Qualitative Study of Mobility Management Approaches Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim, Imad Fakhri Taha Alshaikhli, Farhat Anwar	48
10	Architecture of M-HMIPv6/CXTP Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman	53
11	Intra Domain Movement of M-HMIPv6/CXTP Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim	58
12	Inter Domain Movement of M-HMIPv6/CXTP Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim	64
13	Message Format of M-HMIPv6/CXTP Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman	70
14	Signaling Flow of M-HMIPv6/CXTP Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim	76
15	Development of the Service Recovery Time and Signaling Cost Function Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman	83
16	Evaluation Methods in Computer Networking Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman	88
17	Ns2 Simulation Environment in M-HMIPv6 Omer Mahmoud, Azana Hafizah Mohd Aman	93
18	Service Recovery of Multicast Hierarchical Mobile IPv6 with Context Transfer Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman	101
19	The Study of Signaling Cost Of M-HMIPv6 with Context Transfer Aisha Hassan Abdalla Hashim, Azana Hafizah Mohd Aman	106
20	Simulation Study of HMIPv6 And M-HMIPv6/CXTP Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim	112

21	Packet Loss in M-HMIPv6 with Context Transfer Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim	118
22	Evaluation of Handover Latency in M-HMIPv6 with Context Transfer Azana Hafizah Mohd Aman, Aisha Hassan Abdalla Hashim	124
23	Future Directions Azana Hafizah Mohd Aman, Omer Mahmoud, Aisha Hassan Abdalla Hashim	128
24	MIPv6 Extensions Abdulrhman Mohammed Bin Mahfodh, Abdi Nasir Ahmed, Aisha Hassan AbdalllaHashim, Omer Mahmoud, Md. Rafiqul Islam	133
25	IP Multicast Abdulrhman Mohammed Bin Mahfodh, Abdi Nasir Ahmed, Aisha Hassan AbdalllaHashim, Md. Rafiqul Islam, Rashid Abdelhaleem Saced	139
26	Mobility Approaches to Support IP Multicast Abdulrhman Mohammed Bin Mahfodh, Abdi Nasir Ahmed, Aisha Hassan AbdalllaHashim, Rashid Abdelhaleem Saeed, Omer Mahmoud	144
27	Hierarchichal Mobile Multicast Context Transfer (HMMCT) Abdulrhman Mohammed Bin Mahfodh, Abdi Nasir Ahmed, Aisha Hassan AbdalllaHashim, Omer Mahmood, Rashid Abdelhaleem Saeed	152
28	Simulation Evaluation of HMMCT Abdulrhman Mohammed Bin Mahfodh, Abdi Nasir Ahmed, Aisha Hassan AbdalllaHashim, Omer Mahmood, Rashid Abdelhaleem Saeed	157
29	Analytical Study of HMMCT Abdulrhman Mohammed Bin Mahfodh, Abdi Nasir Ahmed, Aisha Hassan Abdalla Hashim, Faiz Ahmed Mohamed Elfaki, Rashid Saad	165
	Part 3: QoS Approaches	
30	Introduction to QoS Approaches in Mobile Ad Hoc Networks	171
	Mohammad Qabajeh, Aisha-Hassan A. Hashim, Othman Khalifa, Liana Qabajeh, Akram M. Zeki	

31	Routing Protocols For Ad Hoc Wireless Networks	176
	Mohammad Qabajeh, Aisha-Hassan A. Hashim, Othman Khalifa, Liana Qabajeh, Gharib Subhi Mahmoud Ahmed	
32	Quality of Service (QoS) Issues In Manets	181
	Mohammad Qabajeh, Aisha-Hassan A. Hashim, Othman Khalifa, Liana Qabajeh, Jamal Ibrahim Daoud	
33	Supporting QoS Multicast Routing Over Mobile Ad Hoc Networks	186
	Mohammad Qabajeh, Aisha-Hassan A. Hashim, Othman Khalifa, Liana Qabajeh	
34	Position-Based Routing Protocols For Ad-Hoc Networks	191
	Mohammad Qabajeh, Aisha-Hassan A. Hashim, Othman Khalifa, Liana Qabajeh	
35	Simulation in Wireless Networks: An Overview	196
	Mohammad Qabajeh, Aisha-Hassan A. Hashim, Othman Khalifa, Liana Qabajeh , Faiz Ahmed Mohamed Elfaki	

ROUTING PROTOCOLS FOR AD HOC WIRELESS NETWORKS

31.1 INTRODUCTION

Routing protocols are an activity or a function that is responsible for exchanging the route information, finding feasible paths between origin and destination and gathering information about the path break[1, 2]. Routing protocols used in traditional wired networks cannot be directly applied in Ad hoc wireless networks. This is due to challenges characteristics of Ad hoc network including dynamic topology, lack of infrastructure, . Bandwidth constraint and shared wireless channel and Limited resources Therefore, routing in Ad hoc networks is a challenging task.

Routing protocols in general have two main different stages; they are routediscovery and data forwarding. In route discovery phase, route to a destination will be discovered by initiating route discovery request. Once the route has been established, data forwarding will be initiated and sent via the discovered routes. There are many routing protocols that have been proposed for Ad hoc networks. Some of the classifications of the routing protocols that are directly related to this research will be reviewed in the following subsections.

31.2. Classifications of Routing Protocols in Ad-Hoc Networks

Routing protocols for Ad-Hoc networks can be classified into several types based on different criteria. In this section we present the classification of routing protocols based on routing topology, information maintained at intermediate nodes, role assigned to the participating nodes and based on type of cast property.

Classification based on routing topology

Ad-Hoc wireless networks routing protocols in general can be classified based on the routing topology into two main categories: *topology-based* and *position-based*[1].

Topology-based routing protocols use information about links that exist in the network to perform packet forwarding. They are, in turn, divided into three categories: proactive (table-driven or periodic) protocols, reactive (demand-driven or source-initiated) protocols, and hybrid (hierarchical or (reactive/proactive)) protocols[3].

In *proactive routing protocols*, the nodes are required to maintain the network topology information in the form of routing tables by exchanging the routing information periodically. In a proactive protocol, the information to determine the routes is immediately available so no additional time is needed to discover the hops in a route, thus
