|   | <b>Page</b> |
|---|-------------|
| List of Tables  | viii        |
| List of Plates  | ix          |
| Foreword  | xi          |
| Preface   | xiii        |
| Acknowledgement   | xv          |
| <b>Chapter 1 Introduction</b>   | <b>1</b>    |
| Background  | 1           |
| New agriculture   | 3           |
| Farming systems   | 3           |
| Biodiversity  | 5           |
| <b>Chapter 2 The State of Diversity</b>                                       | <b>9</b>    |
| Introduction  | 9           |
| Value of Plant Genetic Resources for Food and Agriculture (PGRFA) in Malaysia | 9           |
| State of diversity of fruit genetic resources                                 | 10          |
| State of diversity of aromatic plant species                                  | 15          |
| Medicinal plant genetic resources   | 17          |
| State of diversity of vegetable crops genetic resources                       | 17          |
| Rice genetic resources  | 18          |
| Threats to PGRFA  | 19          |
| <b>Chapter 3 The State of <i>In situ</i> Conservation</b>                     | <b>21</b>   |
| Inventories and surveys   | 21          |
| On-farm management and improvement of PGRFA                                   | 28          |
| Restoring agricultural system after disaster                                  | 30          |

---

|   |    |
|---|----|
| <i>In situ</i> conservation of wild crop relatives and wild plants<br>for food production | 30 |
| <b>Chapter 4 The State of <i>Ex situ</i> Conservation</b>                                 | 33 |
| Sustaining and expanding <i>ex situ</i> collections                                       | 33 |
| Planned and targeted collections  | 49 |
| Constraints in implementing <i>ex situ</i> conservation                                   | 54 |
| <b>Chapter 5 The State of Use of PGRFA</b>  | 57 |
| The importance of utilization   | 57 |
| Utilization and enhancing the use of plant genetic resources                              | 57 |
| a) Under-utilized crops   | 57 |
| b) Capacities and improved training in plant breeding                                     | 61 |
| c) Increased pre-breeding activities  | 61 |
| d) Core collections   | 66 |
| e) Diversity-rich products  | 66 |
| f) Seed supply systems and the role of markets  | 68 |
| g) Crop improvement programmes and food security  | 70 |
| Major constraints and needs to improve the utilization of<br>conserved PGR                | 72 |
| <b>Chapter 6 The Current Status of National Programmes, Training<br/>and Legislation</b>  | 73 |
| National programme for plant genetic resources  | 73 |
| Networks  | 74 |
| Education and training  | 75 |
| National legislation  | 77 |
| Information systems   | 79 |
| Public awareness  | 81 |
| Major constraints on national programmes, development,<br>training and legislation        | 83 |
| Major needs for national programmes, development, training<br>and legislation             | 83 |
| <b>Chapter 7 The Regional and International Collaboration</b>                             | 85 |
| Regional collaboration  | 85 |
| International collaboration   | 86 |
