Entrepreneurship education and the entrepreneurial intentions of students (Article)

Asraf, R.M.^a, Khan, Z.J.Y.^b ^aKulliyah of Education, International Islamic University, Malaysia^bCenter for Languages and Pre-University Academic Development, International Islamic University, Malaysia

Abstract

 View references (40)

This paper describes the results of a qualitative study that sought to discern whether entrepreneurship education has an influence on the intentions of students to be self-employed after graduation. The research used the faceto- face in-depth interview to obtain the students' perceptions of the entrepreneurship programme and whether it affected their intention to become entrepreneurs. The findings suggest that entrepreneurship education is strongly linked to students' entrepreneurial intention. © 2017 American Scientific Publishers. All rights reserved.
