# INTRODUCTION

On behalf of the Islamic Finance Project (IFP) at the Islamic Legal Studies Program (ILSP) of Harvard Law School, I would like to welcome you to the Eleventh Harvard University Forum on Islamic Finance. The Harvard University Forum on Islamic Finance was conceived in 1997 with a view to engaging scholars, practitioners and regulators in Islamic finance sector in productive dialogue. Since its establishment, IFP has been involved in the study of Islamic finance as an interdisciplinary subject, drawing broadly from a variety of fields. IFP organizes academic forums, bringing together scholars and experts in law, finance, economics, and traditional Islamic ethics and law (*fiqh*), to engage leading thinkers and industry leaders in a robust academic environment. Over the years IFP has come to be recognized as a leading research program in the field of Islamic economics, banking and finance. For scholars at Harvard and beyond, IFP serves as a research center that gathers, processes and provides information on academic and practical discourses. For industry professionals, it offers a valuable platform to interact and engage in stimulating ideas and researches setting the agenda and direction for the industry.

Over the years the Harvard University Forum on Islamic Finance has grown from a small one-day affair to a major multi-session international conference. The Forum brings forth latest researches from academia, contemporary developments in the industry, and leading analyses by academics and government officials. The Forum has monitored the development of Islamic finance in a comprehensive manner. It has played a valuable role in exploring the ideals, analyzing practices and prospects and spotting trends for the industry. The table below gives a glance of Forums organized so far.

**Harvard University Forum on Islamic Finance (1997-2014)**

<b>Forum</b>	<b>Main Theme</b>	<b>Year</b>
11 <sup>th</sup>	Takaful and Alternative Cooperative Finance	2014
10 <sup>th</sup>	Islamic Finance and Development	2012
9 <sup>th</sup>	Building Bridges across Financial Communities	2010
8 <sup>th</sup>	Islamic Finance: Innovation and Authenticity	2008
7 <sup>th</sup>	Integrating Islamic Finance into the Mainstream: Regulation, Standardization & Transparency	2006
6 <sup>th</sup>	Islamic Finance: Current Legal and Regulatory issues	2004
5 <sup>th</sup>	Islamic Finance: Dynamics and Development	2002
4 <sup>th</sup>	Islamic Finance: The Task Ahead	2000
3 <sup>rd</sup>	Islamic Finance: Local Challenges, Global Opportunities	1999
2 <sup>nd</sup>	Islamic Finance into the 21 <sup>st</sup> Century	1998
1 <sup>st</sup>	Islamic Finance in the Global Market	1997

Islamic finance distinguishes itself from conventional finance on the basis of its strong emphasis on moral consequences, justice, equity and fairness in transactions and linking rewards with the risk, efforts and responsibility. Many observers, however, believe that market forces have not allowed Islamic finance to remain attached to its core belief. This Forum is a major milestone in IFP's programs as it seeks to revisit and re-emphasize the importance of solidarity, welfare and risk sharing in financial system. Risk is an unavoidable part of life and businesses. Management of risk therefore assumes key significance. The two most common approaches to handling risk is by spreading it (through mutual cooperation) or trading it (risk shifting) through agencies or institutions that are better equipped to handle them. Both these approaches have their own advantages and consequences.

Another important aspect on which this Forum is trying to attract attention of its participants is the role of alternate cooperative institutions. Over the years it has been observed that liberalization and globalization of financial system has led to a homogenized financial system with same set of incentives and motivation. This trend, according to many experts, has added to the instability of the financial system. Thus, diversity in structure is considered as stabilizing factor. The Eleventh Forum is dedicated to an in-depth discussion of all these issues in their theoretical as well as empirical dimensions.

Following our past tradition this Forum features three plenary sessions covering major subthemes within the overall theme of **Takaful and Alternative Cooperative Finance**. Plenary session on risk sharing is entitled *Risk Sharing: Possible Forms and Consequences*. Second plenary session is focused on alternative cooperative finance under the title of *Mutuals: Solidarity Concepts and Business Model*. Final plenary session on *takaful* and cooperation is titled *Takaful and Cooperation: Socio Economic Impact*. In addition we have four parallel sessions in which academicians and researchers from across the world are going to make presentations delineating various facets of their chosen area.

This time we had an overwhelmingly enthusiastic response to our call for paper and despite our best efforts we were not able to accommodate many exciting papers from far flung areas of the world - where Islamic finance has not even made an entry. To encourage many such researchers we decided to hold a **Pre-Forum Session** on April 25, 2014. The Pre-Forum is entitled *Islamic Finance: The Emerging Horizon* and it covers new markets, players, products and themes.

Overall this time we have around 80 authors, panelists and speakers representing over 20 countries.

This Forum is made possible with efforts and support from many individuals and organizations. I wish to especially thank our sponsors, the National Commercial Bank, MASIC and Kuwait Finance House for their encouragement and generous support. It is their valuable support which has allowed us to further this initiative. I wish to record my appreciation for ILSP Directors; Professor Intisar Rabb and Professor Kristen Stilt. Many staff and faculty members at various Harvard schools have been a great support. In addition, several IFP affiliates and student volunteers have made my task much easier and smooth.

But nothing would have been possible without the involvement of our researchers, moderators, panelists, speakers and attendees who have sacrificed their time and resources which not only reflects their commitment but also the faith in the quality of discourses that Harvard provides.

I am grateful to all of you for turning up and I welcome you at Harvard from the core of my heart. I wish you all a very pleasant stay and a rewarding academic exchange at Harvard.

S. Nazim Ali  
Director, Islamic Finance Project

**Eleventh Harvard University Forum on Islamic Finance**  
***Takaful and Alternative Cooperative Finance***  
Challenges and Opportunities

April 25 - 27, 2014  
Harvard Law School, Austin Hall

**PRE-FORUM**

Friday, April 25, 2014

2:30 – 4:00p.m.

**Parallel Session I:**  
**Islamic Finance: The New Products**

Ames Courtroom

**CHAIR: Rashid Alvi**, *Deputy Director*, Islamic Legal Studies Program, Harvard Law School

**PAPERS:**

*Islamized Postal Savings in Jordan: A Model for State-Society Collaborative Risk-Sharing*  
**Sarah A. Tobin**, *Postdoctoral Fellow*, Freie Universität, Berlin, Germany

*What Does it Mean to be "Shari'a-Based"? Separation, Authenticity, Welfare*  
**Ryan Calder**, *PhD Candidate*, University of California, Berkeley, California

*Micro-Takaful in India: a Path towards Financial Inclusion and Sustainable Development*

**Mohammad Faisal**, *Assistant Professor*, Aligarh Muslim University, Aligarh, India

**Asif Akhtar**, *Assistant Professor*, Aligarh Muslim University, Aligarh, India

**Asad Rehman**, *Assistant Professor*, Aligarh Muslim University, Aligarh, India

**M. Abdul Samad**, *Assistant Professor*, Salman bin Abdulaziz University, Al Kharj, Saudi Arabia

*Islamic Socio-Legal Institutions and Poverty Alleviation in Indonesia*

**Tanvir Ahmed Uddin**, *S.J.D. Candidate*, University of Sydney, Australia

**Maaz Rahman**, *Graduate Student*, University of New South Wales, Australia

2:30 – 4:00p.m.

**Parallel Session II:**  
**Islamic Finance: The New Perspective**

Austin North

**CHAIR: Elsayed Elsiefy**, *Professor*, University of Alexandria, Egypt  
*Associate Professor*, University of Hamad Bin Khalifa, Doha, State of Qatar

**PAPERS:**

*Commonalities and Differences between Halal Food Certifications and Islamic Finance Shari'a Boards*  
**Cedomir Nestorovic**, *Professor*, ESSEC Business School Asia Pacific, Singapore

*The Effects of Law, Culture and Political Risk: New Evidence from Mutual Fund Performance, Risk Taking and Fees*

**Meryem Mehri**, *PhD Candidate*, Dauphine University, Paris, France

**Kauother Jaouber**, *Assistant Professor*, Dauphine University, Paris, France

*Maqasid Shari'a - Perspectives of Sharing Risk in a Risk Transferring Paradigm*  
**Muhammad Nadeem Aslam**, Head, Islamic Bank Meethaq, Muscat, Sultanate of Oman

*Unveiling IFRS Standardization Projects and the Position of Takaful Industry; a Literature Study*  
**Murniati Mukhlisin**, PhD Candidate, Glasgow University, United Kingdom  
**Mohammad Hudaib**, Senior Lecturer, Glasgow University, United Kingdom

*The Untold Story of Profit-and-Loss Sharing in Islamic Finance: An Economic Analysis of Islamic Contractual Liability*  
**Youcef Maouchi**, PhD Candidate, CERGAM, Aix-Marseille University, Provence, France

4:00 to 4:15p.m.

**BREAK**

4:15 – 6:30p.m.

**Parallel Session III**  
**Islamic Finance: The Emerging Themes**

**Ames Courtroom**

**CHAIR: Abdel-Rahman Yousri Ahmad**, Professor, University of Alexandria, Egypt  
Professor, University of Hamad Bin Khalifa, Doha, Qatar

**PAPERS:**

*Challenges and Opportunities in Developing Micro-Takaful in Muslim Majority Country: A Case Study of Indonesia*

**Raditya Sukmana**, Head, Islamic Economics Program, Universitas Airlangga, Indonesia

**Sutan Emir Hidayat**, Assistant Professor, University College of Bahrain, Kingdom of Bahrain

*Strategic Opportunities for Islamic Finance: The French Legal Framework on Venture Capital and Cooperative Finance*

**Dorsaf Matri**, Ph.D. Candidate, Sorbonne Law School, Université Paris I Panthéon-Sorbonne, Paris, France

**Umar A Oseni**, Assistant Professor, International Islamic University Malaysia, Kuala Lumpur, Malaysia

*Achieving Financial Inclusion of Muslim Minorities Through Alternative Shari'a-Based Cooperative Finance Models*

**Abdul Qadir Buhari**, Chairman, B.S. Abdur Rahman University, Chennai, India

**Blake Goud**, Chief Compliance Officer, Marquam Capital, Portland, Oregon

**Saif Ahmed**, Managing Partner, Infinity Consultants, Bangalore, India

*On the Issues of Development of Islamic Finance in Emerging Markets: Case of the Republic of Kazakhstan*

**Golib A. Kholjigitov**, Kazakh-British Technical University, Almaty, Kazakhstan

**Kenneth P. Charman**, Professor, Kazakh-British Technical University, Almaty, Kazakhstan

**Lyubov Sartakov**, Research Associate, Kazakh-British Technical University, Almaty, Kazakhstan

**CHAIR: Ibrahim Warde**, *Adjunct Professor*, the Fletcher School, Tufts University, Medford, Massachusetts

**PAPERS:**

*The Islamic Conception of an Institutional Framework for Islamic Financial Firms*

**Liza Mydin**, *Ph.D. Candidate*, INCEIF, Kuala Lumpur, Malaysia

**Abbas Mirakhor**, *Distinguished Scholar and First Chair*, INCEIF, Kuala Lumpur, Malaysia

*The Islamic Cooperative: an Alternative to Islamic Banking?*

**Richard Gonsalves**, *Graduate Candidate*, International Islamic University Malaysia, Kuala Lumpur, Malaysia

*Islamic Banking as a Solution for Solving Current Debt Problems*

**Behnam Gurbanzada**, *Director, Islamic banking*, International Bank of Azerbaijan, Baku, Azerbaijan

**Salman Alioglu**, *Economist*

*The Risk Between Islamic Finance and Western Finance*

**Saad A Jلود**, *PhD Candidate*, Law School - Brunel University, London, United Kingdom

# MAIN FORUM

April 26-27, 2014 (Saturday and Sunday)

## Saturday, April 26, 2014

8:00-9:00a.m.     **REGISTRATION AND RECEPTION**     Austin Hall Lobby

9:00-9:30a.m.     **OPENING SESSION**     Ames Courtroom

**WELCOME REMARKS**

**FORUM KEYNOTE ADDRESS**

**Samuel L. Hayes**

*Jacob H. Schiff Chair in Investment Banking Emeritus, Harvard Business School*

9:30-12:00p.m.     **PLENARY SESSION 1:**     Ames Courtroom

**Risk Sharing: Possible Forms and Consequences**

**CHAIR: Volker Nienhaus**, *Visiting Professor, University of Reading, United Kingdom; and  
Adjunct Professor, INCEIF, Kuala Lumpur, Malaysia*

**DISCUSSION PAPERS**

*Risk Allocation and Management: Approaches and Implications for Islamic Finance*

**Habib Ahmed**, *Professor of Islamic Finance, Durham University, Durham, United Kingdom*

*Shared Risk and Shared Responsibility*

**Seamus P. Finn**, *Director JPIC Ministry, Missionary Oblates, Washington, D.C.*

**PANELISTS:**

**Jaseem Ahmed**, *Secretary-General, Islamic Financial Services Board, Kuala Lumpur, Malaysia*

**Khalid A. Al-Thani**, *Chairman, EZDAN Holdings, Doha, State of Qatar*

**Daud Vicary Abdullah**, *President, INCEIF, Kuala Lumpur, Malaysia*

**Zeine Zeidane**, *Advisor, International Monetary Fund, Washington, D.C.*

**Joe W. Bradford**, *Shari'a Scholar & Senior Associate, Bank of New York Mellon, Houston, Texas*

12:00-1:00p.m.     **LUNCH**     Austin Hall Lobby

1:00a.m.-3:30

**PLENARY SESSION 2:**

Ames Courtroom

**Mutuals: Solidarity Concepts and Business Models**

**CHAIR: Jaseem Ahmed**, *Secretary-General*, Islamic Financial Services Board, Kuala Lumpur, Malaysia

**DISCUSSION PAPERS**

*Mutuality, Reciprocity, and Justice within the Context of a Unified Theory of Riba and Gharar*

**Mahmoud El-Gamal**, *Chair* in Islamic Economics, Finance and Management, Rice University, Houston, Texas

*Recent Experience of Demutualization: Lessons for Takaful*

**Shariq Nisar**, *Visiting Fellow*, Islamic Legal Studies Program, Harvard Law School

**PANELISTS:**

**Ibrahim Warde**, *Adjunct Professor*, the Fletcher School, Tufts University, Medford, Massachusetts

**Khaled Al-Jasser**, *Chief Executive Officer*, Bank Al Bilad, Riyadh, Saudi Arabia

**Farmida Bi**, *Partner*, Norton Rose, Fulbright LLP, London, United Kingdom

**Taha Abdul-Basser**, *Principal and Co-Founder*, Straightway Ethical Advisory LLC, New York, N.Y.

3:30-4:00p.m.

**BREAK**

Austin Hall Lobby

**PARALLEL SESSION A:****Ames Courtroom*****Takaful: The New Paradigm for Financial Protection***

**CHAIR: Savas Alpay**, *Director-General*, Statistical Economic & Social Research Training Centre for Islamic Countries (SESRIC), Ankara, Turkey

**PAPERS:**

*Fatwa and Its Role in Regulatory Capture and Arbitrage*

**Joe W. Bradford**, *Sharia Scholar & Senior Associate*, Bank of New York Mellon, Houston, USA

*The Takaful Impasse: A Practitioner's Plea*

**Ajmal Bhatti**, *Chief Executive Officer*, Alinma Tokio Marine, Jeddah, Saudi Arabia

# Abstracts of Papers

*Abozaid, Abdulazeem*

## **A CRITICAL SHARI‘A REVIEW OF TAKAFUL STRUCTURES: TOWARDS A BETTER MODEL**

Conventional (commercial) insurance involves an intolerable magnitude of *gharar* (uncertainty), and therefore it is prohibited in shari‘a. In order to Islamize insurance, it needs to be reconstructed on different bases so that the inherent uncertainty associated with the concept of insurance will not invalidate its contracts. This is possible only if the commutative nature (*mu‘awada*) of insurance is converted into donation (*tabarru‘*); deeming the contributions of the *policy* holders as mutual donations, with the *Takaful* Company being only responsible for the administration of the *takaful* fund as well as the *takaful* operations. Nevertheless, the existing *takaful* structures, which supposedly adopt the said methodology, still have unresolved *fiqh* issues. These issues pertain to the underlying concept of *takaful* being genuinely of donation nature, and also to the applications and practices of *takaful* being capable of substantially ascertaining their differences from those of the conventional insurance. The paper scrutinizes the existing *takaful* structures and highlights their shortcomings in an attempt to outline a new sound model, with a special emphasis on its practicalities and applications.

*Ahmad, Abu Umar Faruq; Mahbob, Ismail Bin; and Ayub, Muhammad*

## **THE NATURE OF RETAKAFUL: RISK SHARING OR TRANSFERRING RISKS?**

*Takaful* has emerged in the global Islamic finance industry from the fundamental Islamic principles of mutual cooperation utilizing the virtuous contract of 'donation'. Along the lines of *takaful*, *Retakaful* has been innovated to allow *takaful* operators to reduce or mitigate the financial impact to their respective *takaful* funds arising from the occurrence of any risks. Unlike conventional insurance where risks are transferred from the original insured to the insurance company and then from the insurance company to the reinsurer, the concept of *Retakaful*, is based on risk sharing. The *Retakaful* operator manages the *takaful* fund on behalf of their respective participants. The key objective of the research is to examine the shari‘a issues related to *Retakaful* as to whether risks are genuinely shared by the participating *takaful* operators/*Retakaful* fund, or transferred to *Retakaful* operators, and whether participants should be responsible for providing additional funds to cover deficits in the *Retakaful* fund.

*Ahmad, Habib*

## **RISK ALLOCATION AND MANAGEMENT: APPROACHES AND IMPLICATIONS FOR ISLAMIC FINANCE**

The existence of risk and enormous costs associated with mismanagement of uncertainties calls for an examination of how risks should be allocated and managed. This paper examines the nature of risks and discusses their implications for the economy. The financial sector plays an important role in providing services that can manage risks by providing hedging, diversification and insurance facilities. The prevalence of risks and the inability of the private sector to manage certain risks also necessitate a public policy response towards risk allocation and management. Whereas mitigating risks falls under the overall objectives of shari‘a, there are certain restrictions and preferences in which this can be done. Specifically, Islamic principles link returns to risk-taking, prohibit selling of unbundled risks separately and favor risk-sharing to risk transferring approaches. Islamic financial sector faces challenges of finding solutions for allocating and managing risks that comply with the values and principles of shari‘a. Given that risk allocation and management have implications for promoting innovation, growth and welfare there is a need to come up with innovative shari‘a-compliant solutions both in the private and public spheres that can deal with not only specific risks arising in economic and financial transactions, but also those arising at the societal level.

*Allam, Hiba; and Nienhaus, Volker*

### **A SHARI‘A COMPLIANT HIGH WATERMARK PROTECTED LIFETIME ANNUITY IN FAMILY TAKAFUL?**

There is a demand for conventional unit-linked life insurance and investment products that not only pay out death benefits or a lump sum amount at maturity, but also provide protection for the invested capital, a guarantee to redeem the units of the fund at maturity at the highest net asset value that the fund has reached over its lifetime (= high watermark), and an option to convert the lump sum into a lifetime annuity. The paper explores whether such a product could be structured in a shari‘a-compliant manner. Although major shari‘a-compliance issues are related to the use of stock options for the capital protection and high watermark guarantee, the operational setup for a shari‘a-compliant alternative would not be very different from conventional patterns. However, the conversion of a lump sum into a lifetime annuity requires a more complex institutional arrangement with a cash *waqf*, or alternatively a shari‘a-compliant trust, at its core. The overall conclusion of the paper is that a shari‘a-compliant capital protected high watermark fund with a lifetime annuity option can be structured as a family *takaful* product.

*Al Amine, Muhammad Al Bashir M.*

### **COMMERCIAL CREDIT TAKAFUL**

Despite the remarkable growth and development of the *takaful* industry in recent decades, a somewhat noticeable component missing in the industry is the trade credit *takaful* link. Trade credit *takaful* helps protect businesses, traders, and financial institutions from the financial consequences of defaults, insolvencies, and bankruptcies of their trading partners. The positive side to the development of this market is that the shari‘a argument is addressed if the structure is based on *takaful* principles, but, the technical and operational dimensions still require further investigation. This paper highlights the growing demand for trade credit *takaful*, the regulators’ support, its benefits and scope, its shari‘a basis as well as the challenges ahead. Furthermore, the paper discusses how trade credit *takaful* in *sukuk* will not be an extension of credit default swaps in the conventional market due to the obvious differences. Similarly, the paper highlights the central role of micro credit *takaful* in the development of the microfinance industry. The paper concludes with some suggestions and recommendations.

*Aslam, Muhammad Nadeem*

### **MAQASAD-E-SHARI‘A – A PERSPECTIVE ON SHARING RISK IN A RISK TRANSFERRING PARADIGM**

The development and growth of Islamic banking in the current financial environment has linked its practices with conventional banking, thereby resulting in similar financial behaviors. The deprivation of small depositors from opportunities like conventional banking is one of the major imbalances in Islamic banking. This paper justifies the hypothesis that further promotion of equity finance products in current risk transferring paradigm will create imbalances in terms of *maqasad* shari‘a like deprivation of small depositors, risk-reward imparity and further enrichment of space for capitalists. The paper is desired to shape-up the existing financial paradigm for next version of Islamic banking.

*Bendimerad, Arslan Aïmen*

### **THE TAKAFUL BOX**

While conventional insurance is associated with risk shifting, the call for risk sharing in a *takaful* model is not visible at the actuarial and technical level. To date, no difference is made when pricing family *takaful* and conventional life insurance contracts. This paper shows that such an approach involves inconsistencies in use of key *takaful* concepts such as donation, uncertainty, risk sharing. Assuming that actuarial valuations should clearly reflect the nature of insurance contracts when possible, this study focuses on the simplest possible risk sharing between two individuals in order to introduce a *takaful* box. The graphical display is taken from an economic tool known as the Edgeworth box, and extended into a three dimensional display by specifying an event where both participants waive their shares with donative

intents. The *takaful* box aims at enabling transparency and dialogue, thus providing a basic risk sharing model for family *takaful*.

*Finn, Seamus P.*

### **SHARED RISK AND SHARED RESPONSIBILITY**

One of the core beliefs and understandings in the Abrahamic faith traditions is the notion of a chosen people called and constituted by God to realize His mission in the world. The foundational covenant that is established with the chosen people contains basic guiding principles, priorities and commandments. These rules included expectations about how members of the community are expected to live in right relationship with God, with each other and with all of creation. They also included rules and regulations about the proper conduct of financial and commercial transactions with other members of the community. The notion of “a people” and of “belonging to a community” presupposed the holding of things in common, the willingness to share responsibility and to share any attendant risks which a transaction might carry. 'Societas', or partnership as a concept of shared ownership, risk and responsibility, was a recognized "form of commercial organization throughout the Roman world". It became the basis and foundation for an extensive and centuries long debate about the implications of the “joint ownership” that is established in a partnership and how risk and responsibility are shared in such arrangements. This paper explores how some of these commercial and financial transactions and institutions evolved and how they might serve as a basis for an emergent “middle way” for believers that are searching for a financial system that is more consistent with their faith.

*Bhatty, Ajmal*

### **TAKAFUL IMPASSE: A PRACTITIONER’S PLEA**

*Takaful* with its ethical dimension should appeal to all and the industry has gone through a formative phase over the last 35 years to be an industry worth 12 billion of gross premiums by 2013. However, in the author’s view, its growth and development is impeded due to some critical areas that need to be fixed if its growth is to continue. One of the critical issues discussed in the paper are the roadblocks confronting the *takaful* companies. These are processes that have proven to be difficult to be put into practice, certain expectations that are misaligned with the “substance” of underlying concepts and a degree of complacency in adhering to “form over substance”, resulting in a gap between the theory of *takaful* principles and their practice driven by logical mathematical realities. Recognition of these issues and finding solutions to fix them is necessary for the greater good of the *takaful* industry in moving towards stability and durability.

*Bi, Farmida*

### **INNOVATIVE RISK-SHARING AND THE CHALLENGES OF PRODUCT DEVELOPMENT**

A major barrier to the growth of the *takaful* industry, and possibly also the *sukuk* market, has been the lack of availability of shari‘a-compliant insurance at the same price and for the same breadth of coverage as conventional insurance. This has resulted in exemptions for conventional insurance to be used for products that are otherwise structured as shari‘a-compliant. There is now a shari‘a-compliant insurance product that addresses both the price and scope of coverage through the use of a syndicated model. This paper analyses this product, its relationship to *takaful*, how it can be implemented and how it might impact the global shari‘a-compliant insurance market. If this model provides the same breadth of insurance cover at the same price as conventional insurance, it could transform the *takaful* market, which has been growing steadily but still only covers about 1 percent of the global Muslim population.

*Bradford, Joe W.*

### **FATWA AND ITS ROLE IN REGULATORY CAPTURE AND ARBITRAGE**

This paper examines Fatwa in Islamic Insurance and its role as an underlying cause of Regulatory Capture and Arbitrage. The progression of the Islamic insurance industry from one almost unanimously forbidden to a multi-billion dollar industry in less than three decades is indicative of the notable advances the

industry has made. With its core principles of cooperation, mutuality, and sharing of loss/gain, Islamic insurance is of particular appeal to the consumer. The paper highlights the key obstacles preventing Islamic insurance from achieving true mutuality and cooperation, and as such truly serving the consumer for whom it was created. These obstacles include the conflation of terms in understanding mutuality under an Islamic rubric, the undue emphasis on the contractual particulars governing the consumer, and the role of *fatwa* or lack thereof in creating Regulatory Capture. It will cover the need for review of the Islamic legal approaches used in the formation of *fatwa* in order to limit regulatory arbitrage by way of fees and charitable contributions.

*Brugnoni, Alberto G*

### **ISLAMIC FINANCE AND TAKAFUL: TOOL TO REBUILD THE SOCIAL FABRIC OF AFGHANISTAN**

There is mounting evidence that the balanced and effective development of rural Afghanistan is key to rebuilding the social fabric of this war-torn country. This goal can mainly be achieved by challenging the abysmally low penetration of financial products in the countryside and by satisfying the pent-up demand for shari‘a-compliant financial and insurance products. The resulting empowerment of rural male and female communities will exert a positive influence on the locals’ self-perception and contribute to gender emancipation, access to schooling, societal sustainability, and personal and collective prosperity. As an outcome, a more balanced society that recognizes the value of diversity and is less prone to radical influences will, albeit slowly, shape up.

*Buhari, Abdul Qadir Abdul Rahman; Goud, Blake; and Ahmed, Saif*

### **ACHIEVING FINANCIAL INCLUSION OF MUSLIM MINORITIES THROUGH ALTERNATIVE SHARI‘A-BASED COOPERATIVE FINANCE MODELS**

The objective of this paper is to demonstrate how financial inclusion of lower income Muslim populations across the world is possible using India as a case study. We provide a solution by developing three viable shari‘a-based alternative cooperative finance models that leverage enabling infrastructure (e.g. cutting edge mobile banking technology and e-governance schemes) to achieve broad based financial inclusion of all segments of the population with a focus on the Muslim minority community. We discuss the structural and regulatory frameworks along with the associated challenges for each of these three models and further describe their common shari‘a-compliant product structure that is based on *murabaha* and *musharaka* financing model developed by Feroz, Goud and Rahman (2008). We perform detailed financial analysis of this two stage product structure by developing a financial forecast model and relevant operating and profitability metrics to demonstrate its feasibility for investment and operation in a real world environment.

*Calder, Ryan*

### **WHAT DOES IT MEAN TO BE “SHARI‘A-BASED”? SEPARATION, AUTHENTICITY, WELFARE**

This paper poses two sets of questions. First: Where do the terms “shari‘a-compliant” and “shari‘a-based” come from? I discuss their origins and early uses, concluding that the popularity of the call for shari‘a-based finance is an artefact of the 2000s and especially the post-2008 period, when systemic stability and product transparency became pressing concerns in both Islamic finance and conventional finance. Second: What exactly do people mean by “shari‘a-based”? At present, many definitions circulate. I distill them into three categories: those that stress separation from conventional finance, those that stress authenticity, and those that stress welfare. I conclude by arguing that the multiplicity of definitions is not a problem to be hidden, but a starting point for debate and a sign of Islamic finance’s growing maturity as an ethical project.

*Carmody, Sara E. B.*

### **NEW HORIZONS: THE POTENTIAL FOR SHARI‘A-COMPLIANT COOPERATIVE AND MUTUAL FINANCIAL SERVICES**

This paper examines the regulatory environment for shari‘a-compliant mutual and cooperative organizations within the Gulf Cooperation Council (GCC) states. The challenge is to provide competitive products on commercial terms within the marketplace that meet local financial services regulatory standards whilst adhering to principles of mutuality. There are significant barriers within the legal framework, most notably the lack of developed laws for cooperative and mutual structures and for trusts within the GCC states. This paper: 1: defines a cooperative and a mutual, as a point of comparison and analyses the compatibility of the same principles to shari‘a-compliant financial institutions; 2: studies the companies which may offer various regulated financial services products within the GCC states, with reference to capital requirements and corporate vehicles required by law; 3: considers various issues arising from a mutual model that is to be compatible with shari‘a-compliant principles and meet regulatory requirements; and 4: the overall trends in terms of financial services legislation and practice within the GCC states and whether a move to a more mutual model within the financial services industry is practical for the GCC states.

*El-Gamal, Mahmoud A.*

### **MUTUALITY, RECIPROCITY, AND JUSTICE WITHIN THE CONTEXT OF A UNIFIED THEORY OF RIBA AND GHARAR**

The general thrust of Islamic jurisprudence of financial transactions is to approach the ideal of justice in exchange. The Islamic finance envisioned by Islamic economists wrongly emphasized contract forms (namely, partnership finance, ostensibly more approbated than debt finance, without any supporting evidence from Islamic scripture or classical jurisprudence). This gave rise to an industry based on legal arbitrage, synthesizing conventional finance at a cost, thus replicating any injustice or inefficiency therein, and adding inefficiency through arbitrage procedures. Mutual contracts were traditionally exempted from juristic prohibitions, for example in interest-free loans, which are technically *riba*, mutual insurance, etc., because of their apparent charitable purpose, as argued by Al-Qarafi in his *Furuq*. However, mutual structures can be arbitrated just as easily (and inefficiently) as commutative ones. The regulatory substance of classical Islamic law -- seeking justice -- cannot be enforced solely through contract and corporate forms, mutual or otherwise.

*El-Komi, Mohamed; and El-Gamal, Mahmoud*

### **ISLAMIC CREDIT UNIONS AND SOCIAL CAPITAL**

We are applying experimental economic techniques to investigate the best methods of creating a prototype Islamic Credit Union for the poor. A credit union that is shari‘a-compliant involves no interest. Our idea was tested through laboratory experiments in the field (El-Gamal, El-Komi, Karlan and Osman, 2013), where we observed higher take-up rates for this model among the villagers when compared to a model that mimics Grameen-style lending (conventional microfinance). However, we are trying to capitalize upon social capital in the community, in order to find the most efficient and successful ways to build such credit unions. Towards this end, we perform field experiments in rural Egypt and test for different methods of establishing a credit union, while measuring the effect of social capital on enhancing take-up and repayment rates of credit unions. On the other hand, we observe how credit unions foster social capital among the members.

*Faisal, Mohammad; Akhtar, Asif; Rehman, Asad; and Abdul-Samad, M*

### **MICRO-TAKAFUL IN INDIA: A PATH TOWARDS FINANCIAL INCLUSION AND SUSTAINABLE DEVELOPMENT**

Micro-*takaful* based on the exclusion of uncertainty, gambling and interest in its transactions encourages values such as brotherhood, solidarity and mutual cooperation. This paper studies micro-*takaful* as a tool for financial inclusion of the masses and sustainable development. The study involved interviewing

subject experts on their views on the viability of micro-*takaful* in India and its role in fostering financial inclusion of the masses. Furthermore, a sample of expected subscribers to micro-*takaful* was surveyed using a structured questionnaire. The findings show that micro-*takaful* can be used for fostering financial inclusion. Interpretive structural modeling shows the different levels of the determinants of micro-*takaful* in India. The study also highlights the attitude of Indian customers in terms of factors like affordability, trust, implementation and features of micro-*takaful*. Based on the findings of the study, a model for micro-*takaful* in India is proposed which is likely to help the decision makers and the government identify the major factors for the development of viable micro-*takaful* products.

*Gonsalves, Richard*

### **THE ISLAMIC COOPERATIVE: AN ALTERNATIVE TO ISLAMIC BANKING?**

Islamic banking has developed rapidly over the past half century from a basic theory to a viable alternative to conventional banking. The Islamic banking industry has primarily adopted the commercial banking model, with a few exceptions. There has been little to no research on alternative models for Islamic banking. This raises the question: Is commercial banking the most suitable model for Islamic finance? The literature concerning various banking models suggests that the cooperative banking model has a number of social and economic benefits that are discussed in this paper. This paper also discusses how the unique characteristics of the cooperative banking model could be applied to help the Islamic banking sector and highlights two examples of successful Islamic cooperatives operating in different parts of the world and how they embody the way the principles of Islam can work harmoniously with the cooperative concept.

*Gurbanzada, Behnam*

### **ISLAMIC BANKING AS A SOLUTION FOR SOLVING CURRENT DEBT PROBLEMS**

This paper outlines problems of interests based economies and a problem of a liquidity trap. It is argued that an economy based on debt financing works as long as the growth of income or assets allows debtors to service debts, but as soon as the growth of revenues or assets stops, debtors face problems in servicing their debts. Separation of the interest rate on the profitability in the real sector is due to different nature of interest and profits: if the business profit is the income of the owner of the real assets, the interest rate is a charge for the provision of debt. Just the different nature of interest and profits explains their diverse nature: during the crisis the interest rate is often not only reduced, but rather increased. This phenomenon is associated with an increase in the population of caution, which is reflected in the M1 (money on demand accounts and cash) and M2 (deposits) ratio. The growth of demand for liquidity stimulates the growth of interest rates. We have conducted research of banking sectors of Japan, USA and Europe as well as analyzed experiences using Islamic banking facilities of the International Bank of Azerbaijan for rehabilitation of the credit portfolio.

*Haq, Mian Farooq; and Shafiq, Bushra*

### **ISLAMIC CO-OPERATIVE: A ROUTE TO POVERTY ALLEVIATION & ECONOMIC DEVELOPMENT**

Despite numerous efforts and various socioeconomic models adopted by local and international agencies poverty reduction and inclusive economic growth remains a key challenge. Our paper examines the issues that led to limited success of earlier models used for inclusive growth and the role of Commercial Islamic Co-operative (CIC) in the social uplift of a society. Given its unique structure based on customer-ownership this research suggests capitalizing on innate strengths of CIC i.e. dual bottom line (customer value and equity together), low cost, good governance and continuous provision of social cohesion. The paper puts forward a commercial model of Islamic Co-operative as a means to broad based economic development. The study evaluates effectiveness of the proposed model of Islamic co-operative, while analyzing challenges in its implementation.

*Hassan, M. Kabir; and Lewis, Mervyn K.*

### **CORPORATE GOVERNANCE IN ISLAMIC INSURANCE (TAKAFUL)**

This paper examines some corporate governance issues associated with *takaful*. These issues are: *takaful* business models that are in use and their acceptability; the relationship between participants' and shareholders' funds; the system of shari'a supervision; and how the interests of participants and shareholders are to be balanced in the governance arrangements. For these matters to be appreciated, however, it is necessary that *takaful* itself is understood. While the *takaful* movement started at nearly the same time as the Islamic banks, it has not developed as rapidly as Islamic banks have, and lags well behind in terms of the number of institutions and the asset base. Much the same is true of the *takaful* literature which remains relatively sparse in comparison to the literature on Islamic banking and finance.

*Khan, Mohammad Akbar Ali; Kuntluru, Sudershan; and Assankutty, Azhar*

### **FEASIBILITY OF TAKAFUL AS AN ALTERNATIVE INSURANCE IN INDIA**

The paper explores the potentials of *takaful* as an alternative insurance model in India. The study examines the present situation and recent developments in Indian insurance industry. It also discusses the various *takaful* models prevailing around the world. The study also touches the present regulatory framework in the country. In India, out of total population of 1300 million, approximately 900 million people are still not covered by any kind of insurance. This, large untapped population with varied demographic features is an emerging opportunity for *takaful*. The present study finds great potential for *takaful* in India considering its substantial Muslim population and also the appeal of *takaful* to non-community members.

*Khatkhatay, Mohammed H.*

### **REVISITING PROFIT AND LOSS SHARING: THE FORGOTTEN ISLAMIC FINANCING ALTERNATIVE**

This paper attempts to explore the dynamics of the Islamic profit-and-loss-sharing type financing arrangement known as *musharaka*, with the objective of demonstrating that profit-and-loss sharing can be an attainable and pragmatic shari'a-compliant mode of financing. Analyzing the concept of profit under different scenarios and using cost accounting concepts, the author shows that there can be many ways defining profit and structuring profit-and-loss sharing arrangements. Not all profit-and-loss sharing arrangements are equally fraught with the dangers of manipulative accounting nor burdened with onerous costs of record-keeping and monitoring as is commonly believed. By innovatively defining the scope of such arrangements, they can be made more amenable to record-keeping at lower cost. The risk involved in such arrangements too can be considerably reduced by structuring them suitably and restricting their scope.

*Kholjigitov, Golib A.; Charman Kenneth P.; and Sartakov, Lyubov*

### **ON THE ISSUES OF DEVELOPMENT OF ISLAMIC FINANCE IN EMERGING MARKETS: CASE ON THE REPUBLIC OF KAZAKHSTAN**

Growth in Islamic finance in many regions of the world during the last decade has been both significant and rapid, and has provided both individuals and businesses with the possibility of raising capital on a risk-shared basis rather than the more conventional debt finance. The chaotic and aggressive credit growth that partially led to the global economic crisis of 2008 has turned the attention of academicians and regulators to alternative lending methods, including Islamic finance. According to *The Banker*, about USD 144 billion was issued globally under Islamic finance instruments in 2012 and expected another USD 100 billion in 2013, which totals to USD 400 billion in Islamic bonds outstanding. Kazakhstan, along with other Central Asian countries has also experienced significant growth in Islamic finance, both at personal and business level, and the stage is set for Islamic finance to grow and to diversify into a major form of development finance. Some experts predict that the potential market size for Islamic financial instruments can easily reach USD 10 billion within several years, but this requires much effort and aggressive promotion of products. This paper summarizes the recent growth in Islamic finance in the

Republic of Kazakhstan and assesses the prospects for future growth of this form of finance in both Kazakhstan and the Central Asian Region.

*Aljloud, Saad Ali*

### **HOW THE ISLAMIC FINANCE APPROACH TO RISK CAN SERVE AS A MODEL FOR GLOBAL REFORM**

The purpose of this paper is to examine risk-sharing and risk-shifting models and approaches in Islamic finance. In the aftermath of the financial crisis of 2007–2008, the fundamental stability of the conventional financial system has been seriously questioned. Excessive leveraging combined with an inherent asset-liability mismatch exposes institutions to unsupportable risk and threatens the overall soundness of the financial system. An alternative to the current model is one traditionally advocated by Islam. Islamic finance eliminates debt financing and instead promotes equity or direct asset financing, which allow for risk-sharing instead of risk-shifting. Financial institutions serve their traditional role as intermediaries between savers and investors, but with no debt on their balance sheets, eliminating the potential for excessive risk. The stability of the international financial system would be enhanced if reliance on debt were reduced: the global financial system would rely more heavily on risk-sharing, equity finance, and genuine asset securitization, linking the payoffs of financial securities to the underlying assets that are financed.

*Laldin, Mohamad Akram; Jinnah, Muhammad Ali; and Furqani, Hafas*

### **IMPLICATION OF ISLAMIC FINANCIAL SERVICES ACT 2013 TO MALAYSIAN TAKAFUL INDUSTRY: APPRAISING THE EFFECTS, ISSUES AND CHALLENGES LOCALLY AND GLOBALLY**

Islamic Financial Services Act 2013 (IFSA) marks a new stage in Islamic financial development in Malaysia that amalgamates several separate laws to govern the Islamic financial sectors under a single legislative framework. IFSA is the culmination of efforts to provide adequate laws that would ensure the effective development of Islamic banking and *takaful* and to equip and respond effectively to new and emerging risks in the industry. The regulator (Bank Negara Malaysia) is expecting the Islamic banking and *takaful* industry to fully comply with IFSA 2013 which has set solid framework for governance and shari‘a-compliant framework. The paper aims to elaborate the aspects of regulation in IFSA with regard to Malaysian *takaful* industry and the expectation it puts forward, analyzing the implications of IFSA to the Malaysian *takaful* industry and identifying the issues and challenges in its implementation.

*Liedekerke, Luc Van; and Jaufeerally, Reza Zain*

### **DO WELL BY DOING GOOD: CORPORATE SUKUK AS A SUSTAINABLE INVESTMENT FOR THE TAKAFUL SECTOR**

The Muslim World needs new jobs. In the MENA region alone, over 50 million new jobs need to be created in the coming decade. It is well documented that the majority of new jobs are created by start-ups and SMEs, not by industry giants. To alleviate unemployment, SMEs must be fostered by the thousands. *Takaful* companies can lead this endeavor by investing part of their premiums into financial instruments that support SME creation and development. Additionally, *takaful* companies also have a legal and moral responsibility to invest in shari‘a-compliant financial instruments with favorable risk-return. This position paper proposes a pragmatic and scalable solution to this conundrum: fostering SMEs while creating a safe new asset-class for *takaful* companies and Islamic Financial Institutions. We indicate the financial stability advantages of this solution and how these are in line with Islamic principles.

*Maouchi, Youcef*

### **THE UNTOLD STORY OF PROFIT-AND-LOSS SHARING IN ISLAMIC FINANCE: AN ECONOMIC ANALYSIS OF ISLAMIC CONTRACTUAL LIABILITY**

Despite the promises of profit-and-loss sharing (PLS) contracts, which were originally envisioned as the cornerstone of Islamic finance, debt instruments continue to dominate the practice of Islamic financial institutions (IFIs). While past literature focuses on moral hazard and adverse selection as the main reasons

behind the underuse of PLS, we argue that these asymmetric information issues are not a cause, but a consequence of a deeper problem that existing scholarship has overlooked: the influence of Islamic contractual liability rules (*akham al-daman*). Indeed, the practice of IFIs is the principal modern application of Islamic contract law. Using the analytical tools provided by law and economics, this paper provides a more precise definition of contractual parties' rights and duties in Islamic law, and the economic consequences that such rights and duties generate. We contend that while the liability rules governing PLS contracts are efficient in a personal exchange framework, they are not efficient in the impersonal exchange world we live in. We assert that markup-based instruments be used to compensate for these inefficiencies.

*Marzban, Shehab; Asutay, Mehmet; and Boseli, Adel*

### **SHARI'A-COMPLIANT CROWD FUNDING: AN EFFICIENT FRAMEWORK FOR START-UPS AND SMALL ENTERPRISES DEVELOPMENT**

Islamic finance, through acting as an alternative and ethical financing method, should finance impact-oriented real economic activities. However, in its current form in terms of adopting the role of conventional commercial banks, Islamic banks are not there to provide such financing. Accordingly, there is an urgent need to develop non-banking Islamic financial institutions and instruments to respond to the developmental needs of society including entrepreneurship. Crowd funding in the form of donations, rewards, debt and/or equity represent a new mode of financing for entrepreneurial activities and small enterprises overcoming the funding gap and risk implications faced by financial institutions. Shari'a-compliant Crowd funding provides an opportunity for investors, donors and entrepreneurs for the socioeconomic development of the micro and small enterprises sector in Islamic countries. Even though crowd funding has witnessed tremendous growth since the financial crisis in 2008, customized models tackling the current status of the entrepreneurial ecosystem and players, cultural and religious factors as well as the economic statuses of Islamic countries still need to be developed. This paper formulates a shari'a-compliant Crowd funding framework tackling these issues and discusses the appropriate shari'a financing mechanisms.

*Matri, Dorsaf; and Oseni, Umar A.*

### **STRATEGIC OPPORTUNITIES FOR ISLAMIC FINANCE: THE FRENCH LEGAL FRAMEWORK ON VENTURE CAPITAL AND COOPERATIVE FINANCE**

Venture capital is an effective tool for investment in both early stage and hi-tech businesses. From a purely legalistic perspective, this paper examines the current legal framework of France on venture capital and the opportunities it presents for shari'a-compliant investments. The study adopts an analytical approach in dissecting the relevant laws and regulations, including the relevant European Union Directives and Regulations, on venture capital in France and explores salient provisions through content analysis for possibilities of introducing shari'a-compliant venture capital operations in the country. This paper focuses only on the legal framework on venture capital in France and the Islamic venture capital models. The findings of this study provide a clear direction, which includes the opportunities and inevitable risks, for investors who are willing to venture into the French investment arena using the Islamic venture capital instruments. Though few studies have been carried out on potentials of Islamic finance in France generally, there has not been much focus on venture capital sector which might give a new impetus to efforts toward building bridges across financial communities. The paper concludes that, with some glaring connections with Islamic law, the French legal framework on venture capital has the potentials of accommodating shari'a-compliant venture capital operations

*Mehri, Meryem; and Jaouber, Kauoother*

### **THE EFFECTS OF LAW, CULTURE AND POLITICAL RISK: NEW EVIDENCE FROM MUTUAL FUND PERFORMANCE, RISK TAKING AND FEES**

This paper considers an international sample of conventional and Islamic mutual funds to assess whether law, culture and political risk affect their compensation fees and expense ratio. The data are hand-

collected from many sources. Overall, the results show strongly that legal conditions, culture and political risk have robust differential effects on fees. We find that Islamic mutual funds in countries with higher legal conditions receive lower fees, whereas conventional funds receive higher carried interest, lower fixed management fees and weaker expense ratio. Overall, Hofstede's culture's measures affect significantly the fees' structure with robust differential effects on Islamic and conventional funds. Focusing on political risk effects, we show that, in countries with higher political risk, the compensation fees and expense ratio will be higher. The components of country legality and political risk Index have significant differential effects on Islamic and conventional funds' characteristics.

*Mohieldin, Mohamed; Gonulal, Serap; and Rostom, Ahmed*

### **RISK SHARING A POTENTIAL FOR TAKAFUL'S GROWTH AND DEVELOPMENT IN OIC COUNTRIES**

Sustained growth over the longer term and an extension of *takaful* beyond the Muslim countries will require some key issues to be addressed. Firstly, product development is one outstanding and important issue to be focused on even in the advanced markets. Secondly, for truly global risk sharing tools to develop, the *takaful* industry needs standardization in terms of its business models and legal environment, focusing on multicultural populations of Muslim and non-Muslims. The success of risk sharing mechanism-*takaful* and Islamic insurance depends on highly developed and deep Islamic financial markets with a broad range of investment opportunities. Muslims account for a quarter of the world's population but they continue to have the lowest insurance penetration. One reason for this is the limited access to and low awareness of the availability of shari'a compliant insurance in the form of *takaful*. There is a potential market for risk sharing approach if suitable business models with these principles could be created for *takaful*.

*Mukhlisin, Murniati; and Hudaib, Mohammad*

### **UNVEILING IFRS STANDARDIZATION PROJECTS AND THE POSITION OF TAKAFUL INDUSTRY: A LITERATURE STUDY**

The *takaful* industry faces conflicting financial reporting standards. As the industry moves towards globalization, it is tempting to adopt the international GAAP issued by the IASB rather than the Islamic GAAP issued by AAOIFI. We argue that IASB standards do not comply with Islamic values; therefore, GAAP may be the most viable for the *takaful* industry's reporting needs and public confidence. This paper explores the alignment tactics between Islamic and IASB requirement and the socio-political consequences. It brings together the IFRS, AAOIFI and Indonesian SSFAS to examine the hindrances towards standardization process. Relevant literature suggests that neo-liberalism is part of the political-economic setting; accordingly light is shed from the Indonesian experience on its role for regulating society. The paper contributes to the existing argument as to whether or not *takaful* industry is a business that has no specific consecrating requirements for its financial reporting standards.

*Mydin, Liza; and Mirakhor, Abbas*

### **THE ISLAMIC CONCEPTION OF AN INSTITUTIONAL FRAMEWORK FOR ISLAMIC FINANCIAL FIRMS**

Islamic financial institutions (IFIs) currently are not free from conventional issues such as agency and information problems as the regulatory standards governing them mirror that of conventional standards. This paper proposes the elements needed to design an institutional structure based on Islamic conception for IFIs to operate in an Islamic rule-compliant environment and covers the main dimensions of firm structure: ownership and control, governance and finance. IFIs have an important role in the distribution of income and wealth for the society. An ideal Islamic financial firm structure developed based on the vision of the *Qur'an* and *Sunnah* would curb counterproductive behavior such as greed, deceit, and misappropriation of property. It is envisioned that the proposed design would provide guidance for IFIs to be the economic agents that promote financial inclusion, serve only the real sector of the economy and improve its growth prospects within the conception of Islamic social justice.

*Nana, Abdullah*

### **A PROPOSED MARRIAGE BETWEEN ENDOWMENTS, INSURANCE, AND ISLAMIC LAW: THE KEY ROLE OF THE WAQF MODEL OF TAKAFUL FOR THE FUTURE GROWTH OF THE INDUSTRY**

This paper proposes that the *waqf* model of *takaful* is most shari'a-compliant model and best suited to serve as a viable *halal* alternative to contemporary insurance. It discusses the mindset among many Muslims that *takaful* is the same as conventional insurance as well as some of the controversial practices in the *takaful* industry which reinforce this mindset, and the effect this has had in stunting the growth of the industry. Three major unlawful elements of contemporary insurance are discussed (*riba*, *qimar*, and *gharar*) and to what extent these elements are avoided in different *takaful* models in light of the research of experts in the field. The history of the *waqf* model is covered along with some of its salient features such as the cash-*waqf*, the independent legal entity of the *waqf* fund, and the right of the donor to benefit from the endowment. The paper also highlights the advantages of implementing the *waqf* model and its unique characteristics. Some criticisms of the *waqf* model from shari'a experts and practitioners are also addressed in this paper. Lastly, the paper examines some of the practical challenges in implementing the *waqf* model in the U.S.

*Nestorovic, Cedomir*

### **COMMONALITIES AND DIFFERENCES BETWEEN HALAL FOOD CERTIFICATIONS AND ISLAMIC FINANCE SHARI'A BOARDS**

The objective of this paper is to explore commonalities and differences between the certification process of Islamic finance and the certification process of *halal* food. In both cases there is a necessity to prove the purity of the product (whether food or insurance). Despite the intention being the same, the process is different. In case of *halal* food, the certification is deemed exogenous because given by a third party (a *halal* certification agency); while in the case of Islamic finance it is deemed to be endogenous because given by the Shari'a Board belonging to the bank or insurance company. At the same time common standards can prevail in both sectors, so the exogenous-endogenous dichotomy does not necessarily matter when it comes to the final decision. It is thus essential to separate process from standard in order to see if commonalities or differences prevail.

*Nienhaus, Volker*

### **SOLIDARITY, COOPERATION, AND MUTUALITY IN TAKAFUL**

*Takaful* is often presented as a system of cooperation and mutual help. This does not capture *takaful* realities properly. Islamic insurance schemes were not initiated by people looking for mutual protection against risks of life but by Islamic banks seeking protection for leased assets, collateral and outstanding debt. Most *takaful* undertakings are not organized as member-centred mutuals, but as hybrids with a profit-oriented shareholding company as the driving force. Regulators have stipulated that the solvency of the participants' risk fund has to be guaranteed by the *takaful* operator through an interest-free loan (*qard*), in case of need. However, the repayment of a *qard* is highly unlikely in a competitive market. An unrecoverable loan implies the factual transfer of the underwriting risk from the participants to the *takaful* operator. Contrary to *takaful* rhetoric, the economic quality and socio-economic impact of *takaful* and conventional insurance do not differ in substance.

*Nisar, Shariq*

### **RECENT EXPERIENCE OF DEMUTUALISATION: LESSONS FOR TAKAFUL**

Mutuals are considered close to the Islamic ethos of financial business. However, recent trends of demutualisation of insurance, stock exchanges and various other forms of businesses pose a serious question on the viability of the mutual model, especially with respect to *takaful*. This paper while examining the demutualisation experience aims to understand its impact on *takaful*.

*Oseni, Umar, A.*

### **TOWARD A WATERSHED IN TAKAFUL DISPUTE RESOLUTION: FROM LITIGATION TO EFFECTIVE DISPUTE MANAGEMENT**

The recent years have seen significant progress in the *takaful* industry with a strong double-digit growth of 16% amounting to US\$11 billion global gross *takaful* contributions in 2012. In order to sustain this growth and enrich its legal landscape, there is a need to examine the feasibility of an effective dispute resolution mechanism for the *takaful* industry while drawing some lessons from the conventional insurance industry. This does not undermine the significance of the relevance of Islamic law in designing suitable models of enforceable dispute resolution mechanisms. While using qualitative legal analysis that predominantly adopts content analysis of current trends in *takaful* and insurance litigation, this paper finds that effective dispute resolution processes such as arbitration and mediation could be adapted to suit the specific needs of shari‘a dispute resolution in the *takaful* industry. This would allow for cost-effective settlements that would guarantee existing business relationship among the parties and prevent unnecessary bad publicity in a highly competitive global insurance industry.

*Sukmana, Raditya; and Hidayat, Sutan Emir*

### **CHALLENGES AND OPPORTUNITIES IN DEVELOPING MICROTAKAFUL IN MUSLIM MAJORITY COUNTRY: A CASE STUDY OF INDONESIA**

This paper aims to identify the challenges and opportunities in developing *microtakaful* in Indonesia using the library study based method, a kind of qualitative research approach. The paper finds insurance regulation, lack of awareness and shortage of human capital as the challenges in developing *microtakaful* in Indonesia while high economic growth, huge population of Muslims and the high growth rate of Islamic banking as the opportunities in developing *microtakaful* in the country. Indonesia was chosen since it is the largest Muslim populated country and the MSME industry was the country's buffer for the subprime economic crises. In addition, the users of the *microtakaful* services are still below their potential level, so, the *microtakaful* operator has ample opportunities to explore. Therefore, identification of the opportunities and challenges may benefit the operators to enter Indonesian market and also encourage Indonesian government to set proper policy to develop *microtakaful* and *takaful* in the country

*Sultan, Hussam; and Syed, Abdur-Rahman*

### **REIMAGINING TAKAFUL: A NEW MODEL FOR SOCIAL BANKING**

Some observers (“purists”) lament the gap between the high expectations from the Islamic financial services industry and its track record. Others (“pragmatists”) celebrate the industry’s limited gains on the premise that higher socioeconomic outcomes cannot be achieved without significant structural changes. The paper argues that the strategic use of *takaful* can transcend this purist/pragmatist debate and introduce an element of social banking within the current market and regulatory environment. By setting up a *takaful* pool at the basic current account level with depositors alongside the bank’s existing corporate structure, the proposed social banking model reduces the gap between depositor and shareholder without rewriting Islamic financial institution’s corporate structure or Islamic financial services regulation. As banks experiment with alternative forms of banking within their existing corporate structure and regulatory environment, this paradigm shift may also create the success cases necessary to advocate more significant structural changes in the future.

*Tobin, Sarah A.*

### **ISLAMIZED POSTAL SAVINGS IN JORDAN: A MODEL FOR STATE-SOCIETY COLLABORATIVE RISK-SHARING?**

Extending financial inclusion to Muslims in rural areas, the poor, and those who find conventional financial services either untrustworthy or forbidden for personal or religious reasons is a pressing question. The paper explores the possibilities for utilizing Public-Private Partnerships (PPPs) in Jordan to mitigate against three important risks and help improve financial inclusion, including: 1) mistrust of the government; 2) inclusion for the “high-risk” poor; and 3) risks associated with dealings in *riba*. Based on

global experiences in PPPs, Postal Savings Systems in the Middle East, and interviews with the Jordan Postal Savings Fund and a Jordanian economist, this paper argues that these risks are more diffuse and manageable in PPPs. This is especially true in Islamized postal savings systems and the case of the Jordan Postal Savings Fund. The paper concludes with practical implications of these arrangements for possible expansions of the Postal Saving Program in the Middle East.

*Tag El-Din, Seif El Din I; and Izhar, Hylmun*

### **THEORETICAL AND EMPIRICAL ANALYSIS OF INCOME RATIO AND RISK-SHARING STRUCTURE**

Using standard assumptions of mean/ variance analysis, this paper demonstrates theoretical and empirical implications of a two-party model involving capital provider (C) and manager (M) each with an objective to maximize expected utility through a joint contract. Depending on how return/ risk parameters ( $\theta, \sigma$ ) are shared by the two parties, the paper derives the set of possible contracts that can be adopted. In particular, *mudaraba* is one possible contract characterized with equal income and sharing ratios. The optimal contract curve (OCC) between the two parties reflects a negative relationship between income and risk sharing ratios, implying that each party seeks to maximize income and minimize risk. *mudaraba* emerges on the OCC at the breakeven point where the two parties possess equal bargaining powers. Interestingly, *mudaraba* corresponds to an equal division of expected income between the two parties (income ratio =  $\frac{1}{2}$ ) when the two parties possess the same rate of risk aversion. The empirical relevance of the OCC hypothesis applies to specific situations where the underlying assumption of information efficiency seems to hold. Yet the fact that capital is scarcer, more mobile and more versatile than the human resource explains why party C's bargaining power tends to prevail over party M. This is typical of the old sharecropping system in the U.S. and current taxi-driving independent contract systems. The paper singles out industrial entrepreneurship as the only empirical situation where party M is capable of exercising an economic power over party C, thanks to information inefficiency in the ( $\theta, \sigma$ ) space.

*Uddin, Tanvir Ahmed; and Rahman, Maaz*

### **ISLAMIC SOCIO-LEGAL INSTITUTIONS AND POVERTY ALLEVIATION IN INDONESIA**

This paper provides an analysis of the role of Islamic microfinance institutions in poverty alleviation in Indonesia and presents recommendations for improvements in service quality, outreach, and shari'a social justice goals. The paper also provides an outline of relevant Islamic legal principles and Indonesian laws. The underperformance of Islamic microcredit in the form of BMT (*Baitul Mal Wat Tamwil*) and BPRS (*Bank Perkreditan Rakyat shari'a*) is also assessed by evaluating the capital management and regulatory effectiveness of these structures. In addition, the implementation issues surrounding Islamic microinsurance (*microtakaful*) are analysed through the consideration of business conduct, overall shari'a compliance, and effectiveness. The paper presents tangible solutions to achieve poverty alleviation by suggesting integrated and nationally regulated poverty alleviation programs. These programs should: utilise available Islamic charitable funding sources and organisational structures in Indonesia, be guided by shari'a welfare concepts (e.g. mutual cooperation), and take into consideration the local region and culture.

# Profiles of Speakers and Moderators

## **ABDUL-BASSER, TAHA BIN HASAN**

(*Managing Partner*, Straightway Ethical Advisory LLC, New York, New York)

Taha Abdul-Basser is a consultant, researcher, and translator in the field of Islamic ethics and law. Currently he is pursuing his Ph.D. in “Shari‘a-compliant Ethical Micro Finance and Financial Inclusion”, at Anna University (India).

**CALDER, RYAN**

*(Ph.D. Candidate, Department of Sociology, University of California, Berkeley)*

Ryan Calder is a Ph.D. candidate in sociology at the University of California, Berkeley. His dissertation, entitled *Sacred Profit: A Sociology of Islamic Finance*, is about to be completed in 2014. Based on 18 months of interviews and ethnography primarily in Kuala Lumpur, Dubai, and London, it traces how the evolving concept of shari‘a-compliance has supported the growth of Islamic finance. It argues that shari‘a scholars, Islamic bankers, lawyers, and regulators not only verify shari‘a-compliance, but define and construct it as the ethical basis of an industry and of a new mode of financial being. Calder also conducted interviews during the 2011 Arab Spring uprisings, publishing extensively online from Libya in *The Atlantic* and *Foreign Policy*. Formerly a consultant at McKinsey & Company, Calder has a B.A. magna cum laude with highest honors from Harvard (Inner Asian and Altaic Studies) and an M.A. (Sociology) from Berkeley. He speaks Japanese, French, and Arabic.

**CHARMAN, KENNETH P.**

*(Professor, Kazakh-British Technical University, Almaty, Kazakhstan)*

Ken Charman is an expert on the transition process in Eastern Europe and Central Asia, having already started on assignments in Hungary in 1991 whilst completing his MBA at London Business School, and then working as a lecturer of economist in Kazakhstan, other Central Asian Republics, Eastern Europe and the Middle East since 1993. Ken graduated with a Bachelor's Degree in Economics and Agricultural Economics from Nottingham University (1980-83), an MBA from London Business School (1989-91), and a PhD in Economics from London Business School (1994-98), with a thesis on international joint ventures in Kazakhstan, with research and data collection carried out in the Republic of Kazakhstan during the early years of transition. He has carried out numerous analytical reports and articles for international donors in the course of his assignments.

**DORSAF, MATRI**

*(PhD Candidate, Sorbonne Law School University Paris I Pantheon-Sorbonne-France)*

Dorsaf Matri is a member of the Tunis Bar and currently a Doctoral Candidate. Her doctoral research is on the implementation of Islamic venture capital structures into French legal framework. Prior to this, Dorsaf practiced law as a legal counsel at GE Capital, Gide Loyrette Nouel and Linklaters LLP (Paris). Her areas of practice include: Banking law, Private equity, Finance Project and Islamic finance. She is also a member of Paris Europlace's Islamic Finance Committee created by Christine Lagarde, the former French Finance Minister and the Chief of the International Monetary Fund. Dorsaf has published on current legal and regulatory issues in Islamic finance in the Journal of King Abdul Aziz University.
