A Brief Overview of the Islamic Financial System	17
Evolution of Islamic Finance	18
Chapter Summary	20
Chapter Questions	21

Acknowledgments

This book would not have come to fruition without the encouragement and support of many individuals. Among them my family, including my mother, wife, and children who understand and appreciate the life and work of an academic the co-authors of this book who were my former PhD students and are now my colleagues, and my students who gave valuable input when a draft of this book was used in class.

Also many thanks to Nick Wallwork and the team from John Wiley & Sons for getting this book published.

—Mohd Azmi Omar

I would like to thank my mother, my wife, and my children for their patience during all this time, for their faith that I could do this difficult task, and for their spirit in always telling me that willpower will destroy all the obstacles in front of us. Thanks also to my guru, Professor Dato' Dr. Mohd Azmi Omar, who has taught me how to be a better person in this university of life.

—Muhamad Abduh

I would like to express my sincere thanks to my family—my parents; my wife (a pediatrician); my three children, Hanifah, Fakhruddin, and Azmi—for their love and support and for inspiring me. My special thanks go to Professor Azmi, from whom I learned a great deal about the supervision approach, the teaching approach, and the motivation approach. His methods were precious lessons to me when I served as a lecturer at Airlangga University, Surabaya, Indonesia.

—Raditya Sukmana

Praise for

Fundamentals of Islamic Money and Capital Markets

A comprehensive guide to understanding Islamic money
and Islamic capital market principles and practices

"What distinguishes this book is its focus on the applied dimension of Islamic capital markets. The emphasis is placed on the operationalization of Islamic capital market ideas in Malaysia, the most dynamic and best regulated financial market in the Muslim world. The book has succeeded in making accessible the knowledge of Islamic financial instruments in simple language. Therefore, it is a very useful source for those seeking practical knowledge of Islamic capital and money market instruments in the current configuration of the Islamic finance industry."

—**Abbas Mirakhor**, Holder of the INCEIF Chair in Islamic Finance

"Professors Omar, Abduh, and Sukmana have done an excellent job in highlighting contemporary issues in their book *Fundamentals of Islamic Money and Capital Markets*. They discuss Islamic derivatives, structured products, exchange-traded funds, sukuk, and Islamic mutual funds with numerous examples. Their treatment of these Islamic finance issues makes this book friendly to students and researchers. It is a must-read for those who want to embark on further studies in Islamic money and capital markets, a relatively new area in the Islamic finance space."

—**Professor Dr. M. Kabir Hassan**, University of New Orleans, USA

"Congratulations to the authors for a well-written and comprehensive book on Islamic financial and derivative markets. The coverage of the subject matter and the structure of the book reflect the vast experience of the authors in explaining complex concepts in a simplified fashion—an art that is hard to master. This is a first-of-its-kind book on the topic that is a must-read for students, academia, and practitioners interested in understanding the complexities of this emerging market. Each chapter exhibits a balanced blend of theory and practice with suitable real-life examples and case studies. The authors have done a great service by contributing a valuable volume to the literature on Islamic finance."

—**Zamir Iqbal**, Principal Financial Officer, The World Bank

Mohd Azmi Omar, PhD, is the Director General of the Islamic Research & Training Institute (IRTI), Islamic Development Bank. He was formerly the Deputy Rector (Deputy Vice-Chancellor) in charge of academics and research at the International Islamic University Malaysia (IIUM). He obtained his bachelor's and master's degrees in finance from Northern Illinois University, USA, and his PhD from Bangor University, United Kingdom.

Muhamad Abduh is the Head of Research of IIUM's International Institute of Islamic Business and Finance (IIIBF) and the editor-in-chief of its official journal, the *Journal of Islamic Finance*.

Dr. Raditya Sukmana is an Assistant Professor in the Department of Islamic Economics, Airlangga University, Surabaya, Indonesia. He obtained his BA in finance from Airlangga University; an MS in economics from Georgia State University, USA; and a PhD in Islamic finance from International Islamic University Malaysia in 2010.
