Foreword

INTERACT 2013 was the 14th of a series of INTERACT international conferences supported by the International Federation for Information Processing (IFIP) Technical Committee 13 on Human–Computer Interaction.

This year, INTERACT was held in Cape Town (South Africa), organized by the Nelson Mandela Metropolitan University (Port Elizabeth) and the Meraka Institute of Council for Scientific and Industrial Research (Pretoria) in collaboration with the University of Cape Town.

The Conference theme for INTERACT 2013, “Designing for Diversity,” recognizes the interdisciplinary, multidisciplinary and intercultural spirit of human–computer interaction (HCI) research and practice. The conference welcomes research and reports of practice that acknowledge diverse disciplines, abilities, cultures, and societies, and that address both the technical and social aspects of HCI. Within the broad umbrella of HCI, the conference sought contributions addressing new and emerging HCI disciplines, bridging cultural differences, and tackling important social problems.

Like its predecessors, INTERACT 2013 highlighted, to both the academic and the industrial world, the importance of the HCI discipline and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of HCI, found in INTERACT 2013 an exciting forum for communication with people of similar interests, to encourage collaboration and to learn.

INTERACT 2013 brought the conference to South Africa and Africa for the very first time. The African tradition of HCI focuses very much on the human and social aspects of HCI, recognizing the diversity of its people and the circumstance in which they go about their everyday lives. We hope that INTERACT 2013 will be remembered as a conference that brought the diversity of HCI research to the forefront, making the computerized world a better place for all, regardless of where they come from.

INTERACT 2013 took place 29 years after the first INTERACT held in September 1984 in London, UK. The IFIP Technical Committee 13 aims to develop the science and technology of the interaction between humans and computing devices through different Working Groups and Special Interests Groups, all of which, together with their officers, are listed within these proceedings.

We thank all the authors who chose INTERACT 2013 as the venue to publish their research. This was again an outstanding year for the conference in terms of submissions in all the technical categories, especially since the conference moved away from the traditional predominantly European venues. In total, we received 639 submissions. Of these, 270 submissions were accepted:
128 as full research papers  
77 as short research papers  
31 as interactive posters  
2 as industrial programme papers  
4 as panels  
1 as a special interest group  
1 as a tutorial  
9 as workshops  
9 to the African Masters Consortium  
8 to the Doctoral Consortium

The acceptance rate for the full and short research papers was 31% and 45%, respectively.

A Programme Committee meeting consisting of the Technical Programme Chairs and the Track Chairs, as well as member of IFIP Technical Committee 13, preceded the final decision on which submissions to accept. This powerful effort was only possible thanks to the diligent work of many people. Our sincere gratitude goes to the almost 700 members of our International Programme Committee who willingly assisted and ensured the high quality of the INTERACT Conference papers was properly maintained. Although some people had to be bullied into reviewing (sorry about that), everyone submitted their reviews on time without a murmur of complaint. Thank you all for the effort that you so obviously put into this task. A special thank you must go to our Track Chairs, who put in a tremendous amount of work to ensure that quality was maintained throughout.

In addition, we have to thank the members of the Organizing Committee, the staff at the Council for Industrial and Scientific Research, Nelson Mandela Metropolitan University and the University of Cape Town for their unflagging assistance with all aspects of planning and managing the many administrative and organizational issues. We also have to thank our student volunteers for making sure that everything ran smoothly at the conference itself.

Finally, we wish to express a special thank you to the Proceedings Publication Chair, Marco Winckler, who painstakingly put this volume together.

September 2013  
Paula Kotzé  
Janet Wesson  
(GENERAL 2013 Conference Chairs)  
Gary Marsden  
Gitte Lindgaard  
(GENERAL 2013 Technical Programme Chairs)
Established in 1989, the International Federation for Information Processing Technical Committee on Human–Computer Interaction (IFIP TC13) is an international committee of 30 member national societies and seven Working Groups, representing specialists in human factors, ergonomics, cognitive science, computer science, design, and related disciplines. INTERACT is its flagship conference, staged biennially in different countries in the world.

IFIP TC13 aims to develop the science and technology of human–computer interaction (HCI) by encouraging empirical research, promoting the use of knowledge and methods from the human sciences in design and evaluation of computer systems; promoting better understanding of the relationship between formal design methods and system usability and acceptability; developing guidelines, models and methods by which designers may provide better human-oriented computer systems; and, cooperating with other groups, inside and outside IFIP, to promote user-orientation and humanization in system design. Thus, TC13 seeks to improve interactions between people and computers, encourage the growth of HCI research, and disseminate these benefits worldwide.

The main orientation is toward users, especially the non-computer professional users, and how to improve human–computer relations. Areas of study include: the problems people have with computers; the impact on people in individual and organizational contexts; the determinants of utility, usability, and acceptability; the appropriate allocation of tasks between computers and users; modeling the user to aid better system design; and harmonizing the computer to user characteristics and needs.

While the scope is thus set wide, with a tendency toward general principles rather than particular systems, it is recognized that progress will only be achieved through both general studies to advance theoretical understanding and specific studies on practical issues (e.g., interface design standards, software system consistency, documentation, appropriateness of alternative communication media, human factors guidelines for dialogue design, the problems of integrating multimedia systems to match system needs and organizational practices, etc.).

In 1999, TC13 initiated a special IFIP Award, the Brian Shackel Award, for the most outstanding contribution in the form of a refereed paper submitted to and delivered at each INTERACT. The award draws attention to the need for a comprehensive human-centered approach in the design and use of information technology in which the human and social implications have been taken into account. Since the process to decide the award takes place after papers are submitted for publication, the award is not identified in the proceedings.
IFIP TC13 stimulates working events and activities through its Working Groups (WGs) and Special Interest Groups (SIGs). WGs and SIGs consist of HCI experts from many countries, who seek to expand knowledge and find solutions to HCI issues and concerns within their domains, as outlined below.

- **WG13.1 (Education in HCI and HCI Curricula)** aims to improve HCI education at all levels of higher education, coordinate and unite efforts to develop HCI curricula and promote HCI teaching.
- **WG13.2 (Methodology for User-Centered System Design)** aims to foster research, dissemination of information and good practice in the methodical application of HCI to software engineering.
- **WG13.3 (HCI and Disability)** aims to make HCI designers aware of the needs of people with disabilities and encourage development of information systems and tools permitting adaptation of interfaces to specific users.
- **WG13.4 (also WG2.7) (User Interface Engineering)** investigates the nature, concepts and construction of user interfaces for software systems, using a framework for reasoning about interactive systems and an engineering model for developing user interfaces.
- **WG13.5 (Human Error, Safety and System Development)** seeks a framework for studying human factors relating to systems failure, develops leading-edge techniques in hazard analysis and safety engineering of computer-based systems, and guides international accreditation activities for safety-critical systems.
- **WG13.6 (Human-Work Interaction Design)** aims at establishing relationships between extensive empirical work-domain studies and HCI design. It will promote the use of knowledge, concepts, methods and techniques that enable user studies to procure a better apprehension of the complex interplay between individual, social and organizational contexts and thereby a better understanding of how and why people work in the ways that they do.
- **WG13.7 (Human–Computer Interaction and Visualization)** is the newest of the working groups under the TC13. It aims to establish a study and research program that will combine both scientific work and practical applications in the fields of HCI and visualization. It will integrate several additional aspects of further research areas, such as scientific visualization, data mining, information design, computer graphics, cognition sciences, perception theory, or psychology, into this approach.
- **SIG 13.1 (HCI and International Development)** aims to promote the application of interaction design research, practice and education to address the needs, desires and aspirations of people in the developing world; support and develop the research, practice and education capabilities of HCI institutions and organizations based in the developing world; develop links between the HCI community in general, and IFIP TC13 in particular, with other relevant communities involved in development, especially IFIP WG 9.4 Computers in Developing Countries.
SIG 13.2 (Interaction Design and Children) aims to provide a forum for all things relating to interaction design and HCI where the intended users or appropriators of the technology or service are children. The definition of children is broad rather than narrow, including toddlers and teenagers, but the core work, currently at least, is with children in junior schools.

New Working Groups and Special Interest Groups are formed as areas of significance to HCI arise. Further information is available at the IFIP TC13 website: http://www.tc13.org

Table of Contents – Part I

Long and Short Papers

3D Navigation
Assessing the Impact of Automatic vs. Controlled Rotations on Spatial Transfer with a Joystick and a Walking Interface in VR ................. 1
   Florian Larrue, Hélène Sauzéon, Déborah Foloppe,
   Grégory Wallet, Jean-René Cazalets, Christian Gross,
   Martin Hachet, and Bernard N’Kaoua

Designing Intuitive Multi-touch 3D Navigation Techniques .............. 19
   Damien Marchal, Clément Moerman, Géry Casiez, and Nicolas Roussel

Truly Useful 3D Drawing System for Professional Designer by “Life-Sized and Operable” Feature and New Interaction .................. 37
   Shun’ichi Tano, Shinya Yamamoto, Junko Ichino,
   Tomonori Hashiyama, and Mitsuru Iwata

3D Technologies - 3D Object Manipulation
A One-Handed Multi-touch Method for 3D Rotations ..................... 56
   Douglas Scheurich and Wolfgang Stuerzlinger

HandsIn3D: Supporting Remote Guidance with Immersive Virtual Environments ......................................................... 70
   Weidong Huang, Leila Alem, and Franco Tecchia

MotionBender: A Gesture-Based Interaction Technique for Editing Motion Paths ................................................................. 78
   Frederic Raber, Quan Nguyen, and Michael Kipp

RelicPad: A Hands-On, Mobile Approach to Collaborative Exploration of Virtual Museum Artifacts ................................. 86
   Steven Neale, Winyu Chinthammit, Christopher Lueg, and
   Paddy Nixon

Augmented Reality
Funneling and Saltation Effects for Tactile Interaction with “Detached” Out of the Body Virtual Objects ............................... 104
   Jaedong Lee, Sangyong Lee, and Gerard J. Kim
Table of Contents – Part I

Precise Pointing Techniques for Handheld Augmented Reality ............. 122
    Thomas Vincent, Laurence Nigay, and Takeshi Kurata

The Unadorned Desk: Exploiting the Physical Space around a Display as an Input Canvas ................................................. 140
    Doris Hausen, Sebastian Boring, and Saul Greenberg

Cognitive Workload

GSR and Blink Features for Cognitive Load Classification ............... 159
    Nargess Nourbakhsh, Yang Wang, and Fang Chen

Information Holodeck: Thinking in Technology Ecologies ............. 167
    Sharon Lynn Chu and Francis Quek

Managing Personal Information across Multiple Devices: Challenges and Opportunities ......................................................... 185
    Simone Beets and Janet Wesson

Mobility Matters: Identifying Cognitive Demands That Are Sensitive to Orientation ........................................................... 193
    G. Michael Poor, Guy Zimmerman, Dale S. Klopfer, Samuel D. Jaffee, Laura Marie Leventhal, and Julie Barnes

Cognitive Workload and Decision Support

Ambient Timer – Unobtrusively Reminding Users of Upcoming Tasks with Ambient Light ......................................................... 211
    Heiko Müller, Anastasia Kazakova, Martin Pielot, Wilko Heuten, and Susanne Boll

Novel Modalities for Bimanual Scrolling on Tablet Devices ............ 229
    Ross McLachlan and Stephen A. Brewster

Public Information System Interface Design Research .................... 247
    Ning Zhang, Junliang Chen, Zhengjie Liu, and Jun Zhang

Creating Effective 3D Displays

Comparison of User Performance in Mixed 2D-3D Multi-Display Environments ................................................................. 260
    Abhijit Karnik, Tovi Grossman, and Sriram Subramanian

Touching the Void Revisited: Analyses of Touch Behavior on and above Tabletop Surfaces ...................................................... 278
    Gerd Bruder, Frank Steinicke, and Wolfgang Stuerzlinger

Designing for Inclusiveness I

Accessibility of Public Web Services: A Distant Dream?.................. 566
Kristiina Nurmela, Antti Pirhonen, and Airi Salminen

Augmenting Accessibility Guidelines with User Ability Rationales ...... 579
Christophe Ponsard, Pascal Beaujeant, and Jean Vanderdonckt

Lessons Learned from Crowd Accessibility Services ..................... 587
Hironobu Takagi, Susumu Harada, Daisuke Sato, and Chieko Asakawa

Designing for Inclusiveness II

Designing for Different Users and Multiple Devices: A Roadmap
towards Inclusive Environments........................................ 605
Ig Ibert Bittencourt, Maria Cecília Baranauskas, Diego Dermeval,
Juliana Braga, and Roberto Pereira

User Control in Adaptive User Interfaces for Accessibility ............ 623
Matthias Peissner and Rob Edlin-White

Vibro-Tactile Enrichment Improves Blind User Interaction with Mobile
Touchscreens ................................................................. 641
Maria Claudia Buzzi, Marina Buzzi, Barbara Leporini, and
Maria Teresa Paratore

Designing with- and for People with Special Needs

Designing with Dementia: Guidelines for Participatory Design together
with Persons with Dementia .................................................. 649
Niels Hendriks, Frederik Truyen, and Erik Duval

Navigating, Discovering and Exploring the Web: Strategies Used by
People with Print Disabilities on Interactive Websites............... 667
Christopher Power, Helen Petrie, David Swallow, Emma Murphy,
Bláithín Gallagher, and Carlos A. Velasco

Participatory Design with Blind Users: A Scenario-Based Approach .... 685
Nuzhah Gooda Sahib, Tony Stockman, Anastasios Tombros, and
Oussama Metatla

Display Manipulations

An Evaluation of Stacking and Tiling Features within the Traditional
Desktop Metaphor ............................................................ 702
Clemens Zeidler, Christof Lutteroth, and Gerald Weber
Investigating Pointing Tasks across Angularly Coupled Display Areas . . . 720
  Fabian Hennecke, Alexander De Luca, Ngo Dieu Huong Nguyen,
  Sebastian Boring, and Andreas Butz

Semi-supervised Learning Based Aesthetic Classifier for Short
Animations Embedded in Web Pages ........................................ 728
  Dipak Bansal and Samit Bhattacharya

Switchback Cursor: Mouse Cursor Operation for Overlapped
Windowing ................................................................. 746
  Shota Yamanaka and Homei Miyashita

Diversity/ICT in Social Development

A Scandinavian Approach to Designing with Children in a Developing
Country - Exploring the Applicability of Participatory Methods ........ 754
  Nahid Wakil and Peter Dalsgaard

Availability4D: Refining the Link between Availability and Adoption in
Marginalised Communities .................................................. 762
  Fritz Meissner and Edwin Blake

Communication Choices to Engage Participation of Rural Indonesian
Craftspeople in Development Projects .................................... 780
  Ellya Zulaikha and Margot Brereton

Content Prototyping – An Approach for Engaging Non-technical Users
in Participatory Design ........................................................ 788
  Maletsabisa Molapo and Gary Marsden

Designing a Platform for Participatory Urbanism: Transforming
Dialogue into Action in Underserved Communities ...................... 796
  Leonardo Giusti, Amelia Schladow, Amar Boghani, Steve Pomeroy,
  Nicholas Wallen, and Federico Casalegno

Author Index ..................................................................... 805
Table of Contents – Part II

Long and Short Papers (Continued)

E-Input/Output Devices (e-Readers, Whiteboards)
Leisure-Based Reading and the Place of E-Books in Everyday Life .... 1
   Annika Hupfeld, Abigail Sellen, Kenton O’Hara, and Tom Rodden

Reading together as a Leisure Activity: Implications for E-reading.... 19
   Michael Massimi, Rachelle Campigotto, Abbas Attarwala, and
   Ronald M. Baecker

The Mysterious Whiteboard .................................................. 37
   Clemens Nylandsted Klokmose and Olav W. Bertelsen

Facilitating Social Behaviour and Collaboration I
A Tabletop System Using Infrared Image Recognition for Multi-user
Identification ........................................................................ 55
   Shota Suto and Susumu Shibusawa

Performing Online and Offline: How DJs Use Social Networks ...... 63
   Mayur Karnik, Ian Oakley, and Valentina Nisi

Tension Space Analysis: Exploring Community Requirements
for Networked Urban Screens ................................................. 81
   Steve North, Holger Schnädelbach, Ava Fatah gen Schieck,
   Wallis Motta, Lei Ye, Moritz Behrens, and Efstathia Kostopoulou

Facilitating Social Behaviour and Collaboration II
BinCam: Designing for Engagement with Facebook for Behavior
Change .................................................................................. 99
   Rob Comber, Anja Thieme, Ashur Rafiev, Nick Taylor,
   Nicole Krämer, and Patrick Olivier

OpinionBlocks: A Crowd-Powered, Self-improving Interactive Visual
Analytic System for Understanding Opinion Text ...................... 116
   Mengdie Hu, Huahai Yang, Michelle X. Zhou, Liang Gou,
   Yunyao Li, and Eben Haber
Gaze-Enabled Interaction Design

Eyes Only: Navigating Hypertext with Gaze .......................... 153
   Abdul Moiz Penkar, Christof Lutteroth, and Gerald Weber

Eye Pull, Eye Push: Moving Objects between Large Screens and
Personal Devices with Gaze and Touch .............................. 170
   Jayson Turner, Jason Alexander, Andreas Bulling,
   Dominik Schmidt, and Hans Gellersen

Tools for a Gaze-Controlled Drawing Application – Comparing Gaze
 Gestures against Dwell Buttons ........................................ 187
   Henna Heikkilä

Gesture and Tactile User Interfaces

Designing Gesture-Based Control for Factory Automation .......... 202
   Tomi Heimonen, Jaakko Hakulinen, Markku Turunen,
   Jussi P.P. Jokinen, Tuuli Keskinen, and Roope Raisamo

Metamodels Infrastructure and Heuristics for Metamodel-Driven
Multi-touch Interaction ..................................................... 210
   Víctor López-Jaquero, Elena Navarro, Francisco Montero, and
   Pascual González

TactiPEd: Easy Prototyping of Tactile Patterns ...................... 228
   Sabrina Panéels, Margarita Anastassova, and Lucie Brunet

Gesture-Based User Interface Design
and Interaction I

Towards Many Gestures to One Command: A User Study
for Tabletops ................................................................. 246
   Yosra Rekik, Laurent Grisoni, and Nicolas Roussel

User-Defined Body Gestures for an Interactive Storytelling Scenario .... 264
   Felix Kistler and Elisabeth André

User-Defined Gestures for Augmented Reality ....................... 282
   Thammathip Piumsomboon, Adrian Clark, Mark Billinghurst, and
   Andy Cockburn
Gesture-Based User Interface Design and Interaction II

Gesture-Based Interaction in Domotic Environments: State of the Art and HCI Framework Inspired by the Diversity ................................. 300
  Ana Carla de Carvalho Correia, Leonardo Cunha de Miranda, and Heiko Hornung

Thumbs Up: 3D Gesture Input on Mobile Phones Using the Front Facing Camera ................................................................. 318
  Paul Schmieder, John Hosking, Andrew Luxton-Reilly, and Beryl Plimmer

User and System Cross-Learning of Gesture Commands on Pen-Based Devices ................................................................. 337
  PeiYu Li, Manuel Bouillon, Eric Anquetil, and Grégoire Richard

Health/Medical Devices

Adoption and Appropriation: A Design Process from HCI Research at a Brazilian Neurological Hospital ................................. 356
  Junia Anacleto and Sidney Fels

Chronicles: Supporting Conversational Narrative in Alternative and Augmentative Communication .............................................. 364
  Annalu Waller, Rachel Menzies, Daniel Herron, Suzanne Prior, Rolf Black, and Thilo Kroll

Development of Novel eHealth Services for Citizen Use – Current System Engineering vs. Best Practice in HCI .............................. 372
  Isabella Scandurra, Jesper Holgersson, Thomas Lind, and Gunilla Myreteg

Increasing Accuracy by Decreasing Presentation Quality in Transcription Tasks ................................................................. 380
  Frank Soboczenski, Paul Cairns, and Anna L. Cox

You Can’t Touch This: Potential Perils of Patient Interaction with Clinical Medical Devices .................................................. 395
  Paul Noble and Ann Blandford

Humans and Robots

A Dog Tail for Utility Robots: Exploring Affective Properties of Tail Movement ................................................................. 403
  Ashish Singh and James E. Young

## Social Behaviour, Collaboration and Presence

An Experimental Study of Chinese Shopping Related Sharing Behaviors ................................................................. 608
  Min Li, Jun Zhang, Zhengjie Liu, and Graham I. Johnson

Perceptions of Facebook Privacy and Career Impression Management ... 616
  Danielle Pilcer and Andrew Thatcher

Simplifying Remote Collaboration through Spatial Mirroring ............ 624
  Fabian Hennecke, Simon Voelker, Maximilian Schenk,
  Hauke Schaper, Jan Borchers, and Andreas Butz

Social Influence from Personalized Recommendations to Trusting
Beliefs of Websites: Intermediate Role of Social Presence ............ 632
  Yanan Li and Yong Wang

Social Network Users’ Religiosity and the Design of Post Mortem
Aspects .................................................................................................................................................. 640
  Cristiano Maciel and Vinicius Carvalho Pereira

## Social Collaborative Interaction

A Tale of Two Puppets, Two Avatars and Two Countries ............... 658
  Yoram I. Chisik, Monchu Chen, and M. Clara Correia Martins

Avalanche! Reanimating Multiple Roles in Child Computer Interaction
Design ..................................................................................................................................................... 666
  Timo Göttel

Likeness and Dealbreakers: Interpreting Interpersonal Compatibility
from Online Music Profiles ................................................................. 674
  Mo Kudeki and Karrie Karahalios

Paraplay: Exploring Playfulness Around Physical Console Gaming .... 682
  John Downs, Frank Vetere, and Steve Howard

## Social Media

Exploring Twitter Interactions through Visualization Techniques: Users
Impressions and New Possibilities .................................................. 700
  Guilherme Coletto Rotta, Vinicius Silva de Lemos,
  Ana Luiza Moura da Cunha, Isabel Harb Manssour,
  Milene Selbach Silveira, and André Fagundes Pase

Helping Me Helping You: Designing to Influence Health Behaviour
through Social Connections ................................................................. 708
  Noreen Kamal, Sidney Fels, Joanna McGrenere, and Kara Nance

Table of Contents – Part IV

Long and Short Papers (Continued)

Supporting Physical Activity

The Development and Evaluation of an Interactive System for Age
Related Musculoskeletal Rehabilitation in the Home ..................... 1
   Mobolaji Ayoade, Stephen Uzor, and Lynne Baillie

Walking in the Wild – Using an Always-On Smartphone Application
to Increase Physical Activity ................................................ 19
   Tim Harries, Parisa Eslambolchilar, Chris Stride, Ruth Rettie, and
   Simon Walton

Supporting Shared Activities

F-Formations in Cooking Together: A Digital Ethnography Using
YouTube ................................................................. 37
   Jeni Paay, Jesper Kjeldskov, Mikael B. Skov, and Kenton O’Hara

Practices Surrounding Event Photos ........................................ 55
   Dhaval Vyas, Anton Nijholt, and Gerrit van der Veer

Sharing Experiences over Video: Watching Video Programs together at
a Distance ................................................................. 73
   Anna Macaranas, Gina Venolia, Kori Inkpen, and John C. Tang

Sustainability

Exploring Reactions to Widespread Energy Monitoring ................. 91
   James A. Colley, Benjamin Bedwell, Andy Crabtree, and
   Tom Rodden

HCI for City Farms: Design Challenges and Opportunities ............ 109
   Peter Lyle, Jaz Hee-jeong Choi, and Marcus Foth

Towards Engaged Consumption: New Sources of Inspiration
for Eco-feedback Design ................................................... 117
   Stephen Snow and Margot Brereton

Sustainability at Home: An Exploratory Study on Monitoring
Needs and Energy Management Actions of Solar Power Producers.... 125
   Dounia Lahoual and Myriam Fréjus
Watts Burning on My Mailbox: A Tangible Art Inspired Eco-feedback Visualization for Sharing Energy Consumption ............................. 133
Filipe Quintal, Mary Barreto, Nuno Nunes, Valentina Nisi, and Lucas Pereira

Tabletop Computing

Dynamic Spatial Positioning: Physical Collaboration around Interactive Table by Children in India .................................................. 141
Izdihar Jamil, Kenton O’Hara, Mark Perry, Abhijit Karnik,
Mark T. Marshall, Swathi Jha, Sanjay Gupta, and Sriram Subramanian

Dynamic Tangible User Interface Palettes .................................... 159
Martin Spindler, Victor Cheung, and Raimund Dachselt

TIDE: Lightweight Device Composition for Enhancing Tabletop Environments with Smartphone Applications .......................... 177
Léo Sicard, Aurélien Tabard, Juan David Hincapié-Ramos, and Jakob E. Bardram

Text Comprehensibility

Evaluating the Effect of Phrase Set in Hindi Text Entry .................. 195
Mohit Jain, Khushboo Tekchandani, and Khai N. Truong

Frequent Words Improve Readability and Short Words Improve Understandability for People with Dyslexia ............................. 203
Luz Rello, Ricardo Baeza-Yates, Laura Dempere-Marco, and Horacio Saggion

TicQR: Flexible, Lightweight Linking of Paper and Digital Content Using Mobile Phones .................................................. 220
Jennifer Pearson, Simon Robinson, George Buchanan, and Matt Jones

Tracking Eyes and Head

One Half or 50%? An Eye-Tracking Study of Number Representation Readability ................................................................. 229
Luz Rello, Susana Bautista, Ricardo Baeza-Yates, Pablo Gervás,
Raquel Hervás, and Horacio Saggion

Studying a Head Tracking Technique for First-Person-Shooter Games in a Home Setting .................................................. 246
Torben Sko, Henry Gardner, and Michael Martin
### Usability Evaluation and Technology Acceptance

**Did We Miss Something? Correspondence Analysis of Usability Data**  
*Stanislaw Zabramski and Wolfgang Stuerzlinger*  
272

**Social Overlays: Collectively Making Websites More Usable**  
*Tao Dong, Mark S. Ackerman, Mark W. Newman, and Gaurav Paruthi*  
280

**Usability Evaluation in a Digitally Emerging Country: A Survey Study**  
*Fulvio Lizano, Maria Marta Sandoval, Anders Bruun, and Jan Stage*  
298

**Understanding Diversity – The Impact of Personality on Technology Acceptance**  
*Kay Behrenbruch, Matthias Söllner, Jan Marco Leimeister, and Ludger Schmidt*  
306

### User Preferences and Behaviour

**A Vocabulary to Access Users’ Cultural Perspectives in Human-Computer Interaction**  
*Catia Maria Dias Ferreira, Luciana Cardoso de Castro Salgado, and Clarisse Sieckenius de Souza*  
314

**Characteristics of Elderly User Behavior on Mobile Multi-touch Devices**  
*Susumu Harada, Daisuke Sato, Hironobu Takagi, and Chieko Asakawa*  
323

**From Persona to Techsona**  
*Susanne Bødker and Clemens Nylandsted Klokmose*  
342

**Going Global with Personas**  
*Lene Nielsen, Kira Storgaard Nielsen, Jan Stage, and Jane Billestrup*  
350

**On Users’ Preference on Localized vs. Latin-Based CAPTCHA Challenges**  
*Christos Fidas and Artemios G. Voyiatzis*  
358
User Requirements Capture and Analysis

Designing for the Functionality South African Internet Banking Websites Should Provide to Address the Needs of Generation-Y Users .............................................................. 366
   Sebabatso Mtimkulu, Judy van Biljon, and Tobias van Dyk

“Nobody Other Than Me Knows What I Want:” Customizing a Sports Watch .......................................................... 384
   Piia Nurkka

Online Requirements and Portal Design for Female University Science and Technology Students in Kenya ......................... 403
   Stephen Kimani, Eunice Njeri, and John Njue

UX in Work/Educational Contexts

Finger on the Pulse: The Value of the Activity Stream in the Enterprise .............................................................. 411
   Ido Guy, Tal Steier, Maya Barnea, Inbal Ronen, and Tal Daniel

Relationship-Based Business Process Crowdsourcing? ...................... 429
   Jacki O’Neill and David Martin

User Experience and Learning Experience in Online HCI Courses .... 447
   Saila Ovaska

Voice/Sound-Based Computing

Audvert: Using Spatial Audio to Gain a Sense of Place .................... 455
   Liam Betsworth, Nitendra Rajput, Saurabh Srivastava, and Matt Jones

Rhythms of the Domestic Soundscape: Ethnomethodological Soundwalks for Phatic Technology Design ......................... 463
   Hanif Baharin, Sean Rintel, and Stephen Viller

“Roger that!” — The Value of Adding Social Feedback in Audio-Mediated Communications ....................... 471
   Rahul Rajan, Joey Hsiao, Deven Lahoti, and Ted Selker

Supporting Voice Content Sharing among Underprivileged People in Urban India ...................................................... 489
   Christian Remy, Sheetal K. Agarwal, Arun Kumar, and Saurabh Srivastava
Interactive Posters

Adding Vibrotactile Feedback to Large Interactive Surfaces .............. 507
  Julian Seifert, Markus Packeiser, and Enrico Rukzio

Analysis and Visualization of Interactions with Mobile Web Applications ......................................................... 515
  Paolo Burzacca and Fabio Paternò

Beats Down: Using Heart Rate for Game Interaction in Mobile Settings .............................................................. 523
  Claudia Stockhausen, Justine Smyzek, and Detlef Krömker

Cultural Congruence and Rating Scale Biases in Homepages ........... 531
  Gitte Lindgaard, Cathy Dudek, and Gerry Chan

Diverse Ecologies – Interdisciplinary Development for Cultural Education ............................................................... 539
  Michael Heidt, Kalja Kanellopoulos, Linda Pfeiffer, and Paul Rosenthal

Evaluation of PhonAge: An Adapted Smartphone Interface for Elderly People ........................................................ 547
  Farah Arab, Yasir Malik, and Bessam Abdulrazak

Experimentally Manipulating Positive User Experience Based on the Fulfilment of User Needs ...................................... 555
  Andreas Sonnleitner, Marvin Pawlowski, Timm Kässer, and Matthias Peissner

Floffy: Designing an Outdoor Robot for Children ....................... 563

Human-Spreadsheet Interaction ................................................. 571
  Andrea Kohlhase

Improving Students Learning Programming Skills with ProGames – Programming through Games System .................. 579
  Raquel Hijón-Neira, Ángel Velázquez-Iturbide, Celeste Pizarro-Romero, and Luís Carriço

Long-Term Experiences with an Iterative Design of a QR-Code-Based Payment System for Beverages ...................... 587
  Max-Emanuel Maurer, Alexander De Luca, Alina Hang, Doris Hausen, Fabian Hennecke, Sebastian Loehmann, Henri Palleis, Hendrik Richter, Simon Stusak, Aurélien Tabard, Sarah Tausch, Emanuel von Zeischwitz, Franziska Schwamb, Heinrich Hussmann, and Andreas Butz
Moment Machine: Opportunities and Challenges of Posting Situated Snapshots onto Networked Public Displays .......................................................... 595
   Nemanja Memarovic, Ava Fatah gen Schieck, Efstathia Kostopoulou, Moritz Behrens, and Martin Traunmueller

Overview Scrollbar: A Scrollbar Showing an Entire Document as an Overview .......................................................... 603
   Ko Mizoguchi, Daisuke Sakamoto, and Takeo Igarashi

Participatory Design for Cultural Representation: A Cultural Transparency Perspective ........................................ 611
   Amalia G. Sabiescu and Nemanja Memarovic

Reducing Driver Task Load and Promoting Sociability through an Affective Intelligent Driving Agent (AIDA) ............... 619
   Kenton Williams and Cynthia Breazeal

Semantic Modelling in Support of Adaptive Multimodal Interface Design .......................................................... 627
   Elena Tsiporkova, Anna Hristoskova, Tom Tourwé, and Tom Stevens

Supporting Improved Maternity Care by Midwives: Design Opportunities and Lessons Learned ........................................ 635
   Abdullah Al Mahmud and David V. Keyson

Technology Enhanced PBL in HCI Education: A Case Study ........ 643
   Christina Vasiliou, Andri Ioannou, and Panayiotis Zaphiris

The ‘Relay Ideation’ Technique: Moving from Problem Understanding to Problem Solving in the Design Process ......................... 651
   Karin Slegers, Pieter Duysburgh, and An Jacobs

The Effect of Stress on Cognitive Load Measurement ..................... 659
   Dan Conway, Ian Dick, Zhidong Li, Yang Wang, and Fang Chen

The PEW Framework for Worth Mapping .......................................................... 667
   Fatoumata Camara, Gaëlle Calvary, and Rachel Demumieux

The Profile of Law Clerks Using Judiciary Informatics in Turkey ........ 675
   Zerrin Sungur, Özlem Alpu, Özlem Oktal, and Berna Yazıcı

Towards a Communication System for People with Athetoid Cerebral Palsy .......................................................... 681
   Yohan Guerrier, Christophe Kolski, and Franck Poirier

Towards Supporting the Existing Workplace Practices of a Community of Brazilian Healthcare Professionals ...................... 689
   Roberto Calderon, Sidney Fels, and Junia Anacleto
