## Abstract

Image processing software are quite versatile and allow users much more flexibility to enhance, improve, clone the images. By using all such techniques images can be created or modified and shaped in a new form with different look and appearance, a better view.

## 25.1 Introduction

User can use the Clone tool to paint content on video or animation frames. To use the Clone tool, user can set a sampling point on the area you want to copy (clone) the pixels from and paint over another area. To paint with the most current sampling point whenever you stop and resume painting, select the Aligned option. Deselect the Aligned option to paint starting from the initial sampling point no matter how many times you stop and resume painting.

## 25.2 Objectives

- Use Blur Tool
- Use of Paint Bucket & Gradient tool
- Using eraser
- Using Clone Tool

## 25.3 Paint bucket Exercise one

Make the image look like this
