Abstract

There are many subsystems in computer systems, setting a clock for time, date, month and years is possible. This setting can be changed automatically or adjusted accordingly. In this simple task, students will learn how to adjust these settings for the systems.

11.1 Introduction

When user set display configuration options for dates, times and numbers in the Operating System, these settings affect the Date dialog box and other operating system windows. The windows software also adopts those setting while user enters dates, times and number (including currency) in the document.

11.2 Date and time

11.2.1 Changing the Regional and Language Options

You can use the Regional and Language Options tool in Control Panel to customize the way Windows handles dates, times, currency values, and numbers.
