### Abstract

Islamic banking in Malaysia has evolved rapidly since its first invention in 1983. Throughout 30 years of development, various products have been developed to fulfill the demands of the society both Muslim and Non-Muslim. Positive support and constructive criticisms have flourished the industry and made the product innovation to be enhanced accordingly. With regards to the products, retail **financing** is observed to be so dearer to the society compared to other form of **financing** like trade and corporate. **Home financing** is regarded as the most influential one since it normally affects long term commitment of the customer. Thus, this paper aims at analysing **pricing issue** of **home financing** products offered in Malaysia specifically BBA and MMP. The study uses content analysis method with intense and analytical readings of the previous texts and literatures on **issues** observed in the two products. The **issue** will then be comparatively reviewed using Maqasid-based appraisals.
