SELECTED TOPICS IN
ADVANCED ELECTRONICS

CONTENTS

Chapter 1.......................................................................................................................... 1
WIRELESS CONNECTIVITY OF PC PERIPHERALS USING ULTRAWIDE
BAND (UWB) PULSES
Khalid A. S. Al-Khateeb and Ahmed Ramzi Mohammed

Chapter 2 .......................................................................................................................... 11
VOLTAGE CONTROLLED OSCILLATOR FOR STANDARD GSM USING
MEMS
Khalid A. S. Al-Khateeb

Chapter 3 .......................................................................................................................... 23
MEMS SURFACE ACOUSTIC WAVES OSCILLATOR
Jamilah Karim, Anis Nurashikin Nordin and AHM Zahirul Alam

Chapter 4 .......................................................................................................................... 37
USING MEMS IN CLASS D AMPLIFIERS FOR STANDARD GSM
CARRIER
Khalid A. S. Al-Khateeb

Chapter 5 .......................................................................................................................... 52
MEMS CAPACITIVE ULTRASONIC TRANSDUCERS
Khalid A. S. Al-Khateeb

Chapter 6 .......................................................................................................................... 57
DESIGN OF MEMS CANTILEVER ENERGY HARVESTER
Anis Nurashikin Nordin and Aliza Aini Md Ralib

Chapter 7 .......................................................................................................................... 67
THEORY OF QUANTUM CRYPTOGRAPHY
Ali Sallami and Khalid A. S. Al-Khateeb

Chapter 8 .......................................................................................................................... 77
QUANTUM KEY DISTRIBUTION PROTOCOLS
Ali Sallami and Khalid A. S. Al-Khateeb
Chapter 9. FPGA CONTROL OF QUANTUM CHANNEL SECURITY
Khalid A. S. Al-Khateeb and Mohammed Munther A. Majeed

Chapter 10. THE DECOY STATE METHOD IN QUANTUM KEY DISTRIBUTION
Ali Sallami, Khalid A. S. Al-Khateeb and Mohamad Ridza Wahiddin

Chapter 11. EAVESDROPPING ATTACKS ON QKD CHANNELS
Ali Sallami and Khalid A. S. Al-Khateeb

Chapter 12. SECURITY PERFORMANCE OF QKD
Sellami Ali and Khalid A. S. Al-Khateeb

Chapter 13. THEORETICAL ANALYSIS OF A DOUBLE STAGES ERBIUM DOPED FIBER AMPLIFIER
Khalid A. S. Al-Khateeb and M. A. Mohammed

Chapter 14. THEORY OF ERBIUM DOPED FIBER LASERS (EDFLS) AND ERBIUM DOPED FIBER AMPLIFIERS (EDFAS)
Sellami Ali and Khalid A. S. Al-Khateeb

Chapter 15. ERBIUM DOPED FIBER LASERS WITH DOUBLE TUNABLE BANDPASS FILTER
Ali Sallami, Khalid Al-Khateeb and Bouzid Billoui

Chapter 16. ERBIUM DOPED FIBER AMPLIFIER WITH A QUADRUPLE PASS
Sellami Ali, Khalid A. S. Al-Khateeb and Bouzid Billoui

Chapter 17. TRANSPARENT ELECTRODES FOR OPTOELECTRONIC DISPLAYS
Khalid A. S. Al-Khateeb

Chapter 18. EPITAXIAL GROWTH OF THIN ZnS FILMS
Khalid A. S. Al-Khateeb

Chapter 19. MODERN ELECTRONIC DISPLAY SYSTEMS
Khalid A. S. Al-Khateeb and Moaaz Elhag Ali
Chapter 20 ................................................................................................................. 230
AVALANCHE PHOTO DIODES AS SINGLE PHOTON DETECTORS
Khalid A. S. Al-Khateeb

Chapter 21 ................................................................................................................. 243
COOLING TECHNIQUES FOR SINGLE PHOTON AVALANCHE DIODE
Nurul Fadzlin Hasbullah, Nurul Izzati Samsuddin and Salmiah Ahmad

Chapter 22 ................................................................................................................. 256
SUPERVisory CONTROL AND DATA AQUISITION SYSTEM (SCADA)
USING MICROCONTROLLER
Khalid A. S. Al-Khateeb and Mohamad Azman Shah

Chapter 23 ................................................................................................................. 268
ELECTRONIC REMOTE MONITORING OF INDUSTRIAL SYSTEMS
Khalid A. S. Al-Khateeb

Chapter 24 ................................................................................................................. 276
MEDICAL CARE SYSTEM FOR REMOTE MONITORING OF FOETAL ECG
Khalid A. S. Al-Khateeb and Mohammed I. Ibrahimy

Chapter 25 ................................................................................................................. 287
INTELLIGENT AUTO TRACKING IN 3D SPACE BY IMAGE PROCESSING
Khalid A. S. Al-Khateeb and Othman O. Khalifa

Chapter 26 ................................................................................................................. 300
CIRCUIT DESIGN FOR RADIO FREQUENCY IDENTIFICATION DEVICES (RFID)
Aisyah Jaafer, Nurul Syuhadah Izwar Arfani and Othman O. Khalifa

Chapter 27 ................................................................................................................. 309
DYNAMIC TRAFFIC LIGHT SEQUENCE ALGORITHM USING RFID
Khalid A. S. Al-Khateeb, Jaiz A.Y. Johari and Wajdi F. Al-Khateeb

Chapter 28 ................................................................................................................. 326
ADVANCED RFID SECURITY FRAMEWORK FOR DYNAMIC TRAFFIC MANAGEMENT
Khalid A. S. Al-Khateeb, Jaiz A. Y. Johari

Chapter 29 ................................................................................................................. 337
MODELING CMOS WAFER PRODUCTION LINE USING PROMODEL SOFTWARE
Khalid A. S. Al-Khateeb and Khairul Hakimin B. Zainiddin
Chapter 30.........................................................................................................................348
ASIC DESIGN FLOW
Sreedharan Baskara Dass, Aisha Hassan A. Hashim and Loay Faisal

Chapter 31.........................................................................................................................355
ELECTRONIC DESIGN AUTOMATION TOOLS
Sreedharan Baskara Dass, Aisha Hassan A. Hashim and Loay Faisal

Chapter 32.........................................................................................................................365
CIRCUIT DESIGN OF A CLOCK DATA RECOVERY
Z. M. Ashari and Anis N. Nordin

Chapter 33.........................................................................................................................376
EFFECTS OF NEUTRON IRRADIATION ON VARIOUS ELECTRONIC DEVICES
Nurul Iffah Che Omar and Nurul Fadzlin Hasbullah

Chapter 34.........................................................................................................................384
NEUTRON SOURCE AND NEUTRON SHIELDING
Nurul Iffah Che Omar and Nurul Fadzlin Hasbullah

Chapter 35.........................................................................................................................390
QUANTUM DOTS AS A SOLUTION TO RADIATION HARDNESS
Nurul Iffah Che Omar and Nurul Fadzlin Hasbullah
CHAPTER 15
ERBIUM DOPED FIBER LASERS WITH DOUBLE TUNABLE BANDPASS FILTER

Synopsis
One of the configurations of Erbium Doped Fiber Laser (EDFL) incorporates Linear Cavity with Fiber Loop-Back (FLB) and a Tunable Band-pass Filter (TBF). This configuration suppresses the Amplified Spontaneous Emission (ASE) and achieves a highly stable output power of more than 18dBm at 1560nm. A standard spectrum is obtained with TBF adjustment.

1 Introduction
Tunable single-frequency lasers in the wavelength region 1550nm are of much interest in a variety of applications such as WDM optical communications, spectroscopy, and fiber sensors [1][2]. These lasers have potential advantages because of their narrow line-width and low intensity noise. They represent a natural source for fiber optical communications, since the light is already in the fiber and they can be spliced directly to the system. Other advantages include high side mode suppression ratio (SMSR), low threshold, and flat output power. These parameters are important in the design considerations for this type of lasers. Various configurations have been proposed aimed at achieving best combination of these characteristics. They include ring cavity [3] and linear cavity [4] structures. The suggested tuning range in the conventional-band (C-band) and long-band (L-band) is
