TERRORISM DEMOCRACY

The West & The Muslim World

There are many books that address relations between Muslim and Western countries but this book is unique because it draws on the creative insights and wisdom of both Muslim and non-Muslim scholars from various countries. These scholars grapple with the deep and profoundly complex roots of the problem, while offering a message of hope that treats the attacks of 9/11 as a clarion call for an increase in constructive managements between Islam and the West. The result is a comprehensive and coherent assessment by scholars from a range of disciplines who appreciate the need for transdisciplinary practices that reduce prejudice and promote tolerance across levels, from individual to international.

Dan Christie
Professor of Psychology
Ohio State University, USA

The collection, written by Muslim and non-Muslim experts is a welcome addition to the literature that provide an unbiased account of democracy and terrorism. It shows that the roots of terrorism and the failure of democracy in the Muslim world stems from Western government policy rather than from the activities of the Muslim activists.

Syed Serajul Islam
Professor of Political Science
Lakehead University, Canada

The chapters written by experts challenge the conventional view on the issues of democracy and terrorism and the relationship between the West and the Muslim world. This book makes a useful contribution to the continuing debate on Western attempts at exporting democracy to combat terrorism in the Muslims world and will be appreciated by the lay readers as well as the specialists.
