15,000 die in eating facilities that will curb the growing brain drain of its scholars to the West

STEMMING THE TIDE! - UNIVERSAL DEVELOPMENT VS. ISLAMIC COUNTRIES: NEED TO ESTABLISH

Dr. Moud Ahmad

We have come to realize that the Muslim world was once a giant in knowledge and civilization. America is a small country that has taken the lead in scientific research, engineering, and medical knowledge. We have paid dearly to correct our mistakes. We have to make it a goal to attract the best scientific minds to work in our laboratories, universities, and clinics. We must attract the best minds from the West and help them become experts in their fields. We should also create a friendly environment for the best minds to come to our country and work on projects that will benefit our country. We should make our country a place where the best minds from the West can come and work.
