### **Abstract**

This study examines the conceptualized effects of *Tawhidic* paradigm on economic policies to promote the growth of *halal* industry for sustainable wealth creation in Malaysia. *Tawhidic* paradigm provides guidance to economic policy thinking by relying upon the principles of *Qur'an* and *Sunnah* in formulating and implementing policy blueprint and instruments. The current policy thoughts are guided by market forces and sentiments which contributed to unbridled uncertainties and speculation. A *Tawhidic* paradigm policy thinking and process is developed to help ascertain the level of *Tawhidic* based policy thinking and practices at policy making, implementation and evaluation. Using personal interview with economic policy makers as method of collecting input, this study reveals that the informants do consider some levels of *Tawhidic* paradigm but the thoughts appear to be inadequate to help sustain wealth creation.

**Keywords:** *Public policy, Tawhidic paradigm, Malaysia*
