Contents

DEDICATION	<i>iii</i>
ACKNOWLEDGEMENT	<i>iv</i>
1. Transmission Bandwidth Efficiency Enhancement Techniques	1
1.0 Abstract.....	1
1.1 Introduction.....	1
1.2 Analogue Multiplexing.....	2
1.2.1 FDM Multiplexing Concept.....	2
1.2.2 Time Assignment Speech Interpolation.....	3
1.3 References.....	4
2. Digital Multiplexing Techniques	5
2.0 Abstract.....	5
2.1 Digital Speech Interpolation.....	5
2.2 DSI Advantages.....	6
2.2.1 Statistical Time Division Multiplexing.....	6
2.3 Telephone Exchanges.....	7
2.3.1 Circuit Switching.....	7
2.3.2 Packet Switching.....	8
2.4 Private Branch Exchanges.....	8
2.5 References.....	9
3. Low Bit Rate Speech Coding	10
3.0 Abstract.....	10
3.1 Speech Frame Substitution Techniques.....	10
3.2 References.....	11
4. Low Bit Rate Speech Coding Standards	12
4.0 Abstract.....	12
4.1 Introduction.....	12
4.2 Speech Coding Standards and Applications.....	12
4.3 References.....	14
5. Linear Predictive Coding of Speech	15
5.0 Abstract.....	15
5.1 Method.....	15

5.2	Equations.....	16
5.3	References.....	17
6.	Codebook Excited Linear Predictive Coding.....	18
6.0	Abstract.....	18
6.1	CELP Coding Inefficiencies	20
6.2	Codebook Structures.....	20
6.2.1	Gaussian Populated Codebooks.....	21
6.2.2	Sparse Excitation Codebook.....	21
6.2.3	Ternary Codebook.....	21
6.2.4	Algebraic Codebook	21
6.2.5	Overlapping Codebooks.....	21
6.3	References.....	21
7.	Pulse Residual Excited Linear Prediction	22
7.0	Abstract.....	22
7.1	Pulsed Codebook Excitation for CELP Coder.....	22
7.2	Comparison of Pulsed Vector Codebooks	24
7.3	References.....	25
8.	Multi-Pulse Residual Excitation Model (MP-PRE).....	26
8.0	Abstract.....	26
8.1	Spectral Shaping of Pulsed Codebook Excitation	28
8.2	Quality Enhancement with Post-filtering.....	29
8.3	References.....	30
9.	Low Bit Rate Speech Multiplexer Tools	31
9.0	Abstract.....	31
9.1	Introduction	31
9.2	Speech Database	31
9.3	References.....	32
10.	Discontinuous Transmission and Multiplexing	33
10.0	Abstract.....	33
10.1	Voiced Activity Detection Design Perspectives	34
10.2	Comfort Noise Concept.....	35
10.3	References.....	35

11.	Measured Temporal Parameters.....	36
11.0	Abstract.....	36
11.1	Visual Inspection of Speech Signal	36
11.2	VAD Hangover Purpose and Importance.....	43
11.3	References.....	44
12.	Quality Assessments in multiplexing	45
12.0	Abstract.....	45
12.1	Quantisation noise:	45
12.2	Segmental Signal-to-Noise Ratio: SNRseg.....	45
12.3	Frequency Domain Objective Measures	46
12.4	References.....	46
13.	Simulation of speech activities using Markov Model	47
13.0	Abstract.....	47
13.1	The design:	47
13.2	State and State Transition Probabilities.....	48
13.3	Silence State Modelling.....	49
13.4	Transition State from Silence to Talkspurts	51
13.5	Active State Modelling	52
13.6	References.....	53
14.	Packet loss and Frame Substitution Techniques.....	54
14.0	Abstract.....	54
14.1	Method.....	54
14.2	Excitation Recovery.....	55
14.3	Spectral Reconstruction.....	57
14.4	LFR Performance for Random Frame Losses.....	58
14.4.1	For the first lost frame:	58
14.4.2	For the second lost frame:.....	58
14.4.3	For subsequent frame loss:	59
14.5	References.....	59
15.	Speech Quality in Lossy Multiplexing	60
15.0	Abstract.....	60
15.1	Multiplexer simulation	60

15.2	LFR Applications.....	62
15.3	References.....	63
16.	Design of a Low Bit Rate STDM Multiplexer.....	64
16.0	Abstract.....	64
16.1	Introduction	64
16.2	Very Small Aperture Terminal	64
16.3	Single Channel Per Carrier.....	65
16.4	VSAT Applications	65
16.5	Leased Line	66
16.6	Issue of ISDN and VSATS.....	66
16.7	References.....	67
17.	Multiplexing and Operational Scenarios	68
17.0	Abstract.....	68
17.1	Capacity Issues.....	68
17.2	Need for Signalling.....	69
17.3	References.....	69
18.	Low Bit Rate Speech Coders	70
18.0	Abstract.....	70
18.1	Coder Performance	70
18.2	Multiplexer Design	70
18.3	References.....	72
19.	Dynamic Talker Activity Analysis	73
19.0	Abstract.....	73
19.1	Analysis of Traffic Load	74
19.2	Analysis of Speech Freeze-out on a Shared Thin Route Link	76
19.3	References.....	79
20.	DSI Advantage Capability of LFR	80
20.0	Abstract.....	80
20.1	Analysis for Conversational Speech.....	82
20.2	References.....	83
21.	Concept of Frames Discarding and Multiplexing efficiency	84
21.0	Abstract.....	84

- 21.1 References.....88
- 22. Energy as a Criterion for Frame Discarding and Multiplexing efficiency.....89
 - 22.0 Abstract.....89
 - 22.1 References.....91
- 23. LPC Envelope Difference Criterion and Multiplexing efficiency.....92
 - 23.0 Abstract.....92
 - 23.1 References.....94
- 24. Networking Issue95
 - 24.0 Abstract.....95
 - 24.1 Introduction95
 - 24.2 References.....101
- 25. Cyclic Frame Discarding Multiplexer Design102
 - 25.0 Abstract.....102
 - 25.1 Frame Loss for Cyclic Design102
 - 25.2 References.....105
- 26. Speech Frame Sensitivity Based on Mean Square Error Criterion.....106
 - 26.0 Abstract.....106
 - 26.1 Subjective Results:111
 - 26.2 References.....112
- 27. Energy Threshold Sensitivity for Frame Loss113
 - 27.0 Abstract.....113
 - 27.1 References.....118
- 28. Speech quality for Energy Criterion in Multiplexing.....119
 - 28.0 Abstract.....119
 - 28.1 Frame Loss Rate and DSI advantage for LPC Spectrum Distortion.....121
 - 28.2 Objective Measures for LPC Envelope Criterion.....121
 - 28.3 References.....123
- 29. Speech quality for LPC Envelope Criterion.....124
 - 29.0 Abstract.....124
 - 29.1 Advantages and Disadvantage of Criterion Based Frame Discarding Advantages:.....125
 - 29.2 References.....126
