The submission of the paper implies and warrants that the article submitted are the author(s)' own work and it does not infringe or violate the rights of anyone else. The author grants the International Association of IT Lawyers (IAITL) the non-exclusive rights to reproduce and distribute in whole or in part, the work submitted to the Conference (Intl. Private Law, International Public Law, Legal security and privacy issues, and International Trade Law Conference) for publication and until further written notice by the Licensor, a perpetual licence covering all future submissions by the Licensor to the IAIT Conferences.

The non-exclusive right include the material in all media including electronic and microfilm and to use the material in conjunction with computer-based electronic information retrieval systems, to grant permissions for photocopying, reproductions and reprints from this book, and to authorize document delivery and abstracting and indexing services provided that any such copy reproduces the AUTHOR's and the Licensor's name and, if inserted by the Licensor, the appropriate copyright notice to run in conjunction with the copyright notice representing the publisher's limited rights.

The Licensor warrants that, as far as it is aware, the material does not and/or will not contain libellous or other unlawful statements and does and/or will not infringe the intellectual property rights of others.

Furthermore, the author(s) understands that it is their sole responsibility to obtain written permission to include any copyrighted materials in his/their article. In addition, all trademark use within the manuscript must be credited to its owner, or written permission to use the name must be granted. The author(s) will hold the publisher harmless from any unlawful matter contained in his submitted work. The author(s) in consideration of the publication of the above named manuscript understand and agree that:

♣ Copyright in the article will remain jointly with the owner of the copyright and the Publisher. By submitting an article to the conference, the owner of the copyright grants the publishers with a license to publish the article.

♣ The Author(s) warrants that he is the owner of all rights of copyright in the article. Where the author subsequently publishes the article, the author is requested to acknowledge the article appeared in the book of proceedings.

♣ The Author(s) will indemnify and defend the Publisher against any claim, demand or recovery against the Publisher by reason of any violation of any proprietary right or copyright, or because of any libellous or scandalous matter contained in the Manuscript.

♣ The Publisher will have the right to edit the work for the original edition and for any revision, provided that the meaning of the text is not materially altered.

♣ This Agreement represents the entire understanding between the parties hereto with respect to the subject matter hereof and this Agreement supersedes all previous representations, understandings of agreements, oral or written, between the parties with respect to subject matter hereof and cannot be modified except by a written instrument signed by the parties hereto.

Fighting Cyberterrorism with Legislative Bullet: Are We Really Ready?

International Islamic University Malaysia
[sonny@iium.edu.my; imadieha@iium.edu.my]

Abstract. National governments around the world have taken legislative steps to provide for stronger measures for fear of being struck by cyber-terrorists. Malaysia is not excluded. This paper examines the nature, scope of cyberterrorism and how it threatens the critical information infrastructure and national security. A brief survey is presented on cyberterrorism laws in the US, UK and Australia. It examines further the recent legislative attempts in Malaysia in countering threats of cyberterrorism with critical analysis and recommendation for improvement.

1. Introduction

Of recent years, the Malaysian government web sites have been targeted by cyber-attacks who were not happy with certain actions taken by the government. Although the effect of the cyber-attacks has been minimal, it has given rise to concerns as to the vulnerability of our national critical information infrastructure (NCII). A computer attack that disrupts non-essential services is at most a costly nuisance. But serious or pre-meditated continuous cyber-attacks against nation’s essential services and critical infrastructures, such as computer systems of aviation traffic control at the airport, or a disclosure of official secrets from military computer system, may cause massive fear and anxiety. What appears like an ordinary cybercrime could turn out to be an act of cyberterrorism.

Cyberterrorism is increasingly popular due to ease and affordability. Cyberterrorism is not restricted by time or space: it can be done virtually from anywhere and anytime. Being able to operate in anonymity provided an additional advantage to the terrorists to hide behind the veil of technology across traditional physical boundaries.

This paper examines the meaning and scope of cyberterrorism. The paper showcases several legislative attempts found in selected jurisdictions i.e. the US, United Kingdom, Australia and finally Malaysia. The objective is to highlight the development of law in countering cyberterrorism that threatens the national critical infrastructure.
