# 9. CONTROL PANEL AND SCREEN SAVERS

---

Asadullah Shah, Muniba Shaikh and Imad Fakhri Taha Alshaikhli  
Department of Computer Science, Faculty of Information and  
Communication Technology, International Islamic University Malaysia,  
Malaysia

## **Abstract**

A screen saver is an image that can be pasted on the screen to provide background information. Many such screen saver programs are provided by the vendors in a packaging agreement and can be used by choice from all to have one on the screen. This chapter will demonstrate the way these savers can be chosen and saved on the screen as long as required.

## **9.1 Introduction**

Control panel is a part of Windows Graphical User Interface that contains a collection of programs which allow user to setting and control the windows. In the control panel, user can set the basic system settings, such as add/remove programs, date and time, regional settings, controlling user accounts, and much more.

## **9.2 Control panel**

The Control Panel is a part of the Microsoft Windows graphical user interface which allows users to view and manipulate basic system settings and controls via applets, such as adding hardware, adding and removing software, controlling user accounts, and changing accessibility options. Additional applets can be provided by third party software.
