PART III – IMAGE

Chapter 7  Digital Graphic Image  93
Zeeshan Bhatti
Asadullah Shah

Chapter 8  Image Data Types  102
Zeeshan Bhatti
Asadullah Shah

PART IV – AUDIO

Chapter 9  Audio File Formats  115
Mohammed Saleh Atoum
A1a Abdulsalam Soliman Alarood

Chapter 10  Practices of Handling Audio  126
Adamu Ibrahim
Asadullah Shah
Akram M. Zeki

PART V – VIDEO

Chapter 11  Video  139
Adamu Ibrahim
Zeeshan Bhatti
Akram M. Zeki

PART VI – COMPUTER GRAPHICS

Chapter 12  Introduction to Computer Graphics  149
Akram M. Zeki
PART VII – APPLICATION OF MULTIMEDIA

Chapter 13  Application of Multimedia in Digital Watermarking  
Akram M. Zeki  
159

Chapter 14  Application of Multimedia in Language Self-Learner  
Athifah Nafshah Nooh  
Aisha Hassan A. Hashim

Introduction

The term Multimedia is a combination of two words “Multi” and “Media”. Multi is a short form for multiple, which stands for many or several countable things. Media stands for different digital information formats that can be presented to the users electronically. Therefore, we can simply say that, a combination of two or more media is a multimedia. It is defined as a collection of texts, sounds, images, animations and videos delivered to the users electronically in a digital format. Overall, multimedia includes everything we see, hear, read or touch, mostly in the form of image/picture, sound, audio, video, records, films, animations and more (Vaughan, 2010). The combination of these media elements has to be digitally manipulated to be rolled into one single multimedia product/application. Figure 1.1 shows a list of different forms of media as illustrated by Mishra (2012).

Each multimedia product is developed using different forms of media. For example, text media format consist of font size, font type, and font colour. Graphics media format consist of lines, boxes, circles, rectangles, arrows, and borders. Images media format consists of photographs, illustrations, diagrams, cartoons, and symbols. Audio media format consist of sound effects, music, and voice-over (Steinmetz and Nahrstedt, 1995). Video media format consist moving objects, voice, animations, as well as interface elements such as backgrounds, scenes,
