## Table of Contents

<b>Preface</b>	<b>iv</b>
<b>Table of Contents</b>	<b>v</b>
<b>Chapter 1</b>	
<i>Experimental analysis and comparison of performance characteristics of catalytic converters</i> A.K.M. Mohiuddin	<i>1</i>
<b>Chapter 2</b>	
<i>Experimental analysis and simulation of catalytic converters</i> A.K.M. Mohiuddin	<i>8</i>
<b>Chapter 3</b>	
<i>Thermal design of mechanical devices using expert system</i> A.K.M. Mohiuddin	<i>14</i>
<b>Chapter 4</b>	
<i>Exhaust system optimization using GT- Power</i> A.K.M. Mohiuddin	<i>21</i>
<b>Chapter 5</b>	
<i>Experimental analysis to determine the relationship between noise and back pressure for muffler design – Part I:     Muffler design requirements</i> A.K.M. Mohiuddin	<i>29</i>
<b>Chapter 6</b>	
<i>Experimental analysis to determine the relationship between noise and back pressure for muffler design – Part     II: Experimental results</i> A.K.M. Mohiuddin	<i>36</i>
<b>Chapter 7</b>	
<i>2<sup>nd</sup> Generation IIUM Buggy Car – Part I: Design</i> A.K.M. Mohiuddin	<i>42</i>
<b>Chapter 8</b>	
<i>2<sup>nd</sup> Generation IIUM Buggy Car – Part II: Fabrication</i> A.K.M. Mohiuddin	<i>48</i>
<b>Chapter 9</b>	
<i>Robust design optimization of valve timing using multi-objective genetic algorithm (MOGA)</i> A.K.M. Mohiuddin and Yap Haw Shin	<i>53</i>
<b>Chapter 10</b>	
<i>A study of an aftermarket voltage stabilizer for its performance and emission on passengers vehicle</i> A.K.M. Mohiuddin, Sany Izan Ihsan and Noor Azammi Abd Murat	<i>60</i>

<b>Chapter 11</b>		
	<i>Investigation of engine performance using designed swirl adapter</i>	67
	A.K.M. Mohiuddin	
<b>Chapter 12</b>		
	<i>Comparison of various types of powertrain used in automotive vehicles in terms of performance and emission</i>	74
	A.K.M. Mohiuddin and Ali Faiz	
<b>Chapter 13</b>		
	<i>Automotive catalytic converters: Current status and some future perspectives</i>	80
	A.K.M. Mohiuddin and Jalal Mohammed Zayan	
<b>Chapter 14</b>		
	<i>3-Cylinder gasoline direct injection as opposed to 4-cylinder multi-port fuel injection for lower fuel consumption and NO<sub>x</sub> emission</i>	86
	A.K.M. Mohiuddin and Anwar bin Mohd Sood	
<b>Chapter 15</b>		
	<i>Investigation of Spark Ignition Multipoint Engine Using Water Addition - Part I: Simulation</i>	92
	A.K.M. Mohiuddin and Mohammad Edilan Bin Mustaffa	
<b>Chapter 16</b>		
	<i>Investigation of Spark Ignition Multipoint Engine Using Water Addition - Part II: Performance and Emission</i>	101
	A.K.M. Mohiuddin and Mohammad Edilan Bin Mustaffa	
<b>Chapter 17</b>		
	<i>Thermodynamic Analysis of Combustion of CAMPRO CFE Engine – Part I: Simulation</i>	109
	A.K.M. Mohiuddin, Izzarief Bin Zahari and Abdullah Aiman	
<b>Chapter 18</b>		
	<i>Thermodynamic Analysis of Combustion of CAMPRO CFE Engine – Part II: Combustion Analysis</i>	116
	A.K.M. Mohiuddin, Izzarief Bin Zahari and Abdullah Aiman	
<b>Chapter 19</b>		
	<i>Development of Low Cost Catalytic Converter from Non-Precious Metals</i>	123
	A.K.M. Mohiuddin	
<b>Chapter 20</b>		
	<i>Performance Investigation of Energy Efficient Hybrid Engine towards Green Technology</i>	131
	Ataur Rahman	
<b>Chapter 21</b>		
	<i>Production of Aluminum-Silicon Carbide Composites Using Powder Metallurgy at Sintering Temperatures above the Aluminum Melting Point Part II</i>	138
	Yasin Nimir	
<b>Chapter 22</b>		
	<i>Comparison between composites reinforced with natural and synthetic fibers: Part I</i>	143
	Yasin Nimir	

<b>Chapter 23</b>		
	<i>Comparison between composites reinforced with natural fibres and synthetic fibres Part II</i>	151
	Yasin Nimir	
<b>Chapter 24</b>		
	<i>Production of Aluminium reinforced with SiC particulates using powder metallurgy</i>	156
	Yassin Nimir	
<b>Chapter 25</b>		
	<i>Development of automatic magnetic particle system for automotive parts inspection</i>	160
	Mefah Hrairi, Mohd Shah Bin Rizal, Salah Echrif	
<b>Chapter 26</b>		
	<i>Performance of an Automatic Magnetic Particle Inspection of Automotive Parts</i>	166
	Mefah Hrairi, Mohd Shah Bin Rizal, Salah Echrif	
<b>Chapter 27</b>		
	<i>Numerical simulation of complex turbulent flows</i>	172
	Asif Hoda	
<b>Chapter 28</b>		
	<i>Direct numerical simulation (DNS) and large eddy simulation (LES)</i>	177
	Asif Hoda	
<b>Chapter 29</b>		
	<i>Reynolds averaged navier stokes (RANS) Simulation</i>	182
	Asif Hoda	
<b>Chapter 30</b>		
	<i>Film Cooling of Turbine Blades</i>	192
	Asif Hoda	

## Direct numerical simulation (DNS) and large eddy simulation (LES)

Asif Hoda

Department of Mechanical Engineering, International Islamic University Malaysia

**Introduction**

The most reliable and accurate prediction of turbulent shear flows can be obtained by solving the full Navier Stokes and energy equations, equations (1)-(3) with the appropriate boundary conditions.

*Continuity:*

$$\frac{\partial \tilde{u}_i}{\partial x_i} = 0 \quad (1)$$

*Momentum:*

$$\frac{\partial \tilde{u}_i}{\partial t} + \tilde{u}_j \frac{\partial \tilde{u}_i}{\partial x_j} = -\frac{1}{\rho} \frac{\partial \tilde{p}}{\partial x_i} + \nu \frac{\partial^2 \tilde{u}_i}{\partial x_j \partial x_j} \quad (2)$$

*Energy:*

$$\frac{\partial \tilde{\theta}}{\partial t} + \tilde{u}_j \frac{\partial \tilde{\theta}}{\partial x_j} = \alpha \frac{\partial^2 \tilde{\theta}}{\partial x_j \partial x_j} \quad (3)$$

Equations (1) through (3) are universally believed to give the exact description of turbulence in fluids and can be solved numerically to obtain solutions for a wide range of flow problems. This solution methodology is called direct numerical simulation (DNS).

**Direct Numerical Simulation**

DNS involves the discretization of the governing equations on a finite difference mesh with appropriate numerical schemes for coupling the continuity and momentum equations. Although the numerical problem is not so severe, the appropriate resolution of the smallest length scales is an essential requirement and places a severe constraint on the finite difference domain to be used for the purpose. The mesh should not only span the entire
