

WCIT 2016

THE 3rd WORLD CONFERENCE ON ISLAMIC THOUGHT & CIVILIZATION

FUTURE WORLD

www.wcit2016.my

Background

Here we are again, welcoming all to the 3rd World Conference on Islamic Thought and Civilization (WCIT) with the theme 'Future World'. Retrospectively, WCIT 2014 had accepted more than 450 abstracts, 300 presented papers and participations from 15 countries.

WCIT2016 cordially welcome scholars, theoreticians, researchers, teachers, administrators, professionals, practitioners and other interested individuals from around the world and different areas of expertise to participate or to submit their research papers for consideration from any of the relevant areas as per mentioned in the conference scope & themes.

Conference Scope & Themes

'Future World' has been selected as the theme for WCIT2016, because it holds a great deal of significance behind it. What do we see in the future of the world? What does the future hold for us? What matters is the value of our actions, attitudes and contributions as Muslims that can shift the world's future. From poverty to social development, technological advancement to environmental sustainability, the answers to the questions depend highly on our behavior and the understanding of future implications.

Main Theme Future World

Sub Theme

- Future World of Higher Knowledge
- Climate Change and Humanitarian Issues
- Good Governance, Economics and Finance
- Media and International Politics
- Young Generation and Leadership

Paper Submission Methods

Prospective authors are kindly invited to submit their manuscripts before 28 September 2016 in Word Document (.doc) format via e-mail to wcit@kolejislamiah.edu.my

All submitted articles should report original, previously unpublished research results, experimental or theoretical. However, for conceptual, review, and case studies papers, authors need to include the introduction in the beginning of the paper and conclusion at the end of their papers.

Articles submitted to the Conference should be original and must not be under consideration for publication elsewhere. Manuscripts should follow the style of the Conference and are subjected to both reviewing and editing.

Objectives

The main objective of WCIT2016 is to provide a platform to discuss the ultimate approach and design in providing a holistic view and development plan in line with the Islamic thought and its principles. Meanwhile, the goals are as per below:

- i) to explore the moderate and simple approach in realizing the sustainability of human well-being.
- ii) to harmonize the conventional and general understanding towards development in Islamic Thought.
- iii) to synthesize the ideas in the global modernization and for the betterment of the future world.

Selected registered paid papers will also be published in our own Conference Journal Global Journal Al-Thaqafah (GJAT) which is currently indexed in Scopus, Directory Open Access Journal (DOAJ), Ulrich, Crossref, Google Scholar, Index Copernicus International and M/CPE upon the transfer of author's copyright.

Abstract

The scientific thinking in Islamic tradition is inspired by of genuine sources Divine revelation. It is mode of a systematic inquiry that triggered by the principles of the Islamic worldview and guided by the common thought of Muslim intellectual's community. Both, the proper understanding of the sources and conscious application of the principles of the worldview are essential to maintain the spirit of scientific thinking. The terminal goal of systematic inquiry in Islamic tradition is to utilize forces of the temporal for the Absolute, but achieving this noble goal is not possible without proper understanding of both the natural and human phenomena. This paper investigates the conceptual and rational frameworks of scientific thinking in Islamic tradition. Utilizing the analytic approach of qualitative method, the paper aims to study both the cognitive (epistemic) and conventional (social) aspects of scientific thinking based on Qur'anic perspective.

Keywords: systematic mind, scientific thinking, rational framework, Islamic worldview, systematic inquiry, epistemology, strategic approach
