

2014 IPN – IWNEST KUCHING

Kuching, Malaysia
October 24-25, 2014

- International Conference on Materials, Mechatronics, Manufacturing and Mechanical Engineering 2014
- International Conference on Industrial Technology and Applications 2014

IPN.org

International Postgraduate Network

IPN Network

Welcome to IPN-IWNEST 2014 Conferences Kuching

Dear Professor, Dr and distinguished delegates,

Welcome to the IPN - IWNEST 2014 Conferences in Kuching , Malaysia. On behalf of *International Postgraduate Network (IPN.org) and IWNEST*, I would like to thank all the Conference Chair, Program Chairs and the Technical Committees. Their high competence and professional advice enable us to prepare the high-quality program. For the participants, we hope all of you have a wonderful time at the conference and also in Kuching , Malaysia.

We believe that by this excellent conference, you can get more opportunity for further communication with researchers and practitioners with the common interest in Materials, Mechatronics, Manufacturing and Mechanical Engineering

For the conferences of ICMMMM 2014 and ICITA 2014 more than 150 submitted papers have been received and 100 papers have been accepted and published finally.

In order to hold more professional and significant international conferences, your suggestions are warmly welcomed. And we are looking forward to meet you again next time.

Best Regards,

Terima Kasih.

Yours Sincerely,

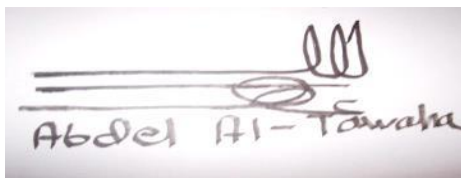

MZ Zainab
Director – Conference Management IPN.org
Chairman, IPN – IWNEST 2014 Conferences, Kuching

Message from IWNEST President

On behalf on the IWNEST publications team, it is my privilege to welcome you to the IPN - IWNEST 2014 Conferences Kuching. IWNEST is an independent, non political, non-governmental organization of distinguished scientists dedicated to advancing science around the world. We aim to help scientists and researchers to publish their findings in our scientific journals and to promote and help to organize worldwide conferences. We believe that has no boundaries, regardless of the great distances between countries and continents. Thus IWNEST welcomes contributions from researchers from all concern irrespective to the race, colour, religion and nationality.

Best Regards

A photograph of a handwritten signature in black ink on a white background. The signature is stylized and appears to read 'Abdel Al-Tawaha'. Below the signature, the name 'Abdel Al-Tawaha' is printed in a simple, sans-serif font.

Prof. Dr. Abdel Rahman Mohammad Said Al Tawaha
Founder President
Honorary Advisor
IPN – IWNEST 2014 Conferences, Kuching

About International Postgraduate Network (IPN.org)

The International Postgraduate Network (IPN.org) is a non-profit international association dedicated to the promotion of international education and university cooperation in the field of Business, Art, Social Science, Management, Education, Science, Technology, Engineering and any other related field.

Through the organization of different international events, it brings together institutions, bodies and organizations from different countries of the world for discussion and cooperation. IPN.org Mission is to promote and enhance the dialogue in education among the institutions devoted to field mentioned above through:

- Promotion of best practice standards in the service of international education.
- The facilitation of relevant forums, training and information exchange.
- Creation and dissemination of knowledge; exert an influence in public policy.
- Production of publications used as a database document for research works, projects and innovation activities held on the international education field.

IPN.org believes that this is best achieved through international cooperation and promotes the development of closer links among relevant institutions and individuals around the world. IPN.org supports that such international cooperation can help countries learn from each other and promotes the dissemination of scientific and engineering activities. IPN.org intends to achieve the mentioned objectives and get an international visibility by the organization of international conferences and by interacting with public and private organisms from all parts of the world.

Announcement

- All accepted papers from ICM MMM 2014 will be published in the Australian Journal of Basic and Applied Sciences (ISI /Thomson Reuters Journal) (ISSN 1991-8176) (abstract and indexing by ISI/Thomson Reuters, Ulrich periodicals, Ebscohost, Cabi International and DOAJ) or
- American Eurasian Journal of Sustainable Agriculture (Scopus) (ISSN 1995-0748) (Indexed by Elsevier: SCOPUS www.scopus.com)
- All accepted papers from ICITA 2014 papers will be published in Australian Journal of Basic and Applied Science (ISI/THOMSON REUTERS) (online issue ISSN 1991-8178) (abstract and indexing by ISI/Thomson Reuters, , Ulrich periodicals, Ebscohost, Cabi International and DOAJ)

One excellent presentation / best paper will be selected from each session and the author of excellent presentation /best paper will be awarded the certificate during the Dinner Banquet. Beside that 3 excellent paper (the selected paper is chosen by the IWNEST editorial board) will received RM 150.00

Keynote Speakers

Keynote Speaker 1:

Prof. Dr. Amir Azam Khan
Universiti Malaysia Sarawak

Biography

Professor Dr Amir Azam Khan has worked extensively on Surface Engineering of Materials during the last 20 years. He did his PhD at the Laboratory SPCTS (Sciences de Procédées Céramiques et de Traitement de Surfaces) University of Limoges, France. His work was concentrated on the development and characterization of tungsten and molybdenum coatings through plasma spraying, sintering of nitride ceramics and ceramic based composites in the AlN/Mo system, as well as low pressure plasma spraying of refractory films over metallic and ceramic substrates. This work was financed by General Electric Medical Systems (GEMS) USA, for producing High Energy X Ray tube anodes for continuous imaging in their CT Scanners. Prototypes of coated Ceramic Matrix Composites (CMS's) were produced according to their design and patented by GEMS, USA. In addition to this application, these composites show excellent tribological properties, and are considered for their possible use under self lubricating conditions. Later he worked under a project with SPCTS to produce and study the glass/metal composite films deposited over porcelain substrates with an objective to use these films for the induction heating of porcelain utensils. The work was carried out with the financial support of French porcelain manufacturer APILCO.

Since 2009 he is working as a Professor in the Department of Mechanical and Manufacturing Engineering, Faculty of Engineering, UNIMAS, Malaysia. He has held several important Scientific and Administrative Posts in the past such as Head of Materials Engineering at the National University of Sciences and Technology (NUST), Islamabad, Pakistan, between 2005 and 2009. Prof. Khan is one of the reviewer appointed by Elsevier UK and Maney Publishers, USA. He is editor of the proceedings of recently concluded International Engineering Conference (ENCON2013), published in September 2013 by RPS, Singapore. He owes to his credit over 50 research and review publications in Journals and International Conferences. He has supervised a number of Masters and PhD students during the last 15 years. He was awarded the Best Scientist award by the Third World Academy of Sciences (TWAS), Rabat, Morocco, in the year 2001, and was given the title of Chevalier dans l'ordre de Palmes Académiques by the French Prime Minister, in March 2001, for his invaluable services for the cause of research and education. He also obtained the prestigious fellowship of Max Planck Institute, Stuttgart, Germany, they invited him as a researcher and speaker in 2001 and 2003.

Topic: Development of Solid Oxide Fuel Cells: Use of Mixed Solid Oxides as Electrodes for Low Temperature Ionic Ceramic Conductors.

Abstract: Last few years have seen an enormous global investment in the renewable energy technologies. Fuel cells are deemed as a viable source of renewable energy along with other sources like wind, geothermal and solar. Researchers have pondered for last two decades on several options. Solid Oxide Fuel cells offer higher efficiency compared to Fuel Cells using Organic membranes but a higher working temperature has kept the fuel cell technology based on solid oxides still away from every day user. Ceramics can become conductors at lower temperature and this is the future thrust of research. Several options can be tried, such as different mixtures having a higher defect level to facilitate ionic conduction. The phases have to be stable at the temperature of use. The present study provides an overview of work done in converting ceramic oxides surfaces to a superficial glassy phase through high energy laser treatment. This is a promising work which is expected to reduce the working temperature of an SOFC to half of its present stated value of about 700 degrees C. A mixed ZrB₂-SiC Ceramic composite is treated with laser to produced molten surface layers which convert to a glass structure upon cooling. These glassy layers are key to lowering ionic conductivity and thus reducing the working temperature.

Key words: Ceramic Composites, Solid Oxide Fuel Cells, Laser Treatment

Keynote Speakers

Keynote Speaker 2:

Dr. Aidah Jumahat
Universiti Teknologi Mara

Biography:

Dr. Aidah Jumahat has a PhD degree in Mechanical Engineering from the University of Sheffield United Kingdom, a MSc (Mechanical Engineering) degree and a B.Eng. (Hons.) (Mechanical and Materials Engineering) degree from the Universiti Kebangsaan Malaysia. Her thesis for PhD research entitled 'Effect of nanofillers on thermo-mechanical properties of polymers and composite laminates'. She obtained her PhD in less than 4 years and she has been regularly invited to share her PhD study experience. She joined the Faculty of Mechanical Engineering UiTM as a lecturer in 2001. Currently she is a Senior Lecturer and Head of Centre of Studies for Engineering Mechanics and Materials. Dr. A Jumahat has been lecturing on Composite Materials, Finite Element Methods, Mechanics of Materials, Manufacturing Processes and Product Design, which happens to be her areas of research interest and has published more than 70 technical papers in journals and conference proceedings locally and internationally. Due to her expertise and experience, she sits in many committees, editorial boards, reviewing panels, training groups, interview panels and evaluating teams in various events at national and international level. She is an esteemed member of the panel of judges for the International Invention, Innovation & Technology Exhibition (ITEX) since 2012. She is actively involved in various research and industrial projects and has supervised a number of Masters and PhD students since 2011. She is an executive committee member of Persatuan Industri Komposit Malaysia (PIK) and Malaysian Tribology Society. She is enthusiastically involved in organizing and chairing various international and national conferences and workshops. In current achievement, she won the Composite Award 2013 for published work from the International Institute of Materials, Minerals and Mining and also Design awards.

Topic: Fibre Reinforced Polymer And Nanocomposites

Dr Aidah Jumahat

Faculty of Mechanical Engineering, Universiti Teknologi MARA
40450 Shah Alam, Selangor, MALAYSIA

Tel. +603-55435135 (O), +6012-2290890 (M), +603-55435160 (F)

E-mail: aidahjumahat@salam.uitm.edu.my; aidahjumahat@gmail.com

Synopsis:

The keynote speech highlights the research conducted by the speaker and her team in the area of advanced materials and fibre reinforced polymer composites. The research covers:

- Synthesis and characterization of polymer nanocomposites
- Mechanical and thermal properties of polymers
- Fabrication of advanced fibre reinforced polymer composites
- Experimental work for determination of physical, mechanical and thermal properties of composites laminates
- Analytical models

The aims of the research work are to develop new fibre reinforced polymer composite materials and to assess the properties of the materials when compared to the conventional structures.

Abstract:

Fibre reinforced polymer (FRP) composites have been widely used in various applications especially in the construction of aerospace structures. The overall performance of the FRP is mainly determined by the properties of the fibre, matrix and fibre-matrix interface. In tension, the composite properties depend mainly on those of the continuous fibres. While, in compression the properties depend on the quality of fibre-matrix interface and the resin stiffness. A stiffer matrix provides a better lateral support to the fibre, delays fibre microbuckling and promotes higher strain to failure. Over the past few decades, much effort has been devoted to develop stiffer and tougher matrices and hence reduce the brittleness of the epoxy by: 1) reducing the cross-linked density of the epoxy network or 2) adding toughening agents, such as rubber, glass beads, ceramics and thermoplastics particles into the epoxy. However, attempts to improve toughness are frequently accompanied by reduction in stiffness and thermal properties. The latest advanced polymer technology is polymer nanocomposites whereby the nanoparticles are incorporated into the epoxy to improve toughness and stiffness without reduction in failure strain.

The researches started at the University of Sheffield United Kingdom in 2007 where various types of nanoparticles such as nanosilica, carbon nanotubes, carbon nanofibres, nanoclay and nanoalumina have been assessed on their compatibility to various types of thermosetting polymers. The materials were characterized via physical, thermal and mechanical properties in order to evaluate their performance.

As a result, advanced materials have been developed based on nanoparticles and epoxy resins which called polymer nanocomposites. The ultimate application of these newly developed materials is to fabricate advanced fibre reinforced polymer composite laminates and structures which have high damage resistance properties. Then on, at Universiti Teknologi MARA (UiTM) Malaysia the study progresses to assess several types of synthetic and natural fibres reinforced polymer composite materials. The effect of nanoparticles or nanofillers on mechanical and thermal properties was studied. Apart from the experimental work, the study has also diversified to cover other approaches including analytical computation and also simulation using commercial finite element software.

The performance of advanced composite laminates are presented and discussed thoroughly. A compilation of findings and results for various types of polymer and composite properties is also highlighted and further discussed.

Keywords:

Polymer nanocomposites, Composite materials, Analytical prediction, Mechanical properties, Physical properties, Thermal properties

List of the Conference Committee

IPN – IWNEST 2014 Conference Kuching, Honorary Advisor

Prof. Dr. Abdel Rahman Mohammad Said Al-Tawaha (Ph.D McGill University)

Instruction for Oral Presentation

Devices Provided by the Conference Organizer:

- Laptop (with MS-Office & Adobe Reader)
- Projector & Screen
- Laser Sticks

Materials Provided by the Presenters:

- PowerPoint or PDF files

Duration of each Presentation (Tentatively):

- Regular oral presentation: about 15 minutes (including Q&A)
- Keynote speech: about 40 minute (including Q&A)

Notice: Please keep your belongings (laptop and camera etc) with you!

During registration:

Original Receipt
Representative / Pass Card with lanyard
Printed Program
Lunch Coupon
Dinner Coupon
Participation Certificate (collected from Session Chair after the session)
Conference Souvenir
Conference Bag

6	091-icmmmm	Total flavonoid content and antioxidant activity evaluation of agarwood tea leaves extracts. Amarawadee Rattanama , Pakamas Chetpattananondh, Juraithip Wungsintaweekul Prince of Songkla University
7	092-icmmmm	Involvement of Internal Auditors in The Lean Six Sigma Project: A Study in The Agriculture Sector. Mohamad Reeduan Mustapha , Mohd Shaladdin Muda, Fauziah Abu Hasan Universiti Malaysia Terengganu
8	095-icmmmm	Experimental Analysis on Cooling Channels Parameters in Hot Stamping Tools (SKD61). M. Farid M. Sharif , M. A. Hanafiah Saharudin, M.Shaifil Hakimin M. Sakri and Nur Asyran Wani Baharom Universiti Malaysia Pahang
9	058-icita	A Reactive Navigation for a Mobile Robot: An Improvement for Modified Virtual Semi Circle Approach S. Amira , R. N. Farah, N. Irwan, R. L. Zuraida, and M.H. Hafiz . Universiti Pendidikan Sultan Idris,

Session 7
 Time: 1630-1800
 Venue: Menara Grand Level 4
 Session Chair: Dr. Rosalyn R. Porle

No	Paper ID	Presenter
1	042-icmmmm	Comparative Study of PMMA 120K and 996K for Electron Beam Lithography Application. Liyana Shamsuddin , Siti Suhaila Md Izah and Khairudin Mohamed Universiti Sains Malaysia
2	016-icmmmm	Efficiency of benzyl dimethyl (2-hydroxyethyl) ammonium chloride as corrosion inhibitor in acetic acid Mohd Nazri Idris , Abdul Razak Daud, Norinsan Kamil Othman Universiti Kebangsaan Malaysia
3	043-icmmmm	The Influence of Niobium Pentoxide (Nb ₂ O ₅) on the Sintering Behavior of Ytria Tetragonal Zirconia Polycrystal Using Two-Step Sintering (TSS) Method Mohsen Golieskardi , Meenaloshini Satgunam , Dinesh Ragurajan University Tenaga Nasional
4	027-icmmmm	Optimization of accelerated ducted design in wind turbine system using Computational Fluid Dynamics (CFD) Ahmad Hamdan Ariffin , Faizal Mustapha, Ahmad Nizam Jamaludin, Mohd Faruq Abdul Latif Universiti Putra Malaysia
5	059-icita	An Application of Statistical Quality Control On Process Improvement: Case Study M.H. Norhidayah , Wan Ahmad Najmuddin Wan Saidin Kolej Islam Antarabangsa Sultan Ismail Petra
6	029-icmmmm	Fuzzy Logic Modeling of Silicon Nitride (Si ₃ N ₄) Laser Cutting Pedram Parandoush , Altab Hossain, Nukman Yusoff, Abu Mohammed Sifullah, K M Anamul Hossain University of Malaya
7	024-icmmmm	Feasibility of double-layer microchannel fabrication at low speed Micro End-Mill and Wire-Cut EDM machines Islam M. F. Seder , Shugata Ahmed, Mirghani I. Ahmed, M N A Hawlader International Islamic University Malaysia

Session 8

Time: 1630-1800

Venue: Ruai Rejang Level 3

Session Chair: Dr. Salehuddin Arshad

No	Paper ID	Presenter
1	033-icmmmm	Improving Cure Reversion Resistance and Physical Properties of Silica Filled Epoxidised Natural Rubber Compound for Tyre Treads Ahmad Kifli Che Aziz , Teku Zakwan Zaeimoedin, Mazlina Mustafa Kamal, Siti Salina Sarkawi Malaysian Rubber Board
2	084-icmmmm	The Effect of Natural Fibres Mercerization on Natural Fibres/Polypropylene Composites: A Study of Thermal Stability, Morphology and Infrared Spectrum Elammaran Jayamani , Sinin Hamdan, Soon Kok Heng, Md Rezaur Rahman, Muhammad Khusairy Bakri, Akshay Kakar Swinburne University
3	021-icmmmm	A Study of Surface Roughness & Surface Integrity in Drilling Process Using Various Vegetable – Oil Based Lubricants In Minimum Quantity Lubrication Nurul Adlina M.J. , Kamaleshwaran T., Ahamd Fairuz M., Azwan I.A., Universiti Malaysia Perlis
4	040-icmmmm	Decision support system using Fuzzy AHP and Activity based life cycle costing Freselam Mulubrhan , Ainul Akmar Binti Mokhtar, and Masdi Muhamed Universiti Teknologi PETRONAS
5	013-icmmmm	Optimization of Laser Cutting Parameters Using Variable Weight Grey-Taguchi Method K. F. Muhammad , W. A. W. Yusoff Universiti Malaysia Pahang
6	030-icmmmm	Design evaluation framework for design engineers using improved Rough-Grey Analysis – A case study Faiz Mohd Turan , Badrul Omar Universiti Malaysia Pahang
7	044-icmmmm	Evaluation Of Nd2o5 Doped Y-Tzp Using Two Step Sintering Method. Dinesh s/o Ragurajan , Meenaloshini d/o Satgunam, Mohsen Golieskardi University Tenaga Nasional

Session 9
 Time: 1630-1800
 Venue: Ruai Belaga Level 1
 Session Chair: Assoc. Prof. Dr. Abdul Talib Bon

No	Paper ID	Presenter
1	090-icmmmm	A Process Based Cost Model for Semi-Solid Application: Aluminium below-knee prosthesis. Pailin Krachangphiphop , Napisphon Meemongkol and Jessada Wannasin Prince of Songkla University
2	075-icmmmm	Effect of Initial Concentration and Solution Temperature on Adsorption of Calcium-HEDP Scale Inhibitor Muhamad Syukri bin Abdul Khalid, Radhiyatul Hikmah binti Abu, Siti Ujila binti Masuri and Abdul Aziz bin Hairuddin Universiti Putra Malaysia
3	079-icmmmm	Value Chain Analysis: The Insight of Aluminium Recycling Umol Syamsyul Rakiman , Raja Zuraidah Raja Mohd Rasi, Aryani Ahmad Latiffi Universiti Tun Hussein Onn Malaysia
4	094-icmmmm	Flexural properties for two-ply glass fiber reinforced composites with different loading of CNT/Epoxy film produced by different methods Ervina 090-icmmmm Boon Kian, Mariatti Jaafar , Sinin Hamdan Universiti Sains Malaysia
5	056-icita	8D Methodology: An Effective Approach for Problem Solving in Automotive Assembly Line Wan Ahmad Najmuddin Wan Saidin , Azalan Mohamed Ibrahim, Mohd Zaidi Azir, Harlina Ngah, Noraishah Mohamad Noor and M.H Norhidayah International College of Automotive
6	071-icmmmm	Delignification studies of banana fibers for radiation graft copolymerization Sarala Selambakkannu , Nor Azillah Fatimah Othman, Siti Fatahiyah Mohamad and Hamdani Saidi Malaysian Nuclear Agency
7	064-icmmmm	Ceramic membrane surface roughness induced by modified phase inversion: The effect of thermodynamic properties Siti Khadijah Hubadillah , Zawati Harun, Nurul Nabilah Aminudin, Nurafiqah Rosman Universiti Tun Hussein Onn Malaysia

Conference Venue

Hotel Grand Continental

Jalan Ban Hock, 93100 Kuching, Sarawak. Phone: 082-230 399
