Table of Contents

Foreword

Chapter 1 Overview of Mobile Learning	1
Chapter 2 Mobile Learning Research Initiatives in Malaysia	9
Chapter 3 Preparing for Mobile Learning: A Readiness Study at Universiti Kebangsaan Malaysia	19
Chapter 4 Readiness for Mobile Learning at a Public University in East Malaysia	27
Chapter 5 The Influence of Demographics on Mobile Learning Readiness: Science versus Social Science Undergraduates	39
Chapter 6 Student Perceptions of a Mobile Learning Environment through Mobile Technology Applications	49
Chapter 7 Mobile Learning: A Quasi-Experiment on Using SMS to Support Reading Comprehension Programme	59
Chapter 8 Mobile Learning in Distance Education: SMS Application in a Physics Course	73
Chapter 9 Adult Learners and Mobile Learning: A Case Study	81
Chapter 10 An Exploration of the Mobile Learning Environment to Support Teacher Training	103
Chapter 11 Learning Development & Evaluation Framework for a Performance-based Environment in TVET	111
Chapter 12 Mobile Pedagogical Agent: A New Approach for Mobile Learning	121
Chapter 13 The Effectiveness of a Web-based Mobile-supported Learning Management System	131

CHAPTER SEVEN

Mobile Learning: A Quasi-Experiment on Using SMS to Support Reading Comprehension Programme

*Nuraihah Mat Daud & Zamnah Husin
International Islamic Universiti of Malaysia*

Introduction

Studies have shown that the ability to read and comprehend is closely correlated to students' academic performance and achievement (Bishop, 2003; Lei, Rhinehart, Howard & Cho, 2010; Brown, 2007; White, 2004). Research on reading reflects that an effective learning approach or method leads to the development of good reading skills (Brantmeier, 2005). The literature has shown the potential of including extensive reading into reading instruction as part of an attempt to develop students' language and reading comprehension skills. Studies on extensive reading indicate that students found the activity worthwhile (Macalister, 2008; Tanaka & Stapleton, 2007).

Extensive reading (ER) is defined as reading "materials in the target language in a rapid and casual way with a focus on quantity rather than quality" (Tanaka & Stapleton, 2007, p. 115). Extensive reading involves reading a large number of reading materials, with focus on meaning rather than on language use (Tran, 2006). Generally, an extensive reading programme is carried out to develop good reading habits, to build up knowledge of vocabulary and structure, and to encourage a penchant for reading (Shen, 2008). Studies have revealed the positive effect of ER on reading comprehension and speed, vocabulary learning, and learners' motivation and attitude towards reading (de Morgado, 2009; Macalister, 2008; Shen, 2008; Tanaka & Stapleton, 2007; Tran, 2006)

Extensive reading is not limited to hardcopies. Reading materials can also be read on a mobile phone. The many benefits of utilising mobile phones in an informal learning setting have sparked interest among educationists. A feature of the mobile phone known as "texting" or "short message service (SMS)" is fast becoming one of the popular communication modes (Librero *et al.*, 2007; Goh & Kinshuk, 2006). Research has cited that students are frequently engaged in text messaging. Thornton and Houser (as cited in Caverly *et al.*, 2009) discovered that 71% of Japanese college students preferred the use of text messages to email and 93% appreciated receiving English lessons sent to their mobile phones. Students are found to be
